1948 HANDBOOK for GARDEN AND ORCHARD

Beatrice
TREES AND SEEDS THAT GROW
SONDEREGGERS

BEATRICE NURSERY
BEATRICE, NEBRASKA

Red Sunset Dahlia

A beautiful, very large flower, one of the newest Dahlias. Bulbs of choicest quality, 60c each. Our Dahlias listed on page 52 include everything that is new and sure to bloom.

Sonderegger's Sweet Plum

Originated and produced by Charles Sonderegger, one of the outstanding horticulturists of the Midwest. This tree is extra hardy, produces very young, is easy to grow. See pages 16 and 17. 3 to 4-ft. trees, \$1.95 each; 2 for \$3.60, postpaid.

Peach-Cot

A cross between Peach and Apricot. Another production of Charles Sonderegger. See page 18. Prices of selected trees same as for Sonderegger's Sweet Plum.

Safe delivery guaranteed

Every Rose we offer has undergone many tests under varying conditions. These are varieties selected for extra healthy, vigorous growing habits, requiring a minimum of care. Their freedom of blooming is unexcelled, and they will begin to bloom within a few weeks after planting. Order the varieties and colors you like. Let us supply you with the Roses that will bring complete and lasting success to your garden.

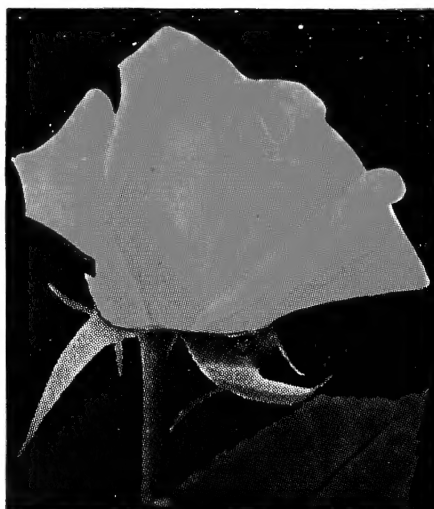

President Hoover

Editor McFarland

Gruss an Teplitz

Golden Dawn

Christopher Stone

Everblooming HYBRID TEA ROSES

Ami Quinard Deepest black-red. A splendid rose, fragrant and dainty as a cut-flower. Should be in every garden.

Christopher Stone Clear scarlet-crimson, which remains unfading until the petals fall. In the bud stage as well as in full bloom it is a beautifully shaped rose, delicately fragrant. A new rose, selected particularly for its vigorous growth and resistance to heat, as well as continuous blooming habit.

Condesa de Sastago Here is a beautiful combination of fiery-red inside and rich yellow on outside of each flower petal. A large rose, from bud-stage to full bloom, fragrant as well. Added to this are the healthy, vigorous growing habits of this plant, assuring continuous blooming.

Editor McFarland Bright pink. A wonderful cut-flower, particularly in the bud stage, and blooming most continually through summer and fall. The flowers, on strong stems, are fragrant, in the pink Everbloomers it ranks amongst the world's finest.

E. G. Hill Brilliant scarlet, very double and does not fade in the sun. An excellent lasting cut-flower.

Golden Dawn One of the hardiest yellow roses, and regardless of the price you would be willing to pay, none could be better. Fragrant, hardy, a healthy grower, and producing a wealth of flowers.

Golden Rapture Beginning in the bud stage, this is a truly lovely Rose throughout, of a rich shining golden color, pleasantly perfumed.

Gruss an Teplitz Bright cherry-crimson, intensely fragrant. A very vigorous and healthy grower. This is the oldest Rose that we are listing, and it still is the most freely blooming variety in existence. For lots of flowers throughout the summer, select Gruss an Teplitz.

K. A. Viktoria Pearly white with lemon center. A large, fully double Rose of perfect form. This lovely variety leads the list of all white Hybrid Tea Roses.

President Herbert Hoover

In the bud stage as well as when open, the flower is very beautiful. Distinct copper coloring with pink and flame tints.

Radiance, Pink Bright rosy pink, very fragrant, of the large double Radiance type. The plant is a healthy, vigorous grower.

Radiance, Red A splendid Rose of lovely cherry-red color, with good stems for cut-flowers. Fragrant; especially good for fall blooming.

Talisman The perfect bud Rose unusually colored in a combination of gold, apricot-pink, and carmine. No rose garden is complete without it.

HYBRID PERPETUAL ROSES

These are hardier than Hybrid Teas, almost thornless, and strong growing.

American Beauty Very fragrant, crimson - carmine shaded deep pink. One of the oldest and hardiest of the everbloomers.

Paul Neyron Largest of all known Roses; often called the "Cabbage Rose" because of its immense, double flowers. Very fragrant, dark pink.

Snow Queen Pure white, very large, and perfectly double. A vigorous grower that blooms well.

Safe Delivery Guaranteed.

Red Radiance, one of the hardiest.

Climbing Roses

2 year No. 1 plants, 75c each; 3 for \$1.95; postpaid.

Climbing American Beauty A very popular Rose, and a good grower, with nice, double flowers of red to crimson color. This is one of the finest climbing Roses.

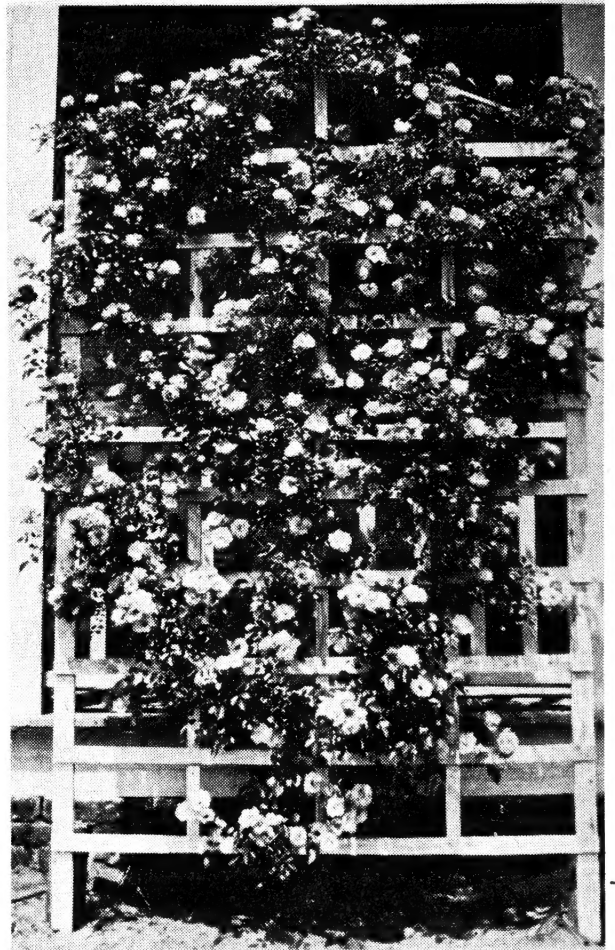

Gardenia, Yellow The only hardy climbing Rose in this color, with fairly large flowers, of light yellow to deep yellow in the center, with a healthy foliage.

Paul's Scarlet Climber The double, intense scarlet flowers of excellent shape and good size appear in great abundance. It is a good, strong, healthy grower.

White Dorothy Perkins A nicely shaped double climbing Rose, appearing in pretty sprays. Particularly hardy and really the best white climber on the market.

HOW TO PLANT ROSES

Have holes dug large enough to give plenty of room for the roots of our two-year Roses. Use ordinary garden soil to fill in around roots (no fertilizer added). Water well, have 2 inches of soil over the root crown (called the bud). Then bank up 8 inches of soil to keep the stalks damp and cool until Rose is started (2 or 3 weeks). Cut canes back to 10 inches from ground. For winter protection of Hybrid Tea and Dwarf Roses follow same method of banking up in late fall, and cutting canes back in the spring.

Dwarf Roses

2-Year Strong No. 1 Plants.
95c each;
3 for \$2.55, postpaid.

Gruss an Aachen Blossoms appear in individual double flowers which are fragrant and shaped like Hybrid Tea roses. Color ranges from carmine and salmon pink in the bud state to a golden yellow as the rose opens, turning almost white before it fades. Blooms practically from spring until late fall. Compact in growth; fine for the rose bed or border. Healthy, and hardier than Hybrid Teas.

Ideal, Red Baby Rambler Very bushy, well covered with clusters of dark red flowers. Everblooming, and very showy in the border.

Gloria Mundi A floribunda type, with huge clusters of orange-scarlet flowers. Individual blossoms are double, and will make a beautiful showing in your garden.

Chatillon The outstanding pink variety of the Dwarf Rambler roses, with enormous flower heads of lively pink. Blooms throughout the summer and fall. Will be the pride of your garden.

This book, offering our goods, has been written with utmost care, with the intention of making it the most dependable guide for your garden and orchard work.

We have joined the leading houses in the nursery and seed industry in a vigorous effort "to hold the line" against rising prices. For spring 1948 you can buy your planting stock for as much, or even less than in recent years. There will be a greater demand for nursery stock in 1948 than at any time before. At present price rates it is expected that the available supplies will be sold out before the planting season is over. Therefore, it will be wise to buy early. Send your order several weeks before the planting time arrives. Give us a chance to reserve the scarce items for you, we ship at the right time for planting in your locality. Throughout our business we employ up-to-date methods to assure the faultless handling of your order, whether large or small.

TERMS:

Guarantee All shipments are guaranteed to reach you in first-class condition. Replacements are furnished free if a tree or shrub is not in satisfactory condition upon arrival, and if you notify us promptly. Stock that dies during the first growing season is replaced at one-half of the regular price. Claims, however, must reach us before October 1, 1948.

Stock True to Name All Our trees and plants are carefully labeled, and are true to name. However, if there should ever be an error found in the filling of an order, any tree or plant that is not true to name shall be replaced without any cost to the customer, or refund of purchase price shall be made. Claims to be sent in within 6 years from date of delivery.

Remittances Money orders and bank drafts are absolutely safe to mail in a letter. Personal checks from any of our friends and customers are also accepted. Cash should be sent by registered letters only; it is not safe to send cash in ordinary letters. When the remittance is not sent in with the order, and instead the amount is to be collected on delivery (C. O. D.), one-half of the total of the order should accompany the order as a down payment. C. O. D. shipments are seldom requested; it is an expensive way of making remittances, and often causes a little delay in the delivery of live trees or plants.

Prices This garden book and prices therein quoted cancel all former price lists or quotations. All prices quoted in this book are subject to change without notice after June 1, 1948.

10% Premium on Club Orders When several neighbors club together and send in a combined order, we send along a premium, customer's choice, selected from this book. The premium to be worth 10% of the order total.

Disclaimer on Seeds We exercise great care to keep all seeds properly labeled, clean, and pure. However, we are compelled to make all seed sales under the following disclaimer: The Sonderegger Seed Store gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds they sell, and will not be responsible for the crop. Every reputable seed house is using this same disclaimer.

Attached to every shipment of trees or plants is a copy of Certificate of State Inspection.

hardy... APPLES

Upland grown
"money doesn't
grow on trees"
but
"fruit does"

Delicious, Double Red Delicious is the best paying apple on the market, and in this improved double red strain the special dark red color develops early in the ripening season, and evenly, covering the entire apple. Due to this fact, the apple can be picked while still perfectly hard, and having its extra fine color. Hard-ripe picking makes this apple the longest keeper of any. Ripens October 10. Hardy in the Middle West, and the tree is a vigorous grower.

Delicious, Yellow An apple of medium size, golden yellow. Possesses a rich flavor, resembling that of pears, quite sweet. It is one of the finest table apples you can get. Perfectly hardy here, and most anywhere in the Middle West; bears young. Ripens first week in October.

Grimes Golden Contains practically no acid. Combines a rich aromatic flavor with an attractive golden yellow color, and a long season of usefulness. It is one of the oldest apples in America, and still one of the very best. The tree is healthy, a good grower, and bears well, but should be pruned annually as it is inclined to grow bushy. Do not plant it north of the middle of Nebraska. Ripens end of September.

Northwestern Greening Vigorous grower, extremely hardy; does well most anywhere, especially in the North and Northwest, where few apples of such high quality grow successfully. Keeps well, fruit is large, greenish yellow when ripe. One of the best for baking. Restaurants pay premium prices for them. Ripens middle of October.

Planting Instructions

Plant Apples 30 by 30 feet apart, or plant 35 by 35 feet apart, and plant filler trees between each two apple trees. For filler trees we recommend Cherries, Peach and Plums. These fillers will give you an early income from your orchard, and can be removed when the apples require all the space in later years.

WINTER

These apples ripen late, and keep well, many years of experience we have a select

Red Heralson A great new apple for the North and Midwest. Extra hardy, stands heat and cold equally well, with a strong, hard wood which does not split easily. Bears extra heavy, and young, often the third year after planting. A large, all-red apple of good keeping qualities, desirable for table use, baking or pies. Ripens in September, later in the North.

All-Red Jonathan A direct descendant of the famous Jonathan, not crossed with any other apple, therefore it possesses all of the fine flavor, juiciness and refined texture of the Jonathan. Through careful search for Jonathan of extra high color, and for several years taking propagations only from such trees, the All-Red Jonathan can finally be offered at no extra cost. Just like the old fashioned Jonathan, it is an apple of medium size, ripening end of September, and keeping in an ordinary cellar until Christmas. The tree is hardy through the corn belt, but not suitable for the extreme North. An orchard without some Jonathans just is not an orchard, and in this improved strain quality and looks have been joined.

heavy... BEARERS

and save money

APPLES, LATE

most of them until spring. From
tion of satisfactory varieties.

Ben Davis This is probably the oldest apple in the Mid-West. in recent years there has been a considerable demand for Ben Davis, because of its excellent keeping quality, and being the apple most suitable for pies. Bakers prefer Ben Davis. This tree can be grown anywhere, extra hardy, produces enormous crops under ordinary conditions. Ripens early October.

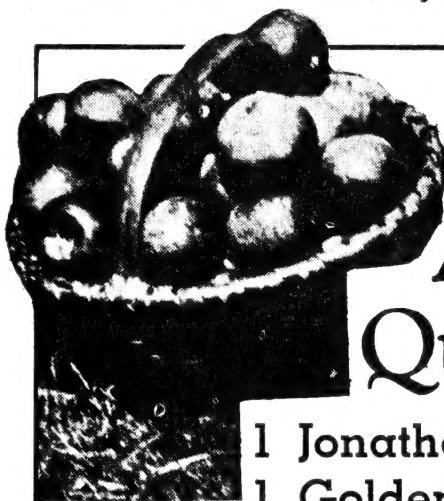

Stayman's Winesap A popular market apple, very large, striped dark red, keeps well, and is in strong demand for cooking. Ripens in October.

Golden Winesap This wonderful apple combines the juicy tartness of the Jonathan, the satisfying meatiness of the Winesap, all the Beauty of the Winter Banana, that deep golden color of Grimes Golden with a rich red blush, and the long keeping quality of the old Ben Davis. And to top it all the tree bears young, as quickly as Dwarf apples. Completely hardy. This has been one of the many introductions of the late Mr. Carl Sonderegger. Ripens in October.

Mammoth Black Twig (Paragon.) A Russian apple, one of the very best for the Middle West. A good bearer, and the tree is perfectly hardy up to South Dakota line. Large, dark red, firm, sub-acid and juicy, keeps well in common cellars. You will find this apple highly satisfactory, and I urge you to plant more of this variety. Ripens middle of October.

Old-Fashioned Winesap A good tree for home orchard. Apples little, too small for market; quality is good, keeps well. Dark red. Tree bears heavy, perfectly hardy in the Middle West. Ripens middle of October.

Yellow Delicious and Staymen's Winesap.

Vine, a fine hardy climber.

PLANTING INSTRUCTIONS

Plant Apple trees about 2 inches deeper than grown in the nursery. This puts the bud (or graft) just above the roots about 1-inch below the surface of the soil, which is just right. Cut the ends of all roots smooth with a sharp knife, making a slanting cut. This applies to all trees and shrubs, and stimulates the formation of new roots.

Apple Trees continued on pages 8 and 9

YELLOW TRANSPARENT, PAGE 9

CRAB APPLES

Due to their stronger and more spreading growing habits, Crab apples are sometimes used for ornament, medium-size shade trees as well as for the fruit. They are hardy anywhere. The following two varieties are the best all-purpose Crab apples.

Whitney Sweet Crab Green with red stripes, averaging about 1½ inches in diameter, and therefore large enough to make a good eating apple for home use. Ripens early in August, and being a sweet apple, it makes a highly desirable summer apple. It is also a cooking apple of high quality. Should be in every orchard, and in the North it will be one of the hardiest, and most dependable bearers.

Dolgo The dark-red Jelly Crab. The high quality of this beautiful red crab apple, the abundance in which they are produced, and the hardiness of the tree, will satisfy you in every respect. The tree bears young and grows well, you can grow Dolgo for a very pretty shade and ornamental tree. The apple is egg-shaped, appears in clusters, it is dark red all over, and even the flesh is of reddish color, this and the grand flavor of this apple make it the finest for jelly.

PLANTING INSTRUCTIONS

Fill in with good top-soil around the roots (no fertilizer to be added to this soil), and water well at planting time. Watering is the best method of packing the soil firmly around the roots. After planting apple trees should be pruned. Cut all branches back to about one-half of their length. The center-leader may be cut back a few inches.

FALL APPLES

Snow Apple Of medium size, round, surface pale yellow nearly covered with red. Flesh snow-white, tender, fine grained, juicy, with a mild sub-acid flavor. This is an old variety, but in its fine qualities, hardiness and productiveness it has never been surpassed. Ready to eat from the tree in September, and will keep until December.

Anoka Fairly good in size, yellow with red stripes. Ripens here end of August. One of the very best for the North, where its ripening season is the latter part of September, and makes a very nice keeper. Anoka begins to bear at an early age, and produces well.

Wealthy This apple can be grown successfully most anywhere clear to the extreme North. It is a great bearer, in fact few varieties are so hardy and so productive. Wealthy is a fine apple, for cooking or table use, for drying or for pies. Large, mostly covered with red, fine grained and juicy. Without this good apple your orchard is not complete. We recommend Wealthy, knowing that you will love this good fruit. It ripens here early in September, but farther north the ripening season will be later, and the apple will be a longer keeper.

PRICES OF ALL APPLES PAGE 6

EARLY APPLES

Early apples are hardy anywhere, hardier than any other apples, and they bear young, and extra well. However, the fruit of early apples does not keep very long after picking. For home use early apples should be planted only in small numbers unless there is a city nearby where early apples would always find a good market.

Duchess of Oldenburg An excellent cooking apple. Medium to large in size, greenish yellow with red stripes. Bears heavily. For cooking and pies it is unsurpassed, but for raw eating it is a little sour. The tree grows to large size, used as a shade and fruit tree with a very heavy foliage. Where the tree is to be planted for shade and fruit, we recommend the larger size for planting. The apple ripens here in early August.

Early Harvest This is our earliest apple, with us here it usually starts ripening July 4th. Years ago on the Sonderegger farm the earliest fruit in orchard was Early Harvest apples and Mayflower Peaches. You must grow these trees yourself to appreciate fruit of such quality and so early in the summer.

Sonderegger trees, because of their greater vitality, bear young and well. This tree, just 6 years after planting, produced over one bushel of extra choice Grimes Golden apples. Upland growing under our severe climatic conditions gives a tree the greater vitality needed for young and heavy production.

for Apples

insect or disease attacks, succule below. This will keep the Sherwin-Williams products,

WHEN TO SPRAY OR DUST

When the trees are dormant.

1. When the blossom buds begin to show. (The pre-pink spray, when the buds are in the "Cat's-Paw.")
2. The pink spray—just before the flowers open.

3. At the fall of the petals (Calyx Spray).
4. Ten days to two weeks later.
5. Three weeks after the Calyx Spray.
6. Four weeks after the Calyx Spray.

Approximately ten weeks after the fall of the petals.

Red June A little later than Early Harvest. The apple is of medium size, nice for home-use or market, it is yellow, striped red. This is an old-fashioned apple, and its very good eating qualities will always give it a favored place with the experienced orchardist. Ripening season July to August.

Yellow Transparent Fruit medium large, smooth, skin clear white turning pale yellow when ripe. The flesh is white, fine grained, aromatic, and of splendid quality. Ripens a week or 10 days after Early Harvest. The tree is a vigorous grower, and a good bearer, perfectly hardy, beginning to bear quite young, and it does well in most any location.

You May Like to Know

That the production of one apple tree requires 22 separate operations, 12 of which must be hand-work by highly skilled men. 10 operations are performed with mechanized equipment. This does not include assembling of the tree in your order, or such handling as packing for shipping. Every fruit tree represents 3 years of careful work, mostly handwork.

Pruning of Apple Trees

So that the trees make an even shaped crown, apples should be pruned every year or two. Shorten the longest limbs. Cut out some of the branches where they stand too thick. Cut out the "water-sprouts." This is done very early in the spring. Trees growing extra fast due to favorable soil or weather conditions, should have a light summer pruning of the new branches. This applies also to Peaches.

Seckel Sugar Pears

America's Choicest Hardy PEARS

Prices of Pears

STANDARD TREES

	1	3	10
2-3 ft. well rooted, postpaid	\$0.95	\$2.60	\$ 7.90
3-4 ft. nice straight trees, prepaid	1.25	3.45	10.80
4-6 ft. 3-year roots, 2-year stems, selected speci- mens	1.60	4.50	14.20

The 4 to 6 ft. trees are too large to ship by parcel post. If your order for trees (seeds not included) amounts to \$15.00 or more, we pay the freight.

Clapp's Favorite Early. It is harder than Bartlett, does well in the northern part of this state, Iowa, Minnesota, Wisconsin and the Northeast. Tree is a good grower, and very productive. Fruit large, pale yellow with dull red and russet specks, fine grained, juicy and sweet. Ripens in August.

Lincoln Rapidly becoming popular, owing to its very good qualities. It is a large pear, yellow, flushed with bright red; fine for table use or canning. Hardy in Nebraska, anywhere in the corn belt, and the East. Your pear planting should include this tree.

Flemish Beauty Large, sweet pear, pale yellow, melting with delicious flavor. A vigorous growing tree, hardy, and one of our best mid-season pears.

Seckel Pear Also called Sugar Pear. Fruit is not very large, but is of finest flavor, as good as the best for table use, and for this purpose Seckel should be in every orchard. I do not recommend it for canning. Tree is a slow grower, but bears extra well, and is hardy. Can be grown wherever pears are known to succeed. This year, 2-3 and 3-4 ft. trees only. Seckel ripens in September.

Bartlett—Early The pear that is first on the market, ripening end of July and August. A pear of fine quality for eating and canning, and the tree is hardy in the eastern states, the corn belt, and of course in the South.

Anjou A large greenish pear, shaded with russet-crimson. Fruit highly flavored, butterlike, melting rich. A pear of outstanding quality, very productive, and starting to bear very young. An excellent pear for the entire Mid-West. Ripens in October, and keeps well until Christmas. For your home use or market, Anjou will highly please you.

PLANTING INSTRUCTIONS

Pears should be spaced at least 30 feet apart, and due to their tall, upright growth, often fit in well as shade trees, for instance, in the back yard. Planting of the trees should be done as stated for apples on pages 6 to 9. Pears succeed in poor soil, in fact they begin to bear younger if the trees grow slow due to inferior soil.

Spray Guide

Where pear trees are known to have been mend following this spray guide for a year pest. Use Sherwin-Williams sprays.

2 Hansen Bush Cherry
for flowers and fruit.

Prepaid

A branch of Duchess Pears, showing the typical bearing habit of this good pear.

Parker NEW. A production by the Minnesota State Fruit farm. As hardy as the Kieffer, in quality superior to most of the early Pears. Ripens end of August. Medium to large in size, smooth, clear yellow with blush, tender flesh, medium fine grained, juicy and sweet. In medium to poor soil, this will still be a healthy and vigorous grower, and really prefers soil that is not very rich.

Duchess of Angouleme. Very large, fine quality and juicy. It is a late pear that keeps well into winter, if picked and stored hard-ripe. Ripens here in early October. A wonderful fruit for all purposes, successful anywhere except the extreme North. Also available in dwarf tree form, see Dwarf Pears.

Kieffer The popular late market pear for canning. A hardy, heavy producer, that can be grown anywhere, even in the North where other pears would not be sufficiently hardy. For fresh eating the quality of Kieffer is not as good as that of the other sorts listed here, but for canning it is as good as any. For this purpose the pears are ground up and canned with lemon, orange, or quince for flavoring. You may try this method; I am sure you will like them, and find canning very simple.

for Pears

attacked by insects, we recommend two, to rid the trees of the

WHEN TO SPRAY OR DUST

When the trees are dormant.

1. Just as the cluster buds are opening.
2. At the fall of the petals.
3. Two weeks later.

DWARF PEARS

The Espalier form of pear trees, due to a different type of roots on which they are budded. These trees can be planted as close together as 12 to 15 feet, will come into bearing within two to three years, therefore especially desirable for the small home garden. The fruit is exactly the same as that of standard pear trees, and we can supply the Bartlett, extra large strain, in Dwarf trees.

Supply of these trees is limited. Not more than five trees per customer. 3 ft. trees, well rooted, \$1.85 each; 3 for \$5.00; postpaid.

QUINCE

This tree grows in Dwarf shape, usually to an ultimate height of about 15 ft. Its foliage of small dark green leaves, and dense branch system, would make the Quince a desirable ornament, particularly at blooming time, when the bluish pink buds and blossoms cover the branch tips. Add to the nice appearance of a quince its very valuable fruit, and you have a tree worthy of a place in your garden. If you like the fine flavor of Quince, try this variety: Orange Quince, large fruit, golden yellow when fully ripe, and hardy wherever peaches can be grown successfully. 3 ft. size \$1.60 each; 2 for \$3.00; postpaid.

Cherries

NICE SHRUBS

Hardy CHERRIES for Quick, Large Crops..

Montmorency

Early Richmond May Cherry. The common medium red cherry, highly productive, and very hardy. Quality is good for pies and canning. An excellent tree for the Midwest and the North, bears regularly. Ripens in June.

Montmorency The above photo, actually taken natural size of my Montmorency Cherry, will give you an idea of the size and heavy bearing of this tree. It is a good red cherry, not very sour, ripens about 10 days after Early Richmond. Very productive, and hardy throughout the East, Northeast and the entire Middle West. Should be in every town or farm garden and orchard.

Wragg For the West and Northwest. Fruit medium to large, dark red, and of fine quality, almost like English Morello. Tree is very hardy, a good grower, and highly productive. For western Kansas, Colorado and western Nebraska, it is one of the best cherries. Ripens in July.

For Your Table or Big Profits You Are Sure of Plenty of Fruit When You Plant Our Trees.

PLANTING INSTRUCTIONS

Cherries do well most anywhere, except on low ground, where the soil is apt to stay very wet for days and possibly weeks at a time. The best place to plant is on a slope. The soil does not need to be rich, even poor soil produces good Cherries. Plant Cherry trees 20 by 20 feet apart, or plant them as filler trees in the Apple orchard.

Spray Guide

Cherry trees are hardly ever attacked by rare cases of infection; follow spray guide

PESTS	WHAT TO USE	Level Table-spoonfuls to 1 Gallon Water
Brown Rot, Leaf-Spot, Curculio and Slug.....	Dry Lime-Sulphur... and Arsenate of Lead.....	3 and 1½ to 2½
Leaf-Spot	Dry Lime-Sulphur....	2½ to 3
Cherry Fruit-Fly or Maggot.....	Arsenate of Lead.....	1½ to 2½

SWEET CHERRIES

Black Tartarian Very large fruit of purplish black color. This is a Heart Cherry, very sweet, of superb quality. The tree is a vigorous, upright grower, immense bearer. A popular market cherry. I recommend it for the South, the Pacific states, also the Great Lakes region and the New England states. In the Middle West they are not dependably hardy, although they are grown here and there in protected places with fairly good results. A great cherry in its proper place. Ripens fore part of July. Add 10c per tree to price quoted on page 12.

Yellow Glass Fruit large, somewhat flattened in shape, of very beautiful golden color, firm, juicy, sweet and of fine quality. This is not a Heart Cherry, and is therefore hardier than Black Tartarian. It stood our dry summers and cold winters with fairly good results. I can recommend the tree for localities as far north as the southern half of Nebraska. Blooms late. I suggest pinching off the tips of the young branches in July to encourage branching and a dense growth for best bearing. Ripens July 1. Add 10c per tree to prices quoted on page 12.

New Nanking Cherry (prunus tomentosa). Grows to a height of 5 ft. and over, with a clean, healthy foliage, and a beautiful load of snowy blossoms in early spring, followed by astonishing quantities of Cherries. The fruit is about the size of regular Cherries, and much the same in flavor, furnishing an abundant supply of fresh fruit as well as fruit for sauce and jelly. Ripens here end of June; light red to red when fully ripe. It serves the double purpose of making a nice ornamental shrub as well as a good fruit producer. To enable our customers to plant this new shrub, we are pricing it very low. Nice 2 ft. plants, 2 for 95c; 6 for \$2.50; postpaid.

for Cherries

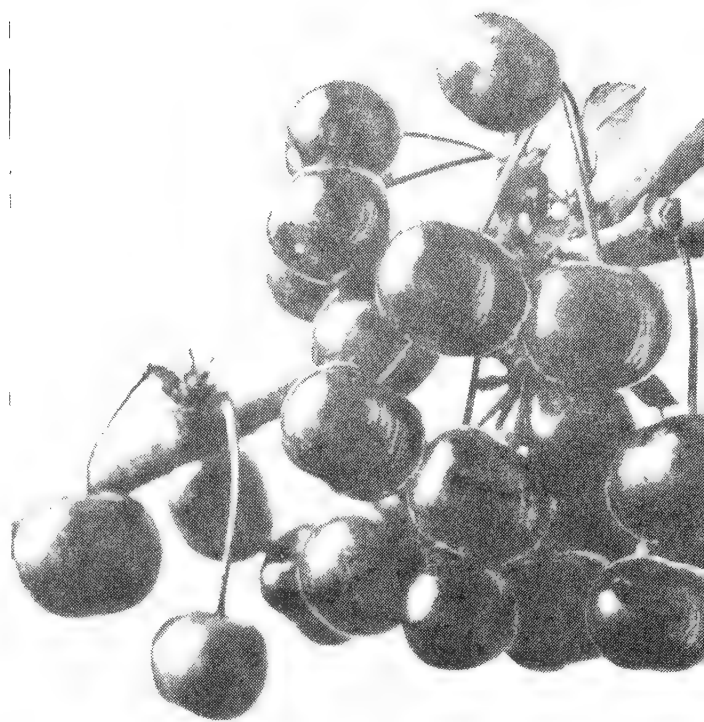

insects or diseases. In few very below.

WHEN TO SPRAY OR DUST

1. Just before blooming.
2. When the petals fall.
3. Ten days later.
4. Two weeks after the fall of the petals.
5. Four weeks after the fall of the petals.

Just after picking.

As soon as the fruit flies appear. In case of rain, make additional applications.

EARLY RICHMOND,
a heavy bearer.

Compass Cherry Plum Cross between a Cherry and Native Plum, growing to a size of 10 to 12 ft. similar to a Plum tree in appearance. The fruit is larger than Cherries, small pit, in great favor for canning and preserves. It is an enormous bearer, and begins to bear very young, sometimes as a yearling. 3-4 ft. nice trees, \$1.50 each; 2 for \$2.75; prepaid.

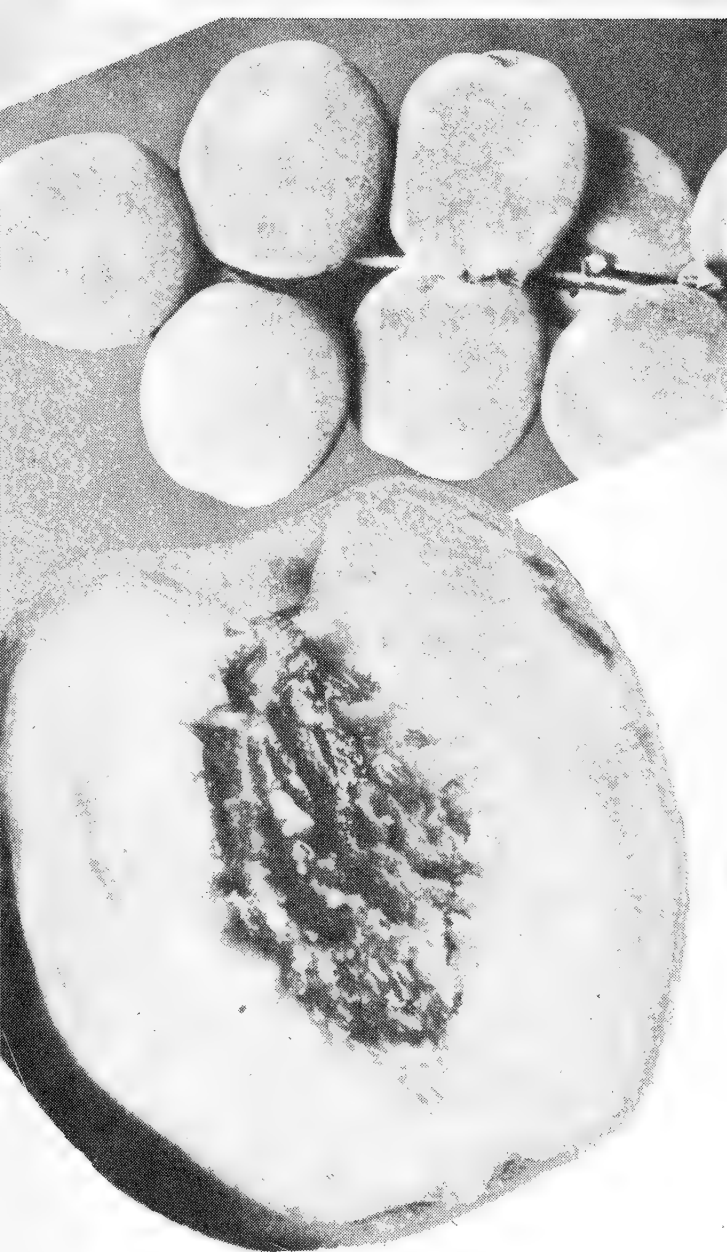

Hansen's New Bush Cherry

The original stock is of the true production by Professor Hansen of Brookings, South Dakota. A greatly improved Sand Cherry. The fruit is fair in quality and recommended for canning (preserves), of good size, small pit, very dark red. Makes a very good hedge, as it grows in low bush form. Resists extreme drought and cold remarkably well. 18 to 24 in. shrubs, 3 for 95c; 10 for \$2.75.

PLANTING INSTRUCTIONS

Plant Cherry trees so deep that the bud, just above the root will be about 1 inch below the soil surface, in other words plant about 2 inches deeper than grown in the nursery. Cut the ends of all roots smooth with a sharp knife just before planting. Water well at planting time. The top-branches do not require pruning, except broken branches may be removed.

Hardy PEACHES

Red Haven Freestone. Probably the hardiest of all yellow-meated Peaches, very productive. Peach good medium size, quite solid, almost completely red like a Jonathan apple. August.

Champion Extra hardy. Freestone. Good medium to large size, creamy white with red cheek. Excellent flavor, sweet, rich and juicy, white meated. Champion is one of the hardiest peaches you can grow. Not admitted into Colorado. I recommend it highly for the Middle West, and anywhere on the northern edge of the peach belt. Ripens in August.

Belle of Georgia Freestone. Very large, white with red cheek, flesh white and firm with excellent flavor. Hardy most anywhere south of here. Ripens early in August.

Mayflower Semi-Cling. This and Early Elberta are the earliest peaches you can have. White meated, good size, and fine quality. Gets a nice red color even before fully ripe, blooms late and is fairly hardy. Ripens in July.

Prices of Peach Trees

	1	3	10
2-3 ft. well rooted, prepaid	\$0.65	\$1.85	\$ 5.70
3-4 ft. branched, prepaid...	1.00	2.85	8.65

Trees of 4 ft. and up are too large to be sent by parcel post. If your order amounts to \$15.00 or more (not including seeds), I pay the freight on the shipment.

Early Elberta Freestone. A little larger than Elberta, in other respects the same, except that it ripens almost two weeks earlier. Very good for southern Illinois, Indiana, southern Missouri and Kansas, but not hardy north of there.

Elberta Freestone. The best known market peach, large yellow with red cheek; flesh yellow, firm, good quality. Not hardy in Nebraska. Does well in the South, in Ohio and Michigan. Ripens in August.

PLANTING INSTRUCTIONS

Plant Peach trees not less than 20 ft. apart, or use them as filler trees between Apples. Even poor soil produces good peaches, in fact, the slower growing peach trees in poor soil will live longer than fast growing trees in good soil. Plant the trees from 1 to 2 inches deeper than grown in the nursery, depending on the size you buy. Use just ordinary soil to fill in around the roots at planting time, add no fertilizer to this soil, and water well to settle the soil properly.

Spray Guide

If you have had trouble keeping your the trees for a couple of seasons, using

"Homesteaders" PEACH COLLECTION

1 Belle of Georgia 1 Polly
1 Red Haven 1 J. H. Hale

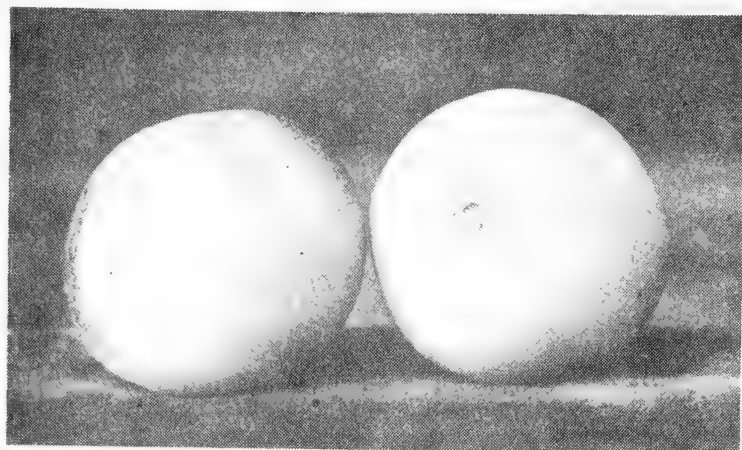

All nice 4-6 ft. trees.

For **\$4.48** By
Only Express

FREE 1 Gold Flame
Honeysuckle

J. H. Hale Freestone. Large size, beautiful rich orange yellow color with carmine cheek, smooth; a very good peach. Does well as far north as the middle of Nebraska, and anywhere south and east of here. Ripens end of August.

Polly Freestone. One of the surest bearers. Claimed to be even hardier than Champion. Medium size, good flavor, white-meated, ripens in August.

NECTARINES—SMOOTH SKINNED PEACH

The Quetta Nectarine The tree resembles the peach in size and growing habits, and is as hardy as the Champion or most other budded peaches. The fruit is almost as large as the common run of peaches, but it is perfectly smooth-skinned, with a wax-like appearance. Of pleasing, delicious quality, the Nectarines make an excellent dessert dish. For drying and for preserves they are superior to the peach. Nectarines have never been offered on a large scale, and have not been planted in commercial orchards, and is known only to few people. However, the tree is hardy anywhere in the corn belt, can be grown successfully wherever peaches can be grown, and produces as good as peaches. Nice 3 to 4 ft. trees, \$1.85 each; 2 for \$3.45; prepaid.

Extra Hardy Seedling Peaches

Although these little trees have been grown from seeds of choice, hardy varieties, they will not come true to name when they start bearing. The larger per cent however, will produce peaches of fair to good quality. We recommend them for a row in the windbreak, where their rapid growth will be very valuable, and will make some pretty good fruit. For orchard planting you should use only budded peach trees, as the Seedling peaches would be too uncertain as to the quality of fruit. For a windbreak row, plant Seedling peaches 6 or 8 ft. apart. Our Seedling peaches have been pruned to nice tree form, they are now 2 to 3 ft. high, easy to start, will make a fast growth. 10 for \$1.95; 25 for \$3.75; 50 for \$6.95; prepaid.

FRUIT TREE UNDERSTOCK

Some of our customers like to graft or bud some rare specimen of fruit, and need understock for such purposes. We have understock of the wild French Crab apple, also wild Pear roots, and the hardy Maheleb roots used for Cherry-understock. We are using this stock for our own propagations, and if you are experienced in propagating, want to do some grafting from your own scions, we will furnish you this understock, in any of the three types mentioned. Your order for this stock must reach us before February 20th, as we will be planting the understock in the nursery here, at that time, and cannot make reservations on later orders. State when you wish to have shipment. Price of these roots: 25 for \$3.00, postpaid.

for Peaches

peaches free from worms, spray
Sherwin-Williams sprays.

WHEN TO SPRAY

In spring before the buds begin
to swell.

1. When 75% of the shucks have fallen.
2. Two weeks later.
3. Four weeks before picking.

PLANTING INSTRUCTIONS

Pruning of Peach trees is an important matter. At planting time cut back all branches to within 1-inch from the main stem. This produces a new, dense crown. As soon as the new branches are about 16 inches long, cut them back to 1 ft. length. During the following years give fast growing peach trees a summer pruning early in July, cutting off just the very ends of all new branches. This makes stouter branches, a stronger crown, and increases fruit production for the next year. Never cultivate around Peach trees after July.

A twig of Sapa Plums. Like all our Plums, a young, heavy, hardy producer.

hardy, young bearing PLUMS for quick, heavy crops

5-7 ft. trees

\$6.75

Express

FREE! 1 Blood Red Bush Plum

Waneta The largest of all Hansen Plums, and one of the largest in existence. Red with blue bloom; very good quality. The tree is extra hardy; you can grow this plum anywhere; it bears very young, and most freely.

Hanska Bright red, heavy blue bloom, firm flesh, which has a very pleasing Apricot flavor. Being a Hansen Plum it is very hardy; bears young and heavy.

Sapa Glossy dark purple, flesh is of the same color, and is of excellent quality. Bears young and very heavy.

Omaha Native Fruit dark red with small pit, sweet, well flavored. The tree is exceptionally hardy; will do well even in the extreme North. Omaha is a sure and heavy bearer.

Golden Rod Native The finest hardy yellow plum, sweet and tender with very good flavor. Bears young and freely.

Opata The earliest of the Hansen Plums. Dark purplish red with green flesh, and very pleasant flavor. Ripens end of July.

PLANTING INSTRUCTIONS

Plant Plums listed on this page not less than 18 feet apart, or plant them as filler trees in the Apple Orchard. The European Plums should be planted at least 25 feet apart. Plums should be planted so deep that the bud (just above the roots) will be about 1 to 2 inches below the soil surface. Cut the ends of all roots smooth just before planting. Plums do well in any soil, can even stand a little excess moisture on low ground. For best pollinizing plant two or more varieties of Plums. They will bear heavier if pollinized by another kind.

Spray Guide

I recommend a dormant spray for all plums, which is to be applied very early in the spring, before the buds open, and should consist of 9 tablespoonfuls of Dry Lime Sulphur per gallon of water. In localities

European Type PLUMS

PRICES of Yellow Egg, Stanley Prune,
Lombard and Reine Claude:

	1	3	10
2-3 ft. trees, postpaid.	\$1.10	\$3.00	\$ 9.20
3-4 ft. trees, postpaid.	1.40	4.00	12.40
4-6 ft. trees, express..	1.70	4.90	14.80

All well rooted, well branched, guaranteed true to name, safe delivery guaranteed.

Yellow Egg Plum A plum of extra large size, oval or prune-shaped. The skin is yellow, with numerous red dots. The flesh is strongly grained, well flavored, slightly sub-acid, excellent for fresh table use and for cooking. The tree is a thrifty, fast grower, and very productive. Not recommended north of the corn-belt. Ripens here end of August.

Lombard Plum Medium size, oval, violet red, flesh yellow, juicy, pleasantly flavored, stone nearly free. A great bearer, especially in light soils, where the tree grows well, and succeeds where other European Plums fail. One of the best Plums for fresh fruit in Nebraska and Kansas. Not recommended for the extreme North. Ripens early September.

Stanley Prune A medium size prune, bluish purple, juicy, very sweet, solid meated, with all the fine quality features of the German and Italian Prunes, but ripens a little earlier, and is considerably hardier. Can be planted throughout the East, and the Corn-belt. Good for table use, and excellent for canning. Like all Prunes, and European type Plums, requires 4 years before the tree begins to bear.

Blood Red Bush Plum A wonderful shrub which produces large quantities of excellent plums, blood-red clear to the small pit (freestone) for canning, fresh fruit, or jelly. Extremely hardy and will furnish you its first fine crop the year following planting. Nice strong, 3-ft. shrubs, \$1.00 each; 3 for \$2.40; prepaid.

for Plums

where leaf diseases attack plums, which is seldom the case, or where the ripening plums are attacked by worms, apply the spray as recommended for Cherries against Leaf-spot, Curculio and Slugs, see pages 12, 13.

Charles Sonderegger, who personally supervises the growing of our stock, has long been known as one of the leading growers of nursery stock in the Mid-West. In this picture he shows a limb of the Sweet Plum, a tree which was introduced through his own efforts.

Reine Claude Fruit very large, practically round. Skin greenish with a slightly red cheek on the sunny side. Flesh yellow, juicy, very sweet with an excellent flavor. It is a very productive Plum, and hardy through the Corn Belt, and wherever Peaches grow successfully. This is the first time in 25 years that we list this Plum again, at the request of hundreds of our customers who are acquainted with its fine quality. Ripens in September.

Sonderegger's Sweet Plum (See Front Cover Page.) A cross between an Oriental and a Native American Plum. It inherited the young and extremely heavy bearing of the Native American plum, and the large size, small pit, and excellent flavor from the Oriental parent. It is light red when fully ripe with a blue blush, and yellowish green flesh. Usually begins to bear the second year. Limit three trees to one customer. 3 to 4 ft. trees, \$1.95 each; 3 for \$5.25; prepaid. 4 to 6 ft. trees, \$2.25 each; 3 for \$6.00. 5 to 7 ft. extra heavy, \$3.00 each, by express.

PLANTING INSTRUCTIONS

At planting time cut back the limbs of your plum trees to about one-half of their length. The leader (center branch) can be cut back a few inches. In good ground plums will grow almost too fast, and it is therefore a good plan to give them a summer pruning the second year. Early in July cut back the new branches a few inches to stop them from growing too much. This will also increase the bearing ability of the tree for the following year.

Superb Apricot
Extra Hardy
Splendid Quality

Apricots

Moorpark Freestone. This is an American variety. Hardy in southern Illinois and Indiana, Oklahoma, Texas, New Mexico and the Pacific coast. Not hardy in Kansas and Nebraska. Very large, yellowish-green with red on sunny side. Flesh bright orange. A great canning variety, also good for drying.

Wilson Freestone. Also an American type of Apricot, and in hardiness the same as Moorpark. Fruit is large, pale-yellow with red cheek. It ripens a little earlier than Moorpark, and the tree is an extra vigorous grower. Do not plant it in localities where the winter temperatures go below zero.

Prices of Budded Apricots			
2-3 ft. healthy trees,	1	3	10
prepaid	\$1.00	\$2.80	\$ 8.50
3-4 ft. well rooted,			
prepaid	1.30	3.60	10.50

branched	1.65	4.75	15.80

The 4 to 6 ft. trees are too large to go by parcel post. The freight will be paid on shipments of trees amounting to \$15.00 or more.

Superb Freestone, a very hardy Apricot, and since years the favorite with most fruit growers. The fruit is as good as the finest, the tree is an abundant bearer, and it is hardy except in the very extreme north. This tree also makes a very nice, well shaped shade and ornamental tree.

Chinese Golden Apricot This is considered the largest of all Apricots, and its flavor compares favorably with the best. But even more important is the perfect hardiness of this tree, and its great bearing ability. These features combined speak strongly for the tree, and will make it a valuable addition to any orchard. Usually this tree sells at a higher price, however, to introduce it to my customers, I will furnish it at prices quoted above.

the new Peach-Cot

This new type of fruit is a cross between the hardy strain of Apricot and Peach. It is considerably larger than the regular Apricot, with a smooth skin, ripens here in July. A fruit of very fine quality for the table and for canning. The tree resembles the Apricot, grows to large size, nicely shaped, makes a good combination fruit and ornamental tree. This variety is grown only in the Sonderegger nursery grounds, and can be bought only from us. Sales limited to ten trees per customer. 4 to 6 ft. strong, healthy trees, \$2.50 each; 2 for \$4.50; prepaid. 5 to 7 ft. trees, \$3.25 each.

PLANTING INSTRUCTIONS

Apricots should always be planted in pairs for best pollenizing at blooming time. For that purpose the trees may stand 100 to 200 feet apart without affecting cross pollenizing. They make satisfactory lawn and ornamental trees due to their nice foliage and freedom from insects. Plant the trees about 2 inches deeper than grown in the nursery, any soil satisfactory. Prune branches back to about one-half their length. The lower branches can be removed gradually, if a tall stemmed tree is desired. Spraying hardly ever becomes necessary.

NUT TREES

Butternut, White Walnut

One of the finest native trees, and often planted for a shade tree. Hardy as far north as South Dakota. The nuts are large, long, quality good. 12 to 18-inch seedlings, 3 for 65c; 10 for \$1.75; prepaid.

Hazelnut This is the old fashioned hardy type producing nuts of medium size. An upright growing bush. Very useful for hedges or screens, or to make up the lower growth of the wind-break. Sometimes included in ornamental plantings for tall growth. 18 to 24-inch nice shrubs, 3 for \$1.20, prepaid.

Chinese Sweet Chestnut

Bears large, edible nuts, and produces them very young, usually about the third year after planting. But even without its fruit-producing quality, its foliage being very pretty, like holly leaves, it will be highly ornamental as a small tree, or in groups of taller shrubs. It is very blight resistant, and has taken the place of the former American Sweet Chestnut, which failed in many localities, because of blight. Hardy, has produced Chestnuts here after a winter of 20 below zero. 2-ft. size, healthy little trees, \$2.35 each; pair \$4.25; postpaid.

Stuart Pecan Hardier than the Common Pecan, and can be grown as far north as southern half of Missouri, southern Illinois and Indiana. The nuts are large, thin shelled, the quality of which is very good. Plant them for home use and market. 2 to 3 ft. grafted trees, \$2.20 each, prepaid.

Thomas' Walnut A grafted tree, just as hardy as the common Black Walnut, but grown for its nuts, which are extra large, and thin-shelled, with the same high quality of the kernel as the common Black Walnut. 2 to 3 ft. strong trees, \$2.50 each; 2 for \$4.25; prepaid.

BLACK WALNUT—See page 34.

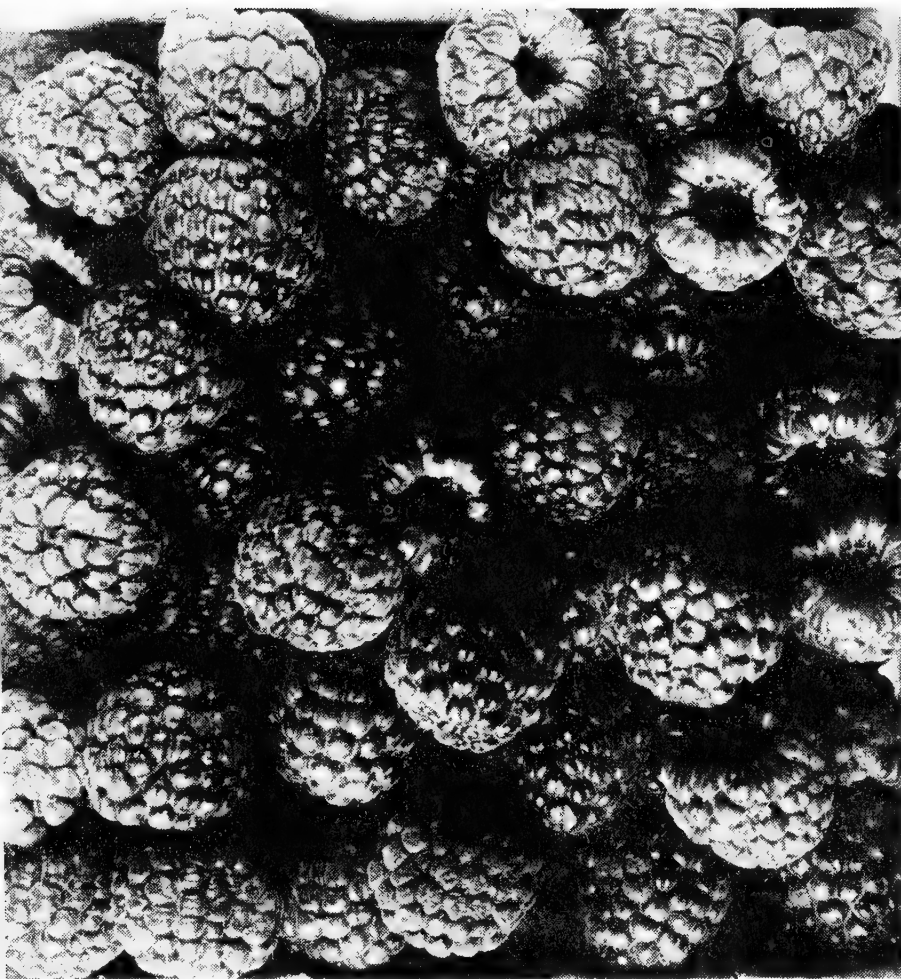

Paw Paw (Asimina). Grows to a small tree with handsome foliage, and at blooming time purple and whitish flowers. The large fruit, banana-shaped, is edible, and improves by cultivation. This has been a native tree of the Old West, and largely because of some people taking an interest in preserving rare plant specimens, the Paw Paw can still be found occasionally. It is of value for ornament and fruit. We are continuing to offer this tree at the request of the many horticulturists who are amongst our customers. This tree has practically no fiber roots, requires careful planting and a good soaking right after planting. Nice 2 to 4 ft. trees, \$1.25 each, prepaid.

BEATRICE, NEBRASKA

Chinese Sweet Chestnut. Hardy, Bears very young; very good quality. Of pretty appearance in tree or shrub form.

extra Rasp

Red Raspberries

Chief This is the earliest of all red Raspberries, and for home use or market it is a grand producer of first-quality, large sweet berries. Ripens about 10 days earlier than Latham. With a mulch of straw over winter, these red Raspberries are hardy in the North. We recommend a mulch anywhere north of 40 degree latitude.

Latham This Raspberry is of the same high quality as Chief, and just as productive, but slightly later. For a longer season of ripe Raspberries we recommend planting both Chief and Latham. For the main crop and for canning, Latham stands in special favor with most growers. The very large, attractive dark red berries are freely produced and a favorite in any market. Plants come into production the year after planting and assure you of quick and abundant returns.

Latham Raspberries, always a sure, heavy crop.

PRICE OF ALL RASPBERRY PLANTS

6 Chief
6 Latham
6 Indian Summer

All for
\$2.95 Pre-paid

Free with this collection:
3 Golden Queen Raspberries.

PLANTING INSTRUCTIONS

Both Raspberry and Blackberry plants should be set about 2½ to 3 feet apart in rows 5 feet apart. Plant in good soil containing no fresh fertilizer; cover the crowns about 1 inch deep but set deep enough so that another 2 inches of soil can be filled in after the new sprouts are 8 to 10 inches high. In midsummer when new growth is 2½ to 3 feet tall, pinch off ends of canes to promote branching.

Red Everbearing Indian Summer Everbearing

Produces a nice crop of large, sweet red berries of excellent quality in early summer and starts blooming and bearing again in September. It produces a handsome crop through the fall until frost. The plants are as hardy as Chief and Latham and they should be included in all plantings for fresh berries in the fall. Nice, well-rooted plants for quick results.

Care of Raspberries

Our strong Raspberry plants often bear some berries the first year, and are in full production the following year. When the berries have been picked, right after the bearing season following the year of planting, cut out the oldest canes, making the cut just above the ground. This is done every year, taking out the wood that is through bearing, and making room for the new canes to mature. If leaf or wood diseases ever attack Raspberries, a dormant spray, applied before the plants get green in early spring, will stop the trouble. The spray should be 9 tablespoonfuls of Dry Lime Sulphur per gallon of water.

hardy berries

Yellow

Raspberry

Golden Queen Color of the fruit is a rich golden yellow, averaging in size slightly larger than most red Raspberries. It is immensely productive, bearing over a period of two to three weeks, to supply you with fresh berries for your table use, at a time when few other fruits are in season. In flavor and quality it ranks with the very best. Due to the yellow color, which does not attract birds as much as red, there are practically no losses by birds. Golden Queen is hardier than any of the red Raspberries, and as hardy as the Black varieties. Supply very limited.

Purple Raspberry

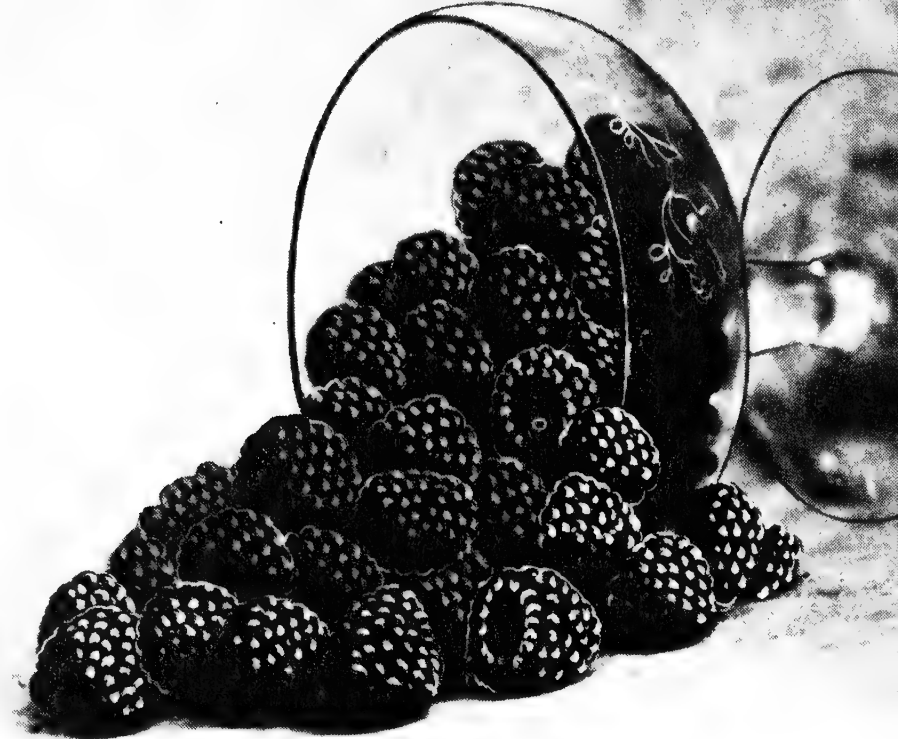

Columbian Purple The purple Raspberries are a little hardier than the red ones, and practically as good in flavor. Furthermore this variety does not make root-suckers; its growing habits are very much like those of the black Raspberries. For planting among other shrubs in the garden, where root-suckers are undesirable, use this Raspberry. It produces very well, and you will be well pleased with the splendid quality of the berries.

BLACKBERRIES

Eldorado Because of its exceptional hardiness this is a very sure producer. Berries very large, shiny black very sweet, and well flavored. To be at their very best Blackberries should be planted in a fairly moist location. Selected, well-rooted plants, 3 for 45c; 12 for \$1.60; 25 for \$3.00; 100 for \$11.50, prepaid.

Alfred One of the newer Blackberries, originated in the North, and recommended for its special hardiness. Does not require winter protection anywhere. Alfred is slightly earlier than Eldorado; in production, size and quality of berries there is very little difference. Alfred is a strong grower and should be cut back to 2½ feet as soon as the new canes reach that height. This promotes better branching, and consequently heavier production the following year. Same price as Eldorado.

BEATRICE, NEBRASKA

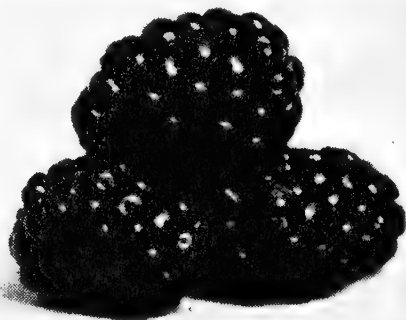

Cumberland, the best of the extra hardy Black Raspberries.

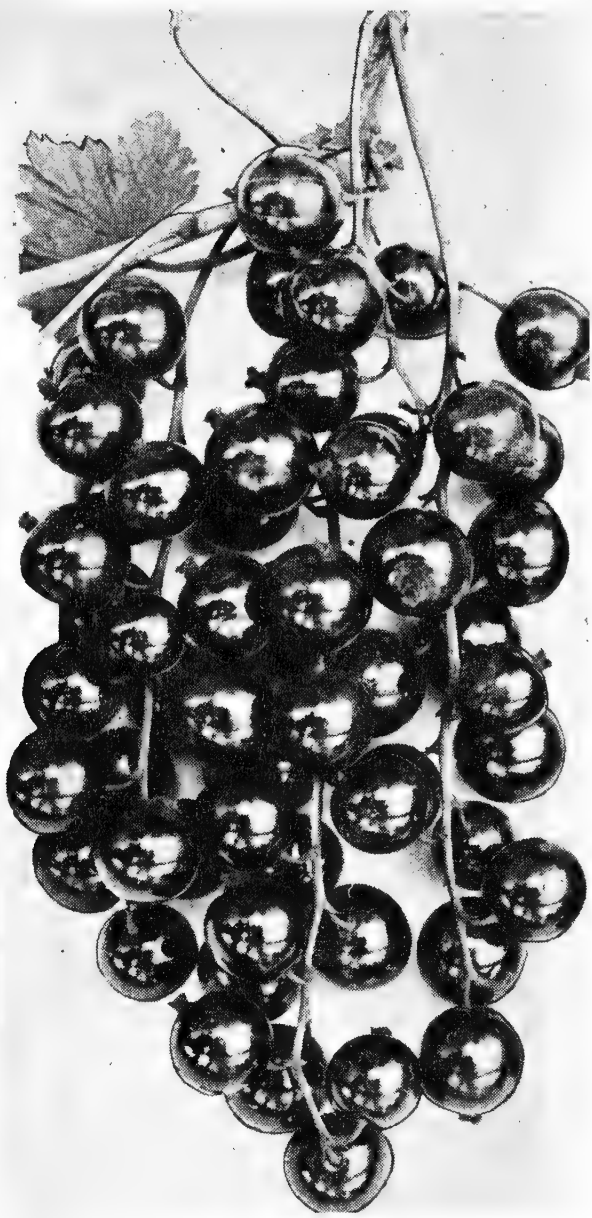

Black Raspberry

Cumberland It can safely be said that this is the hardiest of all Raspberries. Black Raspberries are naturally hardier than the red varieties, and require practically no winter protection through the Midwest. In the North a protected place or a mulch of straw over winter can be recommended. Cumberland is a most reliable and abundant bearer, with large, black, very firm berries. Good for market as well as for the home garden.

More and Better Berries will be had if the soil along your berry rows is cultivated in early spring, after frost is out of the soil, and the soil can be worked. When soil is quite poor, and needs fertilizing, use poultry litter or well rotted barn manure. Apply it in late fall, but not to be in contact with the canes. Raspberries do well on most any soil. Blackberries like low ground, or plenty of moisture. For fruit, quick and in big quantity and fine quality, plant more of our berries.

Eldorado Blackberry

Currants

2-year extra choice plants

50c each;

3 for \$1.35

Postpaid to your door.

Perfection This is the largest of the red Currants and bears remarkably well. Berries bright red, not very sour, and with few seeds. For canning and jelly, Perfection has practically everything you could wish for in a good hardy Currant. For years it was the most widely planted variety, and still is the first choice of every planter who has grown it before. Hardy throughout the Midwest.

Red Lake This is a newer variety. Berries quite large, light red, with few seeds and very pleasing flavor. While Red Lake cannot surpass the productivity of Perfection, it is a little juicier, and is therefore preferred for fruit juices. It is also claimed that Red Lake is almost rust resistant. For home use, we suggest that both varieties be planted.

Perfection Currants

Thornless Gardenia Dewberry

A new dewberry with all the fine qualities of the Dewberry but without the thorns, therefore much easier to harvest. 3 for 50c; 10 for \$1.50; postpaid.

Youngberry The plant is a vigorous grower, and a heavy bearer; it is hardy in the Middle West. The berries are as large as Loganberries, purplish-black; in quality they resemble Raspberries. Nice plants, 3 for 50c; 10 for \$1.35; 35 for \$2.95; postpaid.

Blueberries The two Hybrids we are listing below, after extensive tests, can be highly recommended. They produce large clusters of plump, tender, practically seedless berries, the size of Concord Grapes, and unexcelled in flavor. Growing to a height of 4 to 5 feet with a clean, healthy foliage, they are highly desirable additions to any garden. For best results, the soil-conditions should be rich in humus, such as leaf-mold, to which small quantities of pine-needles or Peat Moss should be added to create the slightly acid condition of the soil, required for Blueberries. Continued watering through the summer is also advisable.

RANCOCAS. Early, a very heavy producer, bush uniformly round, and quite decorative.

JERSEY. Late. Excellent quality. Bush grows a little more open and spreading than Rancocas.

PRICE: Nice 12 to 18-inch plants, \$1.70 each; 2 for \$3.20; 2 of each variety, 4 plants in all, \$6.00; postpaid.

Juneberry or Service Berry

A good substitute for the large Swamp Huckleberry or Whortleberry, which it resembles in appearance and quality. Fruit comes in clusters, reddish-purple in color, changing to bluish-black when fully ripe. Flavor a mild, rich sub-acid; excellent as a dessert fruit or canned. It is extremely hardy, not thorny, grows bushy to a height of 7 or 8 feet. Juneberry makes no fibrous roots; it is not a fast grower, but lasts for many years. I would call Juneberry a desirable combination flowering and fruit plant. 55c each; 3 for \$1.35; postpaid.

such as leaf-mold, to which small quantities of pine-needles or Peat Moss should be

Gooseberry

for quick crops

Oregon Champion A strong growing shrub, not very thorny. The green berries are of medium size, and of the finest quality for pies and canning. For sure bearing and heavy crops, this is the best canner, and outstanding for production and quality. Extra nice, 2-year-old plants, well rooted, 65c each; 3 for \$1.75; postpaid.

Poorman, large, sweet

Extra large fruit, which is sweet, and makes a fine fresh eating berry when fully ripe. At present it is the only large sweet Gooseberry on the market. The shrub is perfectly hardy, likes a slightly shaded place, like all Gooseberries, it is a vigorous grower, and not very thorny. About the third year after planting, apply fertilizer and repeat every two to three years. This is done best late in the fall, by placing some well rotted manure around each bush, but not in direct contact with the wood. In early spring work the ground enough to stir the manure into the soil. This will maintain a strong bearing capacity, and larger berries. \$1.25 each, postpaid.

INSTRUCTIONS With the exception of a few areas, we can ship Currants and Gooseberries everywhere. They like a shaded place, and a spray just before blooming or right after blooming will keep the plants free from worms. The spray to consist of three tablespoonfuls of Arsenate of Lead per gallon of water.

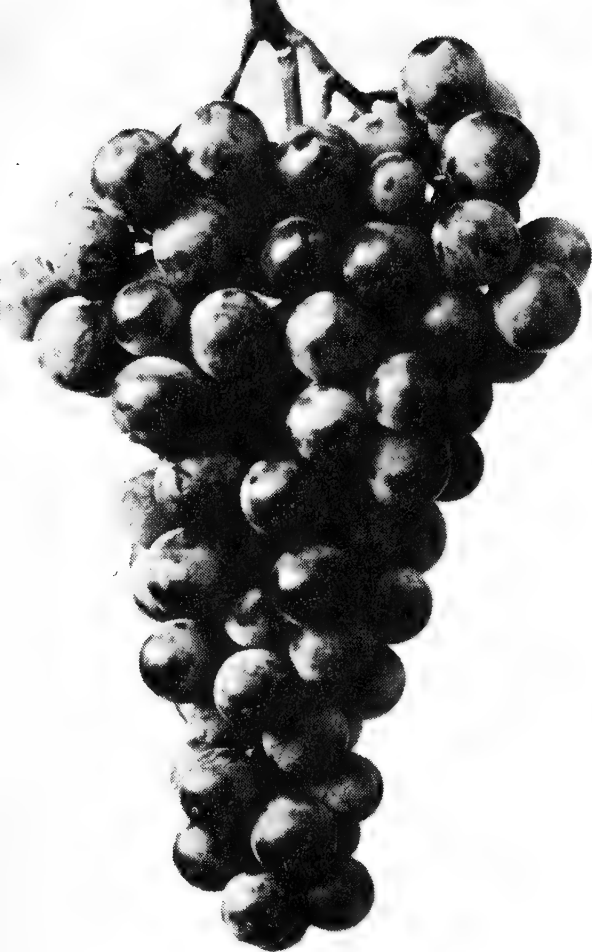

Poorman Gooseberries

Boysenberries

Extra hardy, thorny. Berries 1½ to 2 inches long, about three times the size of regular Blackberries, black, juicy, and of a flavor unexcelled by any other berry. This is a cross between Blackberry, Raspberry and Loganberry, rapidly becoming the best paid berry on the market. Hardy and drought resistant. Produces a vigorous growth, and fruit of finest quality in most any good garden soil. Permit the young growth to lay on the ground where it can be covered in early winter with tomato tops, leaves or straw. In the spring tie the vines up to stakes or a 3-wire fence, for bearing. After picking the berries cut out the vines that have produced the crop. Repeat the same method every year, always leaving the new vines for next year's crop on the ground. The plant is free from insects or disease, and with the culture described above, anyone can have lasting success with Boysenberries. Nice, well rooted plants, 3 for 50c; 10 for \$1.40; 25 for \$3.20; prepaid to you.

Thornless Boysenberry Same as the regular Boysenberries in size, quality of the fruit, growing habits, and is easier to work with, because the plant does not make thorns. Wherever the winter is expected to bring below zero temperatures, the young vines on the ground should have a good mulch, about 6 inches deep, of leaves or straw. This mulch must not be applied too early in the fall. Wait until heavy freezing weather sets in, because Boysenberries are in the habit of becoming dormant very late in the season. Every few years Boysenberries should have some fertilizing. Applying well rotted barn manure around the plants in early spring, and working it in the ground, will bring splendid results. Plant all Boysenberries about 5 ft. apart in the row. Our Thornless Boysenberries, nice well rooted plants, 3 for 70c; 10 for \$2.00; 25 for \$4.25; prepaid to you.

hardy GRAPES

easy to grow

Beta, Black Hardy, rapid grower, for windmill cover and arbor planting. Wherever you plant Beta its sturdy, fast growing, and its perfect hardiness will please you. Beta will make quick shade over tall trellis work, arbors, or will cover windmill construction with its good, healthy, clean foliage. Beta produces enormous quantities of grapes close-set medium size clusters, black in color, highly flavored; one to the very best for very dark colored juice. Make use of all tall structures, fences, etc. Cover them with Beta Grapes for better looks, shade and plenty of fruit. 2-year No. 1 strong grape vines, 40c each; 3 for \$1.00; 10 for \$3.00; prepaid.

Niagara, White Its clusters are large, and handsome, compactly filled with large berries having thin but tough skin. When fully ripe they are pale yellow with white bloom. Slightly pulpy, tender, sweet with a delightful aromatic flavor and agreeable to most tastes. Vine is remarkably vigorous and productive. Ripens with Concord, and hardy as far north as Concord. I have had reports of splendid results in commercial plantings in Florida, and at the same time it is perfectly hardy anywhere in the eastern states and the Middle West. Fine strong plants, 2 years old, No. 1, 40c each; 3 for 90c; 10 for \$3.00; prepaid.

Concord Grape, most popular for jelly and grape juice.

Concord, Black The well known, fine old variety, planted everywhere. Bunches and berries of good size, black, covered with a rich blue bloom. Skin tender but firm, juicy, sweet when fully ripe; very hardy and productive. There are varieties of better quality for table use, but for jelly, grape juice or wine none will equal Concord for heavy production and regular bearing. Can be grown most anywhere, for the Middle West it is the most dependable bearer.

PLANTING INSTRUCTIONS

Our two year old Grape Vines are exceptionally well rooted, and should be planted in large holes to allow ample room for the roots. Spread the roots out and fill in with good top-soil, no fertilizer to be added. Plant so deep that the vines will part at the surface of the soil. Water well to settle the soil properly. Right after planting cut each vine back to 4 eyes per vine.

sure young bearers

Agawam Red Just as hardy as Concord, and it is really the best of the dark red grapes. Bunches usually loose, berries large, with thick, fleshy skin. A juicy, highly aromatic table grape. Ripens with Concord, and needs no winter protection in Nebraska. Years ago this was one of Sonderegger's stable grapes, and we are listing it again this year at the request of many of our customers. No. 1 plants, 2 years old, 40c each; 3 for 98c; 10 for \$3.00; 25 for \$6.95; prepaid.

Caco The grand table grape. A fancy grape of finest quality. Berries extra large, sweet, juicy, with a most pleasing flavor. Coming in well-shaped clusters of light red or amber color it is a most attractive looking fruit. Caco is perfectly hardy everywhere except the extreme North, where it needs a little winter protection. The berries become sweet two weeks before they color up. Caco should be in every garden; it produces well, and there is nothing to take its place for good eating grapes. 2-year-old No. 1 fine plants, 48c each; 3 for \$1.25; 10 for \$3.90; prepaid.

Portland, White Splendid Table Grape. This is my earliest white grape. A fancy variety with its sweet and juicy berries. It is a hardy grape, as hardy as Concord, and is a healthy grower. Berries good sized, sweet, juice and of fine flavor. Portland is also a good producer. Portland and the other fancy varieties I am listing in this column will be the pride of your garden. Nice, strong, 2-year-old No. 1 plants, 48c each; 3 for \$1.25; 10 for \$3.90; prepaid.

2. Just before blooming.
3. Just after the blossoms fall.
4. Two weeks later.
5. When the berries begin to touch in clusters.

BEATRICE, NEBRASKA

Fredonia Grape

Fredonia, Black Fancy table grape. This is the finest early black grape of the hardy class. Fredonia is as hardy as Concord. The berries are of large size, black with blue bloom, and they ripen evenly. Fredonia has a most delicious flavor, rarely found in grapes. I recommend Fredonia, and I suggest that you include a few of them in your planting. My Fredonias are of the true original stock. Extra fine 2-year No. 1 plants, 42c each; 3 for \$1.15; 10 for \$3.50; 25 plants for \$8.00; prepaid.

Golden Muscat An entirely new grape, the finest of all table varieties. Berry light golden yellow with white dots and whitish bloom, large oval shaped, very juicy, tender, aromatic, sweet with a refreshing Muscat flavor. Skin thin, not adhering to flesh, one to two small seeds which separate very easily. This new grape is hardy throughout the East and Middle West, is a wonderful producer, the berry clusters are extra large. The best there is for table use. It is not a good shipper, the berries are too tender to stand packing or shipping. Ripens with Concord. Supply limited. Order early. 98c each, postpaid.

PLANTING INSTRUCTIONS

All the care grapes need in future years consists of pruning. Fast growing grapes should have a light pruning end of June, cutting off the ends of all new growth. Early in the spring, older Grape vines should be pruned, removing the oldest branches, which have already produced a crop, making room for young growth. If Grape vines bleed due to spring pruning, remember, this has no ill effects, and is no cause for alarm.

Strawberry Home Collection

50 Dunlap

50 Premier

50 Giant Gem

All for

\$3.85
Pre-paid

Safe Delivery Guaranteed.

PREMIER—Early, extra sweet; best for home growing.

Premier is a well tested plant, resists leaf diseases, and rot of the berries. It is a vigorous grower, producing strong new plants, and carrying its berries well off the ground, even though they are extra large. Very sweet, and ripening nice and even. For the home garden and home use we know of no better June-bearing strawberry than Premier. Strong, healthy plants, 25 for 80c; 50 for \$1.50; 100 for \$2.65; 300 for \$7.35; prepaid.

Giant Gem, Everbearing

Giant Gem, Everbearing

In our trial patches we have had more berries, more continually, and of better size and quality from Giant Gem than from any other Everbearer we have tried. And from our customers from coast to coast we have received many reports supporting our own experience. When you plant Giant Gem, you will have a good, healthy grower, that will keep up with the very best in production, size and particularly in quality and sweetness. Like all Everbearers, they require water through dry periods in the summer, in order to make a good fall crop. Extra well rooted plants, 25 for \$1.25; 50 plants, \$1.95; 100 plants, \$3.45; postpaid.

Senator Dunlap Midseason. Best known and most widely planted Strawberry for home use, and particularly for the market. It ripens about 8 to 10 days later than Premier, makes a very solid berry, therefore a favorite with the shippers. Always sure to produce an abundant crop, followed by a new stand of runners to insure continuous production year after year. Senator Dunlap is a vigorous grower, heavy producer, and especially hardy. Strong No. 1 plants, 50 for \$1.25; 100 for \$1.90; 300 for \$5.40; 500 for \$8.50; prepaid.

Blakemore As early as the Premier, and a nice producer. We did not list this Strawberry for a number of years, but can supply it this spring, after having received many requests from our customers to supply Blakemore. Our plants of this variety, as well as of all Strawberries we list, are young plants, but exceptionally heavy rooted, ready to grow and produce record crops in a minimum of time. You really have to try our berry plants to appreciate their stronger system and greater vitality. 50 plants for \$1.40; 100 for \$2.50; 300 for \$6.90; prepaid.

Right

Too Deep

Too Shallow

PLANTING INSTRUCTIONS

Note the picture and plant your strawberries accordingly. The roots well spread out, and being moist enough, watering settles the soil. Plant in rows, the rows in large plantings 2½ feet apart, in small planting 12 to 16 inches apart, and space the plants in the rows 12 inches apart. This leaves enough room for runners between the rows, and from the runners you get large crops year after year once your bed is started.

Hardy HERBS

The following are the most frequently needed herbs. They are hardy, stay in your garden for many years, and continue to supply your kitchen for a long time, beginning the first year.

Sage The best hardy kind for seasoning. This is the true Holt's Mammoth Sage, furnishing large quantities of leaves which are dried, and used for their aromatic value. Per plant, 35c, postpaid.

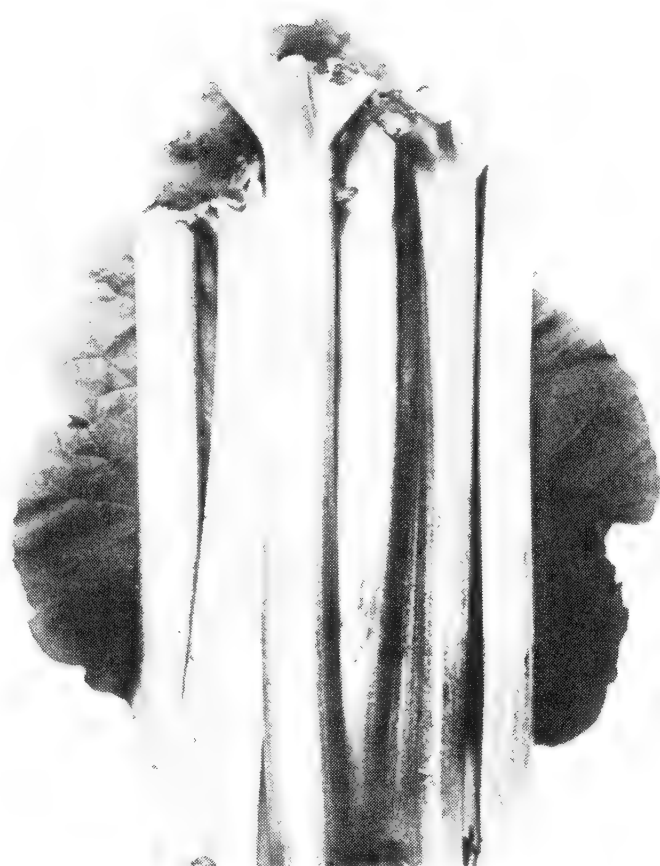

Chives A plant of the onion family, producing very thin tops, which are cut and used for seasoning in green form, like Parsley. Per bundle, 30c; 3 for 75c; postpaid.

Peppermint A very useful hardy herb, highly aromatic. Per plant, 25c, postpaid.

Horseradish Selected crowns for planting. The best all-white variety. Strong crowns for a good crop the first year. 3 for 70c; 10 for \$2.20; prepaid.

RHUBARB (Pie Plant)

Giant-Stalk Victoria For years this has been the heaviest producing Rhubarb for the home-garden. Producing heavy, thick stalks, 14-inch average length, in two heavy bearing seasons, spring and fall. Quality of this Rhubarb is better than any of the older sorts. Victoria Rhubarb should be planted on moist ground, preferably in the shade, where it is not so apt to make seed stalks. Our heavy roots will produce a good crop the first year already. Heavy roots, 3 for 55c; 6 for 95c; 12 for \$1.75; prepaid.

New Seedless Rhubarb

Chipman's Canada Red - Sweet. Stalks almost as large and heavy as those of the Giant Victoria. Red from bottom to top, pink-meated, sweet, cooking up to the finest dessert and pie-filling that can be put on the table, and fit for a king. The heavy roots we furnish, will begin to supply you with its fine product the first year, and will continue in your garden for many years. We are pricing these roots so that everybody can afford to plant this spring. 59c each; 3 for \$1.55; postpaid.

New Paradise ASPARAGUS

A great improvement over all former varieties. Rust-proof, bears larger, thicker tips of finer quality than anything that has ever been produced in Asparagus. Plant more of this permanent hardy vegetable. Take advantage of these new low price rates for strictly first class young plants which are sure to start.

10 for 70c; 25 for \$1.25; 100 for \$4.40; postpaid.

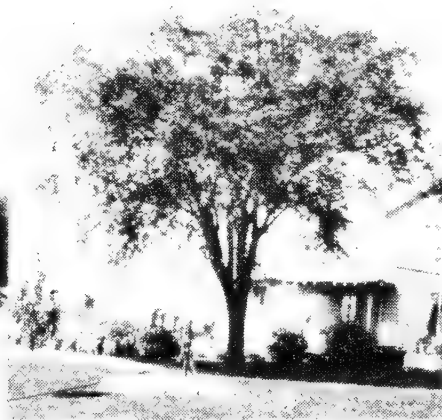

How to Grow Asparagus

Manure the ground heavily, using well rotted barn manure. Make a trench 8 to 10 inches deep. Have 4 inches of good rich ground on the bottom, spread the roots out evenly and fill in about 3 to 4 inches of soil. Leave the rest of the trench lay open for the first summer. Let all stalks grow the first year. Fill the trench up in the fall of the first year. Let several stalks grow on each plant the second year. In the third year allow one stalk per plant to grow up, cut all others as soon as they appear above the ground. Cultivate occasionally. Plant 1 ft. apart in the row, the rows 3 ft. apart.

Their Better Roots
Perfect Shapes
for Better Results

Beautiful ELMS . . .

Ornamental and

American Elm These pictures, taken in winter and summer, tell more than words of the beauty of a large spreading crown for which the American Elm has long been known. One can hardly imagine anything lovelier than the lofty crown of the Elm, there is beauty, shade and rest. This tree came west with the early pioneer, it stayed, it suffered under drought and extreme cold, and it survived. It still ranks first in number and general favor amongst the tree population.

American Elm

Moline Elm Note the tall growing habit of this tree, spreading slightly more than Poplars, and yet giving good shade due to its leaves which are larger than those of the American Elm. Near tall buildings, or wherever you wish a rapid upright grower, Moline Elm is just the right thing. Perfectly hardy. Straight, well rooted trees, 5 to 6 ft. height, \$2.40 each; pair, \$4.00. 6 to 8 ft. trees, \$3.00 each; pair, \$5.40.

Chinese Elm A tree of nice shape, extremely rapid growth, fitting in wherever you need a shade tree, and need it quick. This is the hardy strain, true Ulmus

Pumilla. It has been grown in the Midwest for better than 30 years, but not until the severe drought of 1933 to 1937 did it come to the foreground. It stood the drought better than any other hardy tree. The seedling grades are always a favorite in windbreak plantings, and our strong, well rooted transplanted trees will make you shade trees in record time, wherever you plant them. See prices below.

Shade TREES

Most Complete
Assortment of Hardy
Shade Trees

Pages 28 to 37

Soft or Silver Maple *Acer Saccharinum*. Another hardy native upland tree, almost as popular in the Midwest as the American Elm. It is a rapid grower, and by planting our Soft Maples you will get husky, well-shaped trees of which you will be proud at all times. Do not mistake the Silver Maple for a white-leaved tree, as the foliage of the Silver Maple is light green above and of greenish-gray color underneath, deeply cut. The trees with the leaves of silvery white underneath are Poplars (*Belleana* and Silver Poplars). Prices of our Soft Maples are for strictly first class trees. 5 to 6 ft. trees, \$1.35 each; pair, \$2.40.

Maple, Sugar or Hard Maple

Acer Saccharum makes a large pyramidal tree with large, handsome foliage of rich, pleasing green, turning red in the fall. Very hardy, although it is not a rapid growing tree for the Middle West. It is a long lived tree. Nice 5 to 6 ft. trees, each, \$2.75; pair, \$4.90.

Sugar Maple Seedlings For this year we have a small supply of nice 12 to 18 inch seedlings of Sugar Maple, and while this supply lasts we can furnish them at 45c per 3; 10 for 95c, postpaid.

Maple, Norway *Acer Platanoides*. A hardy tree of majestic form, perfect outline of the crown. It is a hardwood tree, leaves very large, deep green, changing to a pretty pale yellow in the fall. I recommend this tree for a hardy, long lived tree of special beauty. 5 to 6-ft. trees, each, \$2.50; pair, \$4.50.

Magnolia *accuminata*. Often called the Cucumber Tree. Considered one of the hardiest of all the Magnolias, succeeding as far north as Central Illinois, Missouri, and Southeastern Nebraska in fairly protected locations. The tree is a very tall grower, with large leaves, and blooming in May and June, color of blossoms is yellow. We are listing this tree in response to a very strong demand by many of our customers who wish to try a hardy type of Magnolias. 4 to 5 ft. trees, straight, not branched, 75c each.

Osage Orange *Toxylon pomiferum*. Used largely for livestock fences, due to its thorny branch system. See hedges, page 41. It is a slow growing tree, reaching medium height, and is sometimes planted as single specimen for its healthy green foliage. It is of very special value for its hard wood. For wood-lot plantings with other trees it will be found very profitable. 12 to 18 inch strong plants, 100 for \$2.50, prepaid.

PLANTING INSTRUCTIONS

Same as for planting fruit trees. The holes must be dug deep and wide enough to allow plenty of room for all the roots, without cramping them. Digging the tree holes a few inches deeper than really necessary permits the filling in of loose soil in the bottom, in which the new rooting will take place quicker and surer. Soil to be used in the bottom, as well as around the roots of the tree, must not contain fresh fertilizer of any kind. Use good ordinary garden soil which has been under some kind of cultivation before.

Soft Maple, ten years old.

Norway Maple

Honey LOCUSTS

Common, Thorny

Gleditsia Triacanthos. A most valuable native tree with spreading branches, forming a large crown of very good and even shape. The leaves are small, coming in sprigs of 18 and more, always free from disease or insects. For a hardwood tree this is perhaps the most rapid grower, and is perfectly hardy everywhere. Has very prominent thorns. This Locust never makes sprouts from the roots. The Honey Locust should be planted more frequently. For easy, quick starting, vigorous growth, and special hardiness that comes only from an upland Nebraska nursery, our trees will please you.

Our Thornless Honey Locust is a fast growing hardwood tree. Hardy, clean and long lived.

Thornless Locust *Gleditsia Triacanthos Inermis*.

For street and lawn planting it is one of the very choicest long-lived hardwood trees. Without pruning it will grow up to a beautiful shade tree, developing a splendid crown. It is a fast grower, second only to the Elms. Due to an unusually deep root system, grass or flowers can be grown with best success even close to this tree; it never makes sprouts or suckers from the roots. Entirely hardy, healthy and clean. Fancy trees, perfect, straight stems, well rooted; the finest on the market.

Russian Mulberry In large plantings of trees, in parks, on school grounds, and other public places, particularly on the playgrounds of the country school, plant a few of these Mulberry trees. They will grow fast, making nice shaped shade trees, perfectly hardy. No other tree will attract as well as protect song-birds so well. You are doing the song-bird population a great favor every time you plant one of these trees. To make it possible, especially for small schools, to get a few of these trees, we are pricing them extra low. 5 to 6 ft. trees, \$1.25 each; 2 for \$2.10. Extra large 6 to 8 ft. size, \$1.95 each; 2 for \$3.50.

Pin Oak in early spring just before the new leaves appear, and after the winter foliage has fallen.

Pin Oak in mid-summer, a truly majestic tree, of beautiful symmetrical growth, without pruning.

Pin Oak in the winter, retaining most of its leaves after they have turned to a showy red-brown in late fall.

Pin Oak Nature's gift of a tree, combining the longevity of a hardwood tree with rapid growth, perfect shape and elegant appearance. We could not name you a finer, prettier tree if you need a fairly tall grower with medium spread. The photos above, taken in the Beatrice Chautauque park of trees 11 years and less old, tell the whole story.

American Linden *Tilia Americana*, Basswood. The tree at right, in the Chautauqua park, 11 years after planting, shows the nice pyramidal crown which this Linden makes without pruning. It is not a fast grower, but takes on attractive ornamental qualities at an early age, and eventually grows to enormous sizes. It blooms in June, very fragrant. Foliage large, shiny green, keeps clean and healthy throughout the growing season. We recommend it for ornament. Where a rapid grower for quick shade is needed, this tree would be slightly disappointing; it will make a large tree, but takes plenty of time to do so. Hardy throughout the East and the Mid-West corn belt. 5 to 6 ft. nice trees, \$2.00 each; pair, \$3.75.

Seedlings of American Linden A nice grade of small Linden. 2 to 3 ft. size, 3 for 75c; 10 for \$2.00; prepaid. The seedlings of shade trees are used by landscapers and nurserymen for their own planting are usually very scarce, and will probably not be offered again for several years.

Please Order Early Skilled help is somewhat short, and so is good stock. We have to start our planting and field work end of March, and if we have your order early we can give it more time and attention, and can be quite sure of filling your order complete.

American Linden

Hardy POPLARS

Volga Poplar Of the column-shaped poplars this is the hardiest variety, and can be planted throughout the Mid-West and North where the Bolleana is not entirely hardy. It is a very rapid grower, slightly more spreading than the Bolleana. Leaves entirely green. For a tall screen planting these trees can be planted as close as 8 feet apart. Should not be planted less than 18 or 20 feet from the house, because of its rather shallow root system. Our trees are selected for nice straight stems.

Poplar, Bolleana Grows to a spire of 80 feet in height. Leaves shining dark green with silvery white underneath. Hardy as far north as Nebraska. Does not make root-sprouts. A beautiful tree of striking effect in the landscape. Well grown 4 to 5 ft. nice straight trees, very choice, 95c each; pair, \$1.75. 5 to 6 ft. trees, \$1.40 each; pair, \$2.50.

Cottonwood Populus. Sargentii. The native timber tree. Very common along streams where it holds the soil well and reaches mammoth dimensions, in thickness of its stems as well as the spread of its lofty crown. The Cottonwood withstood the drought and the cold remarkably well.

Prepaid: 25 100 300
18 to 24 inch, nice Seedlings.....\$0.60 \$1.60 \$4.00

The Volga Poplar. Very effective near tall buildings, where its height offsets the sharp outline of the building.

A cool, shady promenade in the Beatrice Chautauqua Park, Hackberries being the source of the shade and beauty of this pretty planting.

Hackberry *Celtis occidentalis*. American Nettle tree. A native tree with numerous slender branches which spread almost horizontally, and thick, rough bark; apple-like foliage, but more pointed and of a bright green color. In habit of growth it resembles an Elm somewhat, but grows slightly more erect. In the North, where the Elms are not doing quite so well, the Hackberry is very satisfactory. A most desirable tree for general street planting, very hardy, and stands our dry weather well. We recommend it anywhere in Kansas, Wyoming, Montana, the Dakotas and Nebraska.

As a single tree, Hackberry makes a fairly tall, and still a spreading crown. A good shade tree wherever you plant it.

The winter scene of the same two rows of Hackberries as shown at left, gives you an idea of the nice natural semi-erect structure of this tree, requiring very little care after planting.

Price of Hackberry

4 to 5 ft. nice trees, \$1.20; 2 for \$2.00; 6 for \$5.00; 10 for \$8.00.

5 to 6 ft. well rooted, healthy tree, \$1.85 each. 2 for \$3.30; 6 for \$9.00; 10 for \$13.20.

6 to 8 ft. nice trees, \$2.55 each; pair, \$4.50; 6 trees, \$12.50; 10 for \$19.00.

If your order for trees (seeds not included) amounts to \$15.00 or more, we pay the freight to your station.

Hackberry Seedlings In most years this stock is not available, but we have a limited supply of nice small trees of Hackberry this year. 12 to 18 inch size, 25 for \$1.20; 100 for \$3.90; postpaid.

American Ash *Fraxinus Americana*. Grows well most anywhere, requires very little attention, and grows a very nice, well shaped crown. Exceptionally hardy and drought resistant. The American Ash belongs to the fast growing hardwood trees. The seedlings are of particular value for timber and wind-break plantings. Ash trees should also be included in all wood-lot plantings. Extra choice, well rooted trees:

	4-5 ft.	5-6 ft.	6-8 ft.	8-10 ft.
Each	\$0.65	\$0.85	\$1.20	\$1.75
Pair	1.15	1.50	2.00	3.00
6 trees	3.00	4.10	5.20	8.00
10 trees	4.50	6.40	8.00	12.00

Russian Olive *Eleagnus Angustifolia*. An extremely hardy tree of medium size and spreading top if the lower limbs are removed. Or it will grow to dense shape almost from the ground up if the tree is not pruned. Shiny black bark, and small to medium sized silvery white leaves. The small yellow blossoms in the spring are quite fragrant. Can also be used in tall hedges and screens, planted 3 to 6 feet apart in the row. For this purpose use the seedlings. For a small lawn tree of special beauty, in parks or in groups of evergreens. Russian Olive is a very valuable tree. Nice well rooted 4 to 5 ft. trees, \$1.00 each; pair, \$1.75. 5 to 6 ft. trees, \$1.35 each; pair, \$2.40.

Russian Olive Seedlings For planting of hedges with 2 to 4 ft. ultimate height, use the small grade, and space the plants 6 to 8 inches apart in the row. For tall hedges, screens and windbreaks we recommend the 12 to 18 inch size.

American Plane tree, winter picture. Note the even and pretty outline of the crown. Summer view is a sample of the splendid appearance of the American Plane tree.

Most photos of ornamental trees shown in this book were taken in the Beatrice Chautauqua Park. Our city can justly be proud of this beautiful park; visitors are always welcome there, and find very good accommodations for a picnic or other outdoor activities. No cost to anyone.

When you select a shade tree, it must fulfill all your requirements. For this reason we try to show you unretouched snapshots of as many hardy trees as possible. We describe each tree to you just as we know it to grow, and in some instances we show you a winter picture to give you a better idea of how a tree branches out.

American Plane Tree

Sycamore. *Platanus occidentalis*. Also called Button-wood. A rapid growing tree, of noble, upright growing habit and large deep green leaves. Its beauty of shape and foliage is further increased by the smooth bark of this tree, light colored and mottled green. A free grower, and very desirable for park and street planting. Claimed to be one of the best trees for large cities where it stands the gasses and smoke of nearby factory areas better than any other tree. The tree is hardy here and anywhere through Kansas, Iowa, Illinois and the East, but not hardy in northern Nebraska and from there north. Nice trees, easy to start, 5 to 6 ft., \$2.00 each; pair, \$3.65.

Seedlings of American Plane Tree

2 to 3 ft. nice small trees of this variety, 3 for 55c; 10 for \$1.50; prepaid. Supply limited; order early.

Caragana, Siberian Pea Tree

An extremely hardy dwarf tree or shrub, originally from Siberia. The branches have small, sharp thorns. In the spring it bears pretty yellow blossoms in long clusters, similar to peas. It will grow anywhere and is perfectly hardy, even in Canada. We recommend it particularly for tall screens or hedges, as its habit of growth is upright, and stands shearing very well.

It is ornamental, due to its pretty foliage and blossoms, as well as protective because of its fine thorns. For hedge or screen, plant 18 inches to 3 feet apart in the row, using the small size trees. 12 to 18-inch, 10 for 95c; 25 for \$2.00; 100 for \$7.00; prepaid.

Chinese Chestnut

Grows to a small tree, with very decorative foliage. Blight resistant, and produces the edible Sweet Chestnut of outstanding quality. Hardy as far north as Peaches. Nice 2 ft. size, \$2.35 each; 2 for \$4.25; prepaid.

Black Walnut

A beautiful large tree of rapid growth, especially on bottom land. The nuts, although hard-shelled, are of very good quality. Besides being a very good shade and ornamental tree, the wood of Black Walnut is most valuable.

Price of Black Walnuts Prepaid

	10	25	100
12 to 18-inch, 1 year seedling	\$0.95	\$2.00	\$7.20
18 to 24-inch, 1 year heavy	1.25	2.95	9.80

Butternut, White Walnut

This is another nut-bearing tree that has been almost forgotten in recent years, and yet, its hardwood limbs and branches, and its long life, good healthy foliage, and fairly fast growing habits would make it a desirable tree for ornament and shade. 12 to 18-inch small trees, 3 for 65c, postpaid.

Cutleaf Weeping Birch

Of all pendulous or so-called weeping trees, this Birch and the Niobe Weeping Willow are the two most widely known. This Birch grows tall and slender, yet with vigorous growth. It makes an erect central trunk with silvery white bark, from which the limbs spread out in graceful arches. The leaves, of a beautiful shade of green, are deeply and delicately cut. The whole tree presents a soft, pleasing effect rarely found in other trees.

5-6 ft.

Each\$ 2.95

Pair 5.60

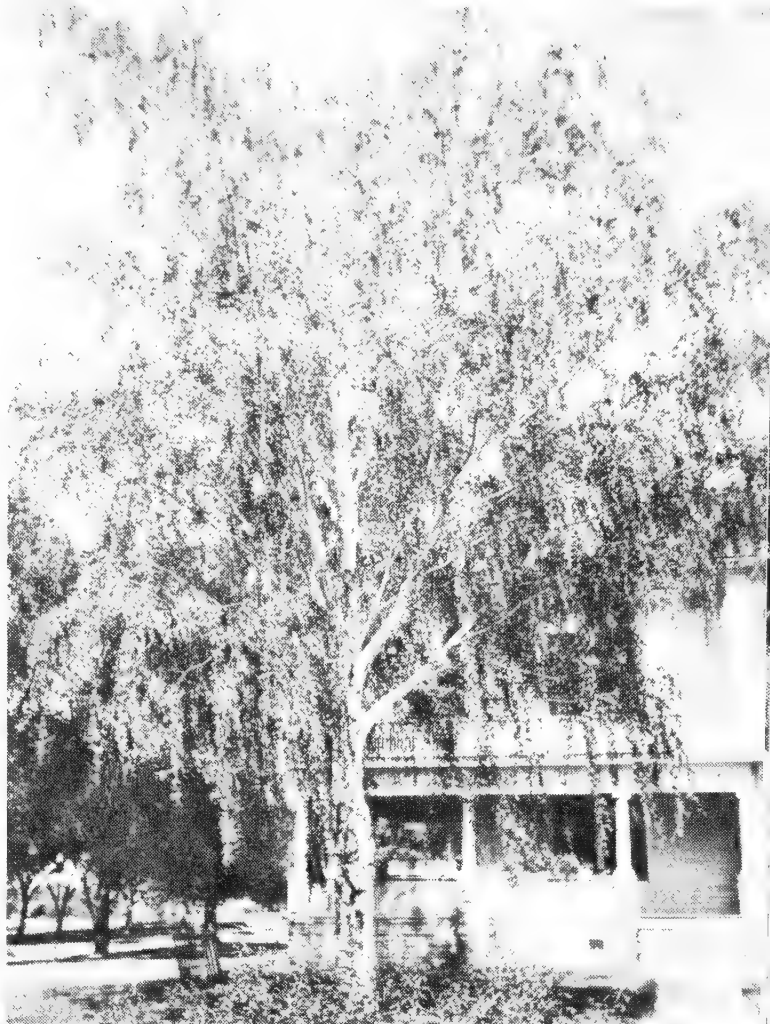

Six trees 15.80

White Birch, European

Betula Alba. A graceful tree of upright growing habits, getting a white bark in later years. This tree is hardy; can be grown successfully in the Dakotas and Minnesota. It is not a fast grower, but considered almost a hardwood tree of long life. 5 to 6-ft. tree, well rooted, well shaped, carefully selected, \$2.20 each; pair, \$4.00; 6 trees for \$11.00.

Niobe Weeping Willow

The hardy weeping Willow with golden-bark twigs. Branches are very slender, long and well drooping, growing to the ground in a short time, or near a pool they reach to the water line. Leaves are very light green. This is a very vigorous grower, given a fairly moist place it will grow faster than most trees, and it is perfectly hardy everywhere. We recommend this tree for the lawn as a single specimen, near the pool, for parks and for cemetery planting. Choice, healthy trees, 4 to 5-ft. size, 95c each; pair, \$1.75; 6 for \$4.95. 5 to 6-ft. trees, \$1.20 each; pair, \$2.15; 6 trees for \$6.00.

The white bark of stem and branches of the Birch always shows up well in groups of shrubs, and particularly in groups of Evergreens. The Birch is a beautiful tree, hardy, and growing to large size.

PRUNING OF SHADE TREES

Softwood trees such as Elms, Soft Maple, Willow, require pruning in order to keep branches from splitting out in heavy storms. Where branches are too close, some of them should be removed entirely; those which appear to be too long should be shortened. All pruning of softwood trees should take place from July to September. Hardwood trees rarely need pruning, only to improve their shape. Prune them at any time it is necessary, but preferably in late fall or early spring.

flowering Trees

. . . of great Beauty

Red Bud Judas Tree. *Cercis canadensis*. A very ornamental native tree of medium size. Leaves are perfectly heart-shaped, free from insects or plant diseases, and hardy as far north as Canada. Early in the spring, before the leaves appear, its branches are covered with small reddish-purple flowers. It produces the first outdoor flowers of the spring throughout the Mid-West. Easy to grow, and should be planted much more freely, on the home grounds or in parks, wherever a nicely shaped tree of medium size can be used. Extra choice trees, 4 to 5-ft. size, \$2.00 each; pair, \$3.65.

SEEDLING RED BUD. 2 to 3-ft. size, 3 for 55c; 10 for \$1.40.

Pussy Willow *Salix caprea*. Also called Goat Willow. Small tree, or rather shrub, of very upright, tall growth. Foliage light green and showy. In early spring, before the leaves appear, the branches are covered with the silky silvery catkins which are so pretty in bouquets. In the house, kept in a vase with water, the Pussy Willow twigs will remain fresh for weeks and retain the nice appearance. Trees of this kind, producing pretty cutting material for early spring bouquets are always the things the entire neighborhood loves and admires. Your home grounds are worth a few additions of such lovely spring bloomers as Pussy Willow, Flowering Crab and Red Bud. 2 to 3-ft. Pussy Willows, nice little trees, 95c each; pair, \$1.70.

Hansen's Purple Leaf Plum *Prunus Cistena*. All through the growing season this is a most showy tree. Its reddish purple leaves showing up splendidly. As a single specimen on the lawn or in groups of tall shrubs with green or yellow foliage, this dwarf tree shows up extra well. Nice 2 to 3-ft. size, \$1.00 each; pair, \$1.85. 3 to 4 ft. trees, \$1.45 each; 2 for \$2.50.

Landscape artists use flowering trees in ever larger numbers. Nothing else creates so much color and in such breath-taking abundance.

Hopa Crab *Hopa* is the word for "beautiful" in the language of the Sioux Indian, and the tree deserves this name very well. It is a striking sight when in bloom owing to its wealth of beautiful deep rose-crimson blossoms, and in the fall when the miniature apples of this tree take on a bright red color, the tree once more becomes very pretty. The fruit can be used for jelly, but usually runs very small in size. You will love this tree on your lawn, or wherever you wish a hardy, medium sized tree of finest blooming qualities. 3 to 4-ft. nice trees, \$1.20 each; pair, \$2.00. 2 to 3-ft. choice trees, 80c each; 2 for \$1.45.

hardy everywhere Collection Flowering Trees

- 1 Hopa Crab, 3-4 ft.

Hopa Crab, producing giant bouquets.

Tulip Tree *Liriodendron tulipifera*. One of the grandest of our native American trees. Of tall pyramidal growing habit, with broad, glossy leaves, and tulip-shaped flowers, similar to Magnolia. A fine tree for Missouri, Oklahoma, New Mexico, Southern Illinois and Indiana, and as far north as Central Kansas, also practically throughout Ohio and the eastern states. 5 to 6-ft. very nice trees, \$2.70 each; pair, \$4.90.

Prunus Triloba A most charming dwarf tree, growing to a globe shaped crown about 15 feet high; ideal for a grand showing on the lawn, or as "center-piece" in shrub groups. Flowers in great profusion, early in the spring, double, light pink; very showy. 3 to 4-ft. very nice trees, \$1.20 each; 2 for \$1.95.

Bechtel's Double Flowering Crab *Pyrus coronaria*. Very hardy, thriving in most any soil. Covered in the spring with large, beautiful double flowers, fragrant, and of very delicate pink color. The tree at blooming time looks like a large tall tree of roses. The only sweet scented double flowering Crab which is completely hardy. Suitable for lawn, or in groups of large shrubs. Nice 2 to 3-ft. trees, \$1.00 each; pair, \$1.80. 4 to 6-ft. extra nice trees, \$1.65 each; pair, \$2.95.

Dolgo Crab For full description of this tree kindly note page 9. It grows to a larger size than Hopa, and blooms most profusely, therefore often used for ornament. Color of blossoms is a soft apple-blossom pink. The fruit of this tree is very valuable, as it is the finest dark red jelly crab in existence. Price of Dolgo Crab, see page 6.

Paul's Double Flowering Scarlet Hawthorn

Oxyantha pauli. A very handsome tree with shiny leaves, dark green and nice shape. Grows to medium size, with even, dense crown. Late in the spring this tree brings forth its compact clusters of blossoms; they consist of many very double flowers of showy scarlet crimson color. This tree is a beautiful sight when in full bloom. Along a walk, on the lawn, or in groups of shrubs, wherever you plant this tree, it will be very attractive. 4 to 5-ft. strong trees, well rooted, \$2.95 each; per pair, \$5.00.

Flowering trees are the crowning glory of spring landscape. Plant them for lasting beauty.

Hardy Ever-

The thousands of Evergreens which we have shipped out in recent years have given excellent results. We ship them direct from the growing fields, fresh, well packed, safe delivery guaranteed.

Pfitzer's Juniper Note picture above. Resists heat and drought anywhere, perfectly hardy. Grows to a pretty vase shape. The ideal low grower for Evergreen foundation plantings and entrance sets. 15 to 18-inch trees, truly fine grade, \$1.65 each; 2 for \$3.15; 5 for \$7.45.

Savin Juniper An Evergreen of spreading habits, with steel-blue to green color. Does not grow as upright as the Pfitzer's Juniper. Where a slightly lower tree is wanted, this hardy strain will please you. 15 to 18-inch TTT, very good grade, \$1.65 each; 2 for \$3.15; 5 for \$7.45.

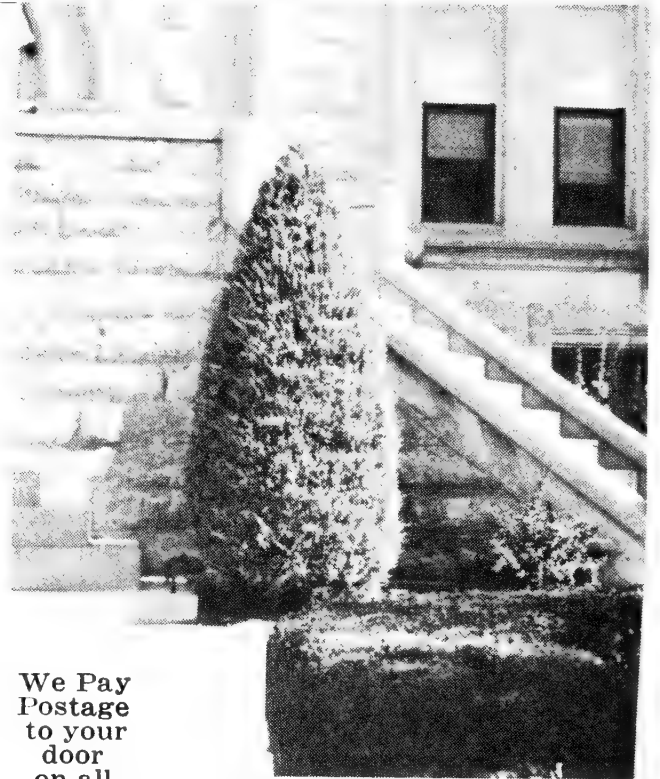

Red Cedar Juniper Can be grown in sheared form, or as a tall growing tree with spreading limbs if it is not sheared. For hardiness, heat and drought resistance, it has no rival. 12 to 18-inch TTT, strong trees, 95c each; 2 trees, \$1.80; 5 for \$4.10.

Scopulorum Juniper. Stands full sun and shearing well.

Scopulorum Silver Juniper

A dense grower of pretty silvery cast; can be grown to any form by shearing. It is perfectly hardy, resists heat and drought. The landscaper's first choice for quick results. 18 to 24 inch trees, \$1.40 each; 2 for \$2.65; 5 for \$6.35.

Colorado Blue Spruce One of the showiest Evergreens, for the lawn, parks. Needles silvery-blue. Pretty shape without later pruning. 15 to 18 inch TTT, \$1.80 each; 2 for \$3.50; 5 for \$8.35.

Black Hills Spruce Extra hardy, very dense, with short dark green shiny needles. Grows to beautiful form without pruning or shearing. Never shear Spruce or Pine: 15 to 18-inch TTT, best grade, \$1.40 each; 2 for \$2.65.

Norway Spruce (picea excelsa). A tall spruce of perfect pyramidal growth, used much for Christmas trees; very hardy. We have a nice grade of seedlings 6 to 10 inches high.

Black Hills Spruce.

Easy to Grow greens

Write within five days if a shipment is not received in first-class condition. This entitles you to free replacements. Order early, so that we can dig and ship your stock before new growth begins in the field.

PINES

We are offering the hardiest known varieties, for easy starting, and rapid progress after planting.

Austrian Pine As single specimen, the prettiest tall growing Pine, extra hardy, a rapid grower. 18 to 24-inch TTT selected trees, \$1.10 each; 2 for \$2.05; 5 for \$4.85.

Bull Pine Pinus Ponderosa. Also known as the Western Yellow Pine. Endures extreme cold and heat, succeeds on light soil and upland. Resembles the Austrian Pine in habit of growth, but has much longer needles. A fine tree for timber, ornament, and especially wind-breaks. 18-24 inch, very choice TTT, \$1.10 each; 2 for \$2.05; 5 for \$4.85.

Jack Pine Pinus Banksiana. One of easiest to start, and fastest growing of the tall-growing pines. Extremely hardy. For windbreaks, and due to its short needles and dark green color planted extensively for Christmas decoration. 12-18 inch transplants listed below.

Scotch Pine Pinus Sylvestris. A tall grower, limbs dense and erect, dark green, needles of medium length. Strong 18-24 inch tree, \$1.10 each; 2 for \$2.05; 5 for \$4.85.

Mugho Pine A beautiful Dwarf Pine, growing without shearing in perfect globe shape. Dark green color. 12 to 18-inch TTT, very choice, \$1.65 each; 2 for \$3.15; 5 for \$7.45.

Douglas Fir A rapid growing tree with dark green needles, very pretty for lawn and park planting. 12 to 18-inch trees TTT, \$1.10 each; 2 for \$2.05; 5 for \$4.85.

EVERGREENS FOR MASS PLANTING. (For windbreaks, hedges, forests, and nursery planting.)

BEATRICE, NEBRASKA

T—Transplanted once in the nursery for better roots.

TT—Twice transplanted.

TTT—Three times transplanted; the best grade.

We pay postage to your door on all Evergreens.

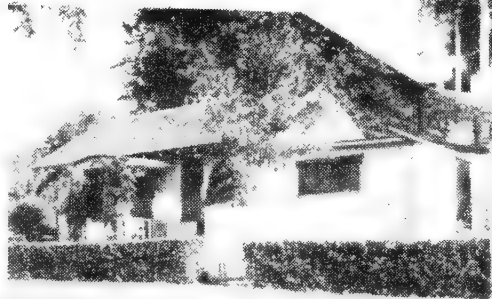

Colorado Blue Spruce

American Arborvitae (Thuja occidentalis) Of upright growth, stands shearing well, and grows quite dense under shearing, therefore often used for evergreen hedges. A rapid grower, perfectly hardy and drouth resistant. For hedges and screens from 4 to 10 ft. high this is the most satisfactory evergreen. Planting distance in the row, depending on the height of hedge wanted, from 10 to 24 inches apart.

Jack Pine, a rapid grower.

Hardy HEDGES

A Mulberry hedge at the home of Mr. Joe Hahn. It has been a very pretty hedge for 10 years, and in that time whenever the hedge became too tall, Joe cut it back and had a fresh, young hedge in record time.

Chinese Elm Due to the rapid growth of the seedlings, and their response to shearing, a quick hedge can be grown from 12 to 18-inch Chinese Elm seedlings, see page 28. Particularly for hedging on the larger lawns of farm properties. Plant 6 or 8 inches apart in the row, cut the seedlings back to 6 inches from the ground right after planting to encourage a low branch system. Shear the new growth once or twice through the summer, and cut the hedge back every spring, allowing only 4 to 6 inches of growth to remain on the hedge from one year to the next.

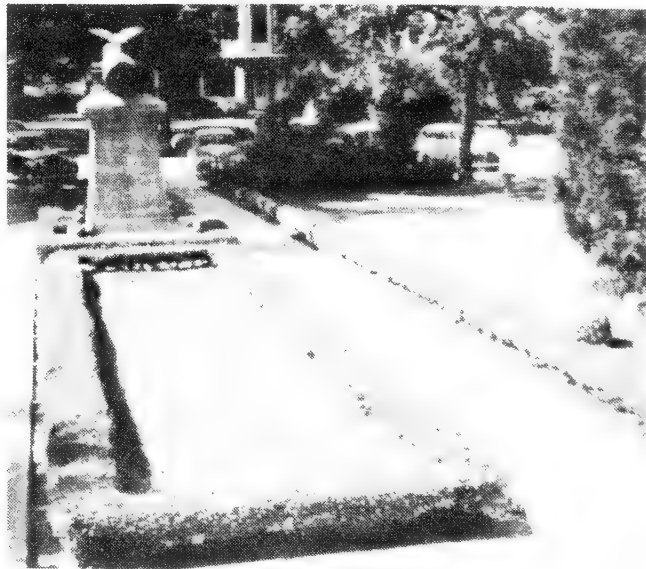

Amur River Privet Amongst all sheared hedges, Amur River Privet stands far out in the lead. Its extreme hardiness is only one of the advantages Amur River Privet offers; a clean, healthy, shining green foliage, a dense growth that responds wonderfully to shearing are also found in this Privet. I recommend planting either in a single row 6 to 8 inches apart, or in a double row for a very broad hedge, the rows 8 to 10 inches apart, the plants in the rows 8 inches apart, and standing alternately. Right after planting cut them back to within a few inches from the ground to make the hedge bush out low. Shear twice during the summer to even up the new growth. I have well rooted plants, the best for hedges.

Postpaid:	10	25	100
12-18 inch nice plants....	\$1.55	\$3.45	\$11.00
18-24 inch heavy plants..	2.00	4.50	15.90

Russian Mulberry Plant- ed and sheared from the beginning like the Privet or Chinese Elm, the Russian Mulberry makes a very pretty sheared hedge. The spacing of the plants for a hedge of not over 4 feet high should be about 8 inches apart in the row. And for a very wide hedge two rows can be planted, the rows 10 inches apart, the plants in each row 10 inches apart, and arranged alternately. This is a stout, hardy hedge, responding well to shearing, by branching very freely and becoming dense.

Prepaid:	25	100	300
12-18 inch plants	\$1.10	\$3.90	\$9.90

Barberry, Thunbergi Will make a pretty hedge up to 18 to 24 inches in height. Keeping its neat shining green foliage throughout the summer in perfect condition, changing to a showy red in fall. Densely branched, can be grown in sheared form or without shearing in natural shape. For shearing plant 8 inches apart, for natural growth 12 inches apart in the row. 12-inch hedging size, 10 for \$1.75; 25 for \$3.65; 100 for \$13.50; prepaid.

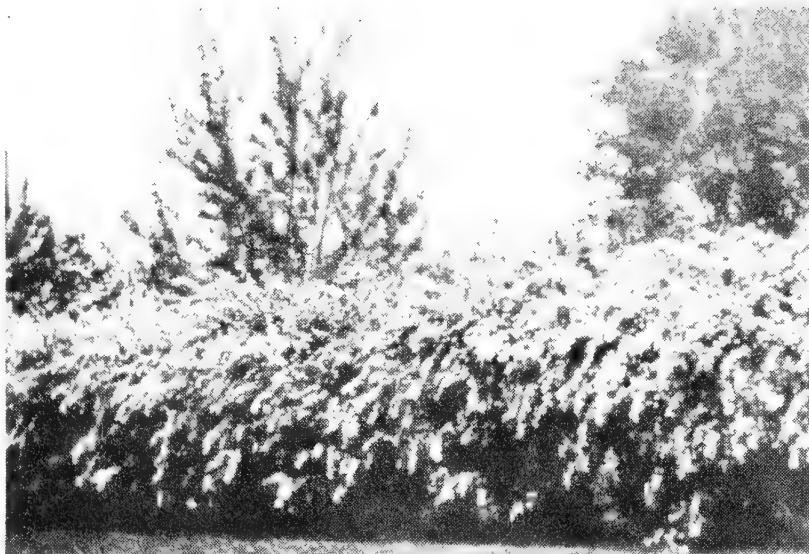

For low enclosures the Barberry is one of the best, but Privets can also be kept to 18-inch height, as this photo shows.

Planting and Care of Hedges Simplest method of planting is in a trench 10 to 12 inches deep, and the width of a garden-spade is usually just right. Set the plants in about 1-inch deeper than grown before in the nursery, and before completely filling the trench with soil, apply plenty of water. Finish filling when the water is soaked away, which still makes it possible to put all plants in line. Shear the tops down to about 4 inches from the ground, right after planting. This produces a low, dense growth. Shear the new growth in midsummer to any height. Shear again early the following spring to 8 or 10 inches from the ground. Summer shearing is to shape up the new growth to even height and sides. Spring shearing builds the hedge up gradually, and produces the dense growth needed for good appearance. Flowering hedges need not be sheared.

Flowering... HEDGE

Bush Honeysuckle

Grandiflora Bush Honeysuckle makes a pretty, very dense screen 8 to 10 feet tall. Plant them 18 to 24 inches apart in the row. Blooms pink in May, later followed by red berries. Extremely hardy, always a fine, clean shrub, healthy foliage, and an upright grower. Can be sheared to even height. 12-18 inch nice plants, 10 for \$3.25; 25 for \$7.80; postpaid.

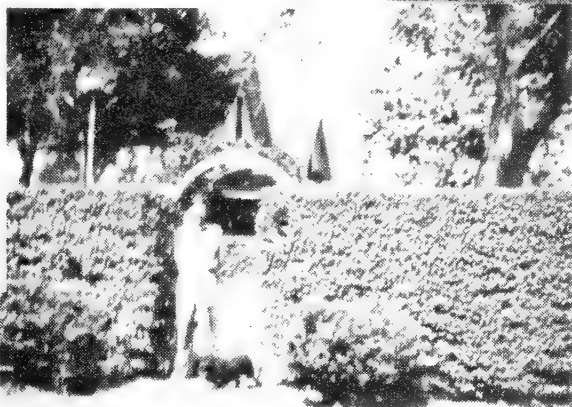

Spirea Hedge in Bloom.

Spirea Van Houtti There is no other flowering hedge of this height (4 to 5 ft.) that would be so hardy, and require so little care as the Spirea Van Houtti. Blooms beautifully in June. 12 to 18-inch nice plants, 10 for \$1.85; 25 for \$3.95; prepaid.

Persian Lilac Makes a most elegant tall hedge, will not make sprouts from the roots, keeps a healthy foliage throughout summer and fall, and blooms beautifully at "Lilac-Time." For a fine, dense screen-enclosure, plant Lilacs. Nice hedging size, 12-18 inch plants, 10 for \$4.85; 25 for \$11.00; prepaid.

Old Fashioned Lilac The same as above except for its leaves, which are larger, and is preferred where there is no shortage of ground space, as this Lilac sometimes makes a few sprouts from the roots. Blooms beautifully. Special price on hedging size, 12-18 inch plants, 10 for \$4.25; 25 for \$9.90; 100 for \$37.40; postpaid.

This hedge of Persian Lilac furnishes complete privacy for Grant Randall's outdoor Living Room.

THORNY HEDGES, for Protective Enclosures

Russian Olive—Silver Leaf

Silvery-gray foliage and twigs, which makes a hedge of these plants very attractive. Plant 8 inches apart in the row, and shear the plants right after planting to 3 inches from the ground to make them bush out low. Will make a nice 4 ft. hedge, or for a tall screen plant 12 inches apart. Shear during the summer once or twice to even up the new growth, and cut the hedge back every spring, allowing only 4 inches of previous year's growth to remain on the hedge. My plants have strong roots, short tops, special hedge-grade. Prices, see page 33.

Osage Orange The most popular hedge for field and stock enclosures. Best for post growing. Osage Orange is coming back; in recent years it has been proven that these hedges protect fields from hot and dry wind, and catch the snow in the winter. It improves farm ground. 12 to 18-inch seedlings, 100 for \$2.50; 300 for \$6.00; prepaid.

Caragana, Siberian Pea Tree

Extremely hardy, makes a pretty screen, very upright in growth, blooming yellow in May. Has a pretty foliage. For enclosure of your garden, as well as for stopping the wind, this plant is very satisfactory. Prices, see page 34.

ALTHEA

Rose of Sharon

Hardy in the North with protection of straw-mulch. Fine upright growing shrubs (6 ft.), blooming beautifully through late summer and fall.

Barberry Thun-

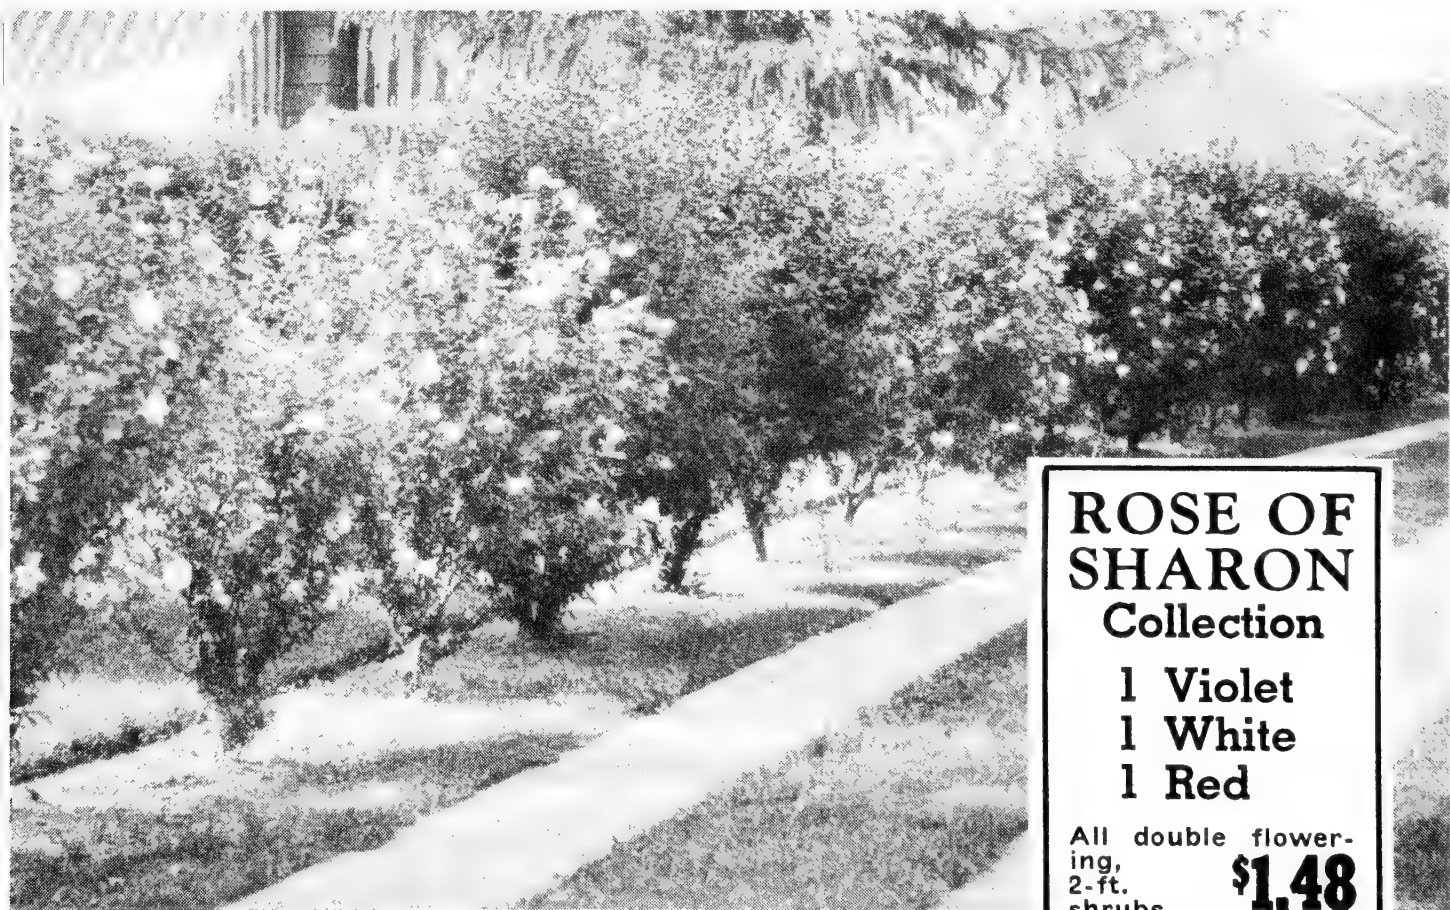

bergi The green-
leafed type,
used exclusively for
low hedges. See page
40, for description and
prices. All our Bar-
berries are free from
rust and any other
disease.

Choke Cherry

(Prunus Denissa).
Grows to a large size,
and can be grown in
bush or tree form.
Blooms early in the
spring in dense ra-
cemes of white flow-
ers, a beautiful sight
when in full bloom.
The cherry that ap-
pears later in the sea-
son is purple black,
sometimes used for
canning. Hardy every-
where. 2 to 3 ft. nice
shrubs, 52c each; 3 for
\$1.45; prepaid.

Red Leaf Barberry (Atropurpurea)

Of the same
type and
strain as the Barberry Thunbergi, also growing to a height of
2 to 3 feet. However, the foliage of this barberry is of a bronzy-
red color throughout the entire summer, coloring up to a fiery
red in the fall. In a sunny or partly sunny place the color
develops best, in full shade it remains almost green. Can also
be sheared to forms, in landscape work it is used very gener-
ally for color effect. Extra strong well branched shrubs, 79c
each; 3 for \$2.15. 12 to 15 inch hedging size, 10 for \$2.75; 25 for
\$6.25; postpaid.

The upright growth, nice foliage, and the three showy colors
of Altheas mixed in the row. A pretty sight.

PRE-PAID

BUTTERFLY BUSH

THE 3 FINEST TYPES. Begin to bloom in July, and continue throughout the summer and fall. Roots are perfectly hardy, making a complete new blooming size growth every year.

Ile de France Butterfly Bush Grows to a height of 4 to 5 feet. The large flower spikes of lilac-purple appear in great abundance through summer and fall. Highly decorative in the garden or in bouquets. Strong blooming size roots, 55c each, prepaid.

Pink Charming Butterfly Bush A most beautiful new variety of distinctly pink to lavender shaded blossoms, otherwise, in height and freedom of bloom, same as the above. 69c each, prepaid.

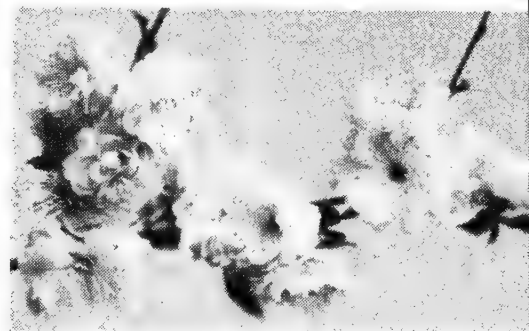

Red Dubonnet Butterfly Bush A new dark wine-red dubonnet colored type, with firm large spikes and large individual florets. Does not sunburn easily and blooms well from June until late fall. 65c each, prepaid.

Double Flowering ALMOND

Rose-Tree of China

Double Pink (*Prunus Amygdalus*). Will form a well shaped bush 4 to 5 ft. high, with erect main canes and bushy branches. In April when the double rose-shaped blossoms cover the slender branches of the bush it is truly a gorgeous sight. Hardy as far north as southern half of Nebraska and Iowa.

Nice shrubs, 2 ft. size, 90c each; 3 for \$2.50; prepaid.

Beautifully shaped, well arranged on the twigs, the flowers of the double flowering Almond rank amongst the finest of early spring.

Hydrangea Paniculata Grandiflora

Honeysuckle Grandiflora Rosea.

Hydrangea Paniculata

Grandiflora, commonly called P. G. Hydrangea. Grows 4 to 5 ft. tall, and produces a wealth of immense heart-shaped flowers. When the blossoms first open in August they are white, turning to a pink and bronze color later, and remain on the bush throughout the late summer in that color. Very hardy, and a sure bloomer. 12 to 18-inch, 59c each; 3 for \$1.55. 2 to 3-ft. shrubs, 98c each; 3 for \$2.75.

Hydrangea, American Everblooming

Also known as Snowball Hydrangea, Hills of Snow, and H. arborescens. Grows to a height of 5 feet. Flowers of dazzling white begin to appear in June, and under normal conditions this Hydrangea will bloom repeatedly during the summer and early fall. Hardy, responds extra well to frequent watering through dry seasons. 12 to 18-inch, 65c each; 3 for \$1.75. 2 to 3-ft. heavy shrub, \$1.10 each; 3 for \$2.95.

Bush Honeysuckle Grandiflora Rosea

The most popular of the Bush Honeysuckles. A very fine type which will grow to a height of 10 to 12 feet, with upright, somewhat spreading branches and a healthy, bright green foliage. The flowers are borne freely in May and June; they are of bright pink color, followed by showy red berries, which ripen in mid-summer and cling to the bush for a number of weeks. This fine bush is of great value for a tall hedge, a screen on the lot line, or as background to groups of smaller shrubs. It can be sheared to any desired form. Shearing of shrubs such as this should be done right after blooming. Will withstand the severest winters, even in the extreme North. 12 to 18-inch nice plants, 50c each; 10 for \$3.25; 25 for \$7.80. 2 to 3-ft. extra select shrubs, 80c each; 3 for \$2.20; prepaid.

CLIMBING HONEYSUCKLES — See pages 50-51.

Bush Honeysuckle Red Tartarian

In habit of growth, height and adaptability, much like the Pink Grandiflora Honeysuckle, the blossoms appearing in showy abundance through late May and June. In general landscape work it is to be regretted that the Bush Honeysuckles have received so little attention in recent years. We have so many requests for nice appearing shrubs of fairly tall growth, and for quick results, that we must point out the many desirable qualities of the Bush Honeysuckles. They will fill your needs in a most satisfactory way. Prices same as of Grandiflora Rosea above.

New Blue Hydrangea

Flower heads are large, and appear from mid-summer until fall in generous numbers. Likes a shady place, and in Nebraska, and from here north it should have a heavy mulch for winter protection. It cannot stand lower than zero without protection. In soil which contains a slight amount of alkali the flowers are pink, but as soon as the soil is acidized in any way, the blossoms will be pretty sky-blue. Adding about one tablespoonful of Aluminum Sulphate (from the drug store) to the soil at planting time, will produce the nice blue color. Any soil in a shady location, with plenty of moisture, and leaf-mold in the soil to contain natural acid, will produce the blue color without further aid. 2-year-old nice shrubs, the strongest on the market this year, \$1.48 each.

Our Snowballs bloom young.

Snowball

This is the old fashioned variety, which is perfectly hardy, developing into a large shrub 10 to 12 feet in height, and blooming most profusely. Of all the later introductions of Snowballs, none has ever come up to this strain in either hardiness, freedom of bloom, or perfect shape of blossoms. It prefers a moist and shady, or partly shaded place. As a single specimen on the lawn, as well as in the background of shrub groups, or against the wall, this is one of the most loved and admired shrubs. 12 to 18-inch plants, 65c each; 3 for \$1.75. 2 to 3-ft., extra heavy, 95c each; 3 for \$2.65; postpaid.

Mock Orange Virginalis

Reaches a height of 5 to 6 feet and its first flowers appearing in May range from semi-double to double. In normal years this shrub blooms again in late summer, at that time the blossoms are single. Of compact but erect growth, very valuable. Blossoms are white, in clusters, and are fragrant. 2 to 3-ft. heavy shrubs, 95c each; 3 for \$2.65.

Blossoms of
Mock Orange
Virginalis

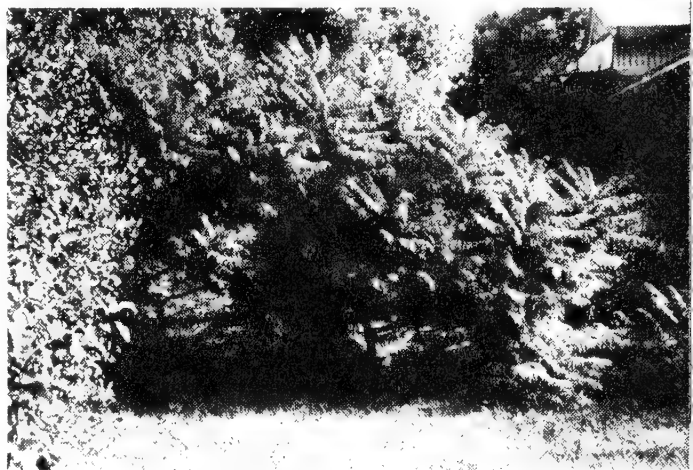

Flowering Quince

Firebush, Cydonia Japonica. Very early in the spring before the leaves appear this shrub produces a wealth of flowers. Deep flame-red cup-shaped flowers all along the wood of this shrub are a beautiful sight. Blooming time April and May, later followed by small yellow fruit. The latter is of no market value. This shrub grows to a height of 4 to 5 feet, spreads out nicely to form a good bush. It is perfectly hardy, and does well in the sun. 2-ft. blooming size shrubs, 62c each; 3 for \$1.70.

Fern-Leaf Sumac

Staghorn Sumac.
(Rhus typhina.)

The Sumac with the prettiest foliage known amongst hardy shrubs, rivaling the most delicate ferns. The individual twigs are about 12 inches long, on which the fern-like leaves are beautifully arranged. Throughout the summer it is a most admired foliage shrub and with the first frosts of fall the light green of this bush changes to all shades of yellow, brown and red. The shrub is perfectly hardy anywhere: it is a strong healthy grower, always free from insects and other pests. Choice 2-ft. shrubs, 65c each, prepaid.

Fernleaf Sumac, fine foliage shrub.

Like a florist's spray, a branch of Weigela Rosea.

Weigela Rosea Grows to a height of 5 feet, with its gracefully arching branches covering a diameter of 4 to 5 feet. Blossoms rose pink, appearing on each branch in almost artistic bouquet form during June, and usually again late in the summer. A fine shrub for the garden and cut flowers. 2 ft. blooming size, extra heavy, 55c each; 3 for \$1.50; postpaid.

Weigela Eva Rathke Much like the Rosea, except that the blossoms of slim trumpet shapes are of showy crimson color, and usually has two blooming periods, June and late summer. Very pretty; should be in every garden. Weigelas in bloom are a beautiful sight, and are equally valuable for bouquets. 2 ft. nice shrubs, 70c each; 3 for \$1.95.

Crape Myrtle

This is a hardy strain which can be grown wherever Hybrid Tea Roses succeed, and in the North they require similar winter protection as the roses. This shrub makes a new growth every year, which begins to bloom from July until frost in the fall. It is a beautiful flower, appearing in large heads, well arranged, showy in the garden as a flowering shrub, and equally pretty in bouquets. We have the Crepe Myrtles in Pink, Red and Purple, strong, healthy plants which will be sure to grow, 68c each, postpaid.

Planting and Care of Shrubs

All our shrubs are carefully selected for nice, large root systems. Have the holes dug large enough to give the roots plenty of room, without "cramping" or bending. The holes should be deep enough so that the roots will stand a little deeper than grown in the nursery. Plant the 12 to 18-inch sizes about $\frac{1}{2}$ inch deeper, the 2 to 3 ft. sizes from 1 to 2 inches deeper than grown before. How deep the shrub was in the ground before digging in the nursery can be noticed easily on the ground-line of the canes. Fill in around the roots with good ordinary garden soil. Fertilizer should not be added to this soil, as it would be harmful when in direct contact with the roots. Apply a liberal quantity of water right after planting. This settles and packs the soil properly around the roots. The branches may be pruned back slightly, if desired, but this is not necessary.

When, during periods of dry weather, watering of shrubs or trees becomes necessary, take away a little soil, forming a shallow basin around each shrub or tree. Fill this with water two or three times. When the water has soaked away, level off with dry soil, which acts as mulch.

Shrub - Roses

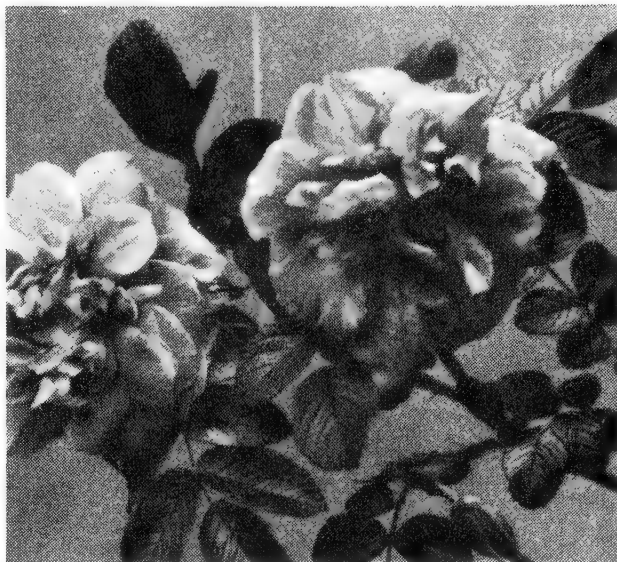

... extra hardy

Hugonis Rose, Chinese Golden

Grows to a large bush, about 7 feet tall, and spreads to the same degree. It is hardy, needs no protection. The sparkling buds begin to swell in April, making a grand picture for two weeks and more, and finally when the buds open in late May and June the entire bush resembles a shimmering mound of gold. Nice 2-year shrubs, 78c each, prepaid.

Hansa, Red Rugosa Rose

Flowers large, of reddish violet color, and double, generally considered red. The bush is hardy, requires no winter protection. Note picture at right. Very nice 2-year old shrubs, 75c each, prepaid.

Austrian Copper Rose

A most beautiful hardy bush-rose, with blossoms of brilliant orange red inside and gold outside. Perfectly hardy anywhere. 85c each, postpaid.

F. J. Grootendorst Rugosa Rose

Another perfectly hardy rose which blooms throughout summer and fall in clusters of crimson red double flowers. Very showy in the garden. Height about 3½ feet; same as Hansa. Strong 2-year old shrubs, 80c each, prepaid.

Hardy Holly

Winterberry. The hardiest of the Ilex family and successful in the Middle West and East. Showy red berries for winter decoration. Shrub eventually reaches a height of 8 to 10 feet. Use plenty of Oak-leaf mold, to which Cottonseedmeal and waste tobacco may be added, also apply plenty of water. In this soil combination the shrub does extra well. Use no commercial fertilizer, not much care required after planting; this shrub wants to be left alone. 18 to 24 inch heavy shrubs, 78c each, postpaid.

Golden Bell Forsythia.

This is the upright growing type (fortuni) which grows to a height of about 5 feet. The shrub is perfectly hardy everywhere, and requires very little care, its wood and foliage is always free from insects and disease. Flowers brilliant golden yellow, borne in great profusion before the leaves come out. In many localities this shrub is almost unknown. We recommend it very highly. It will be one of the most attractive shrubs in your spring garden. Few shrubs will give you so much for so little. Nice 12 to 18-inch plants, 45c each; 3 for \$1.20. 2 to 3-ft. shrubs, extra strong, 70c each; 3 for \$1.90; prepaid.

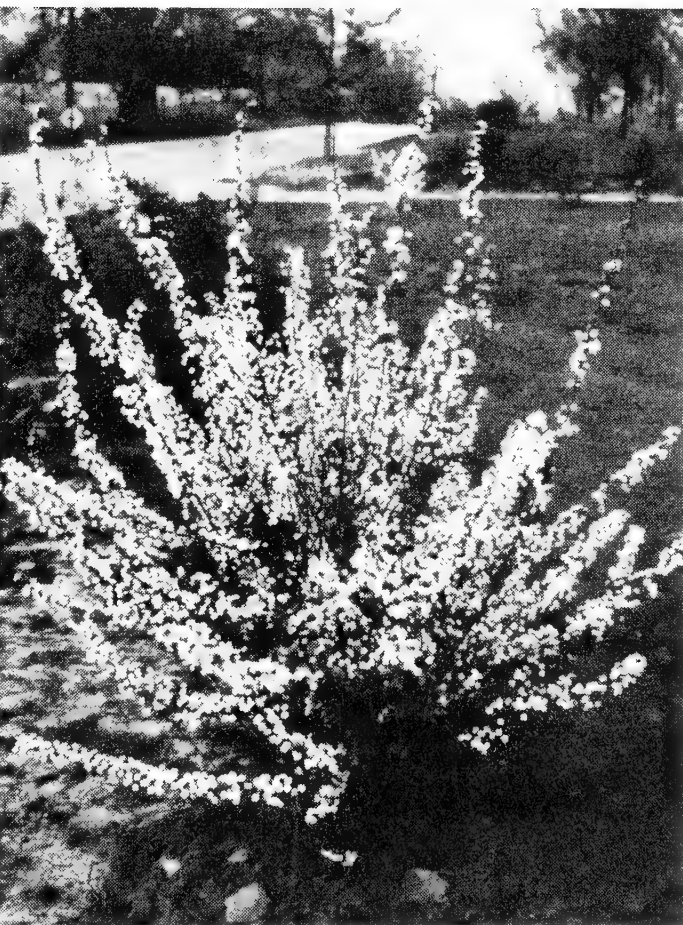

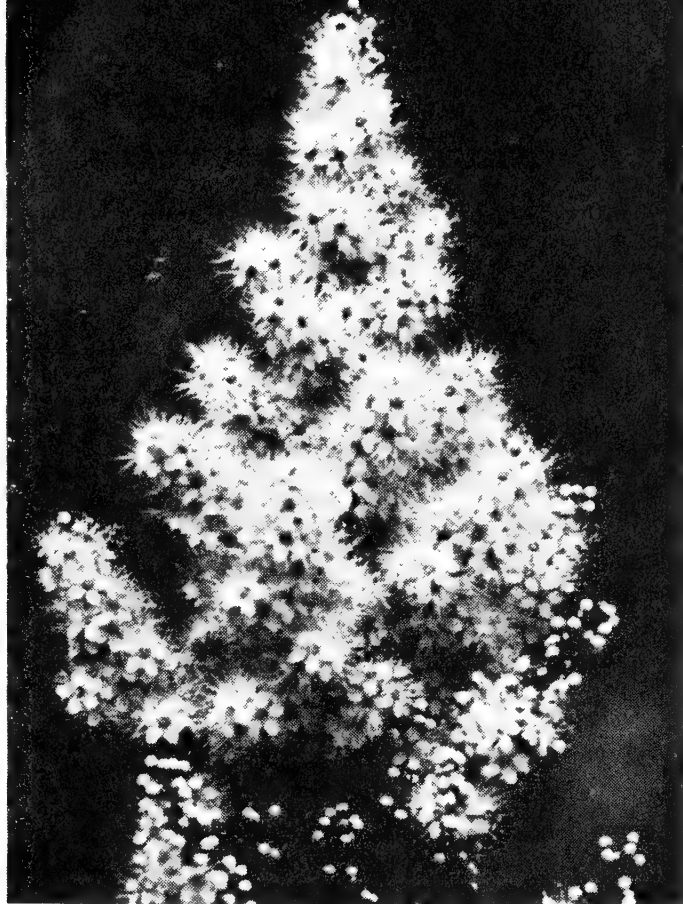

Flowers of the Hansa, Red Rugosa Rose, a beautiful hardy rose, with pretty foliage. Hardy rose hedges can be planted of Hansa or Grootendorst, planting 18 inches or 2 feet apart in the row.

Tamarix Hispida

This is not only the hardiest of the Tamarix family, it also blooms over a longer period than any other variety. Grows quite bushy to a height of 10 to 12 feet and can be sheared to lower and denser growth. Begins to produce its fine sprays of pink blossoms in June, and continues to bloom through the greater part of the summer. Tamarix are not affected by saline or alkaline soils. 2-ft. blooming size, selected shrubs, 60c each; 3 for \$1.65; postpaid.

The blossoms of the Golden Bell appear early in the spring, before its own leaves or the foliage of other shrubs and trees begin to show.

Spirea Prunifolia

The very earliest of all Spireas to bloom in the spring, even before the leaves appear.

Hardy SPIREAS

Spirea Anthony Waterer Grows to a height of 2 to 3 feet, upright in growth, and in bloom almost throughout the entire summer with showy crimson flowers, arranged in flat umbels. It is practically ever-blooming, and hardy most anywhere except in the extreme North where it should have a mulch of straw or leaves over winter. Prefers a shady or partly shaded place.

Prepaid:	1	3	10
12-18 inch plants.....	\$0.48	\$1.30	\$3.95
18-24 inch nice shrubs....	.78	2.20	...

Spirea Prunifolia A highly graceful shrub. The branches are thickly covered almost to their entire length with the delicate snow-white blossoms of the Prunifolia. Each of the slightly arching branches a wreath by itself. Each blossom perfectly double. The shrub is hardy anywhere, and remains in the same place for many years with little more than an occasional light pruning, which is done right after blooming, if the branches are not used for bouquets. Grows to a height of about 4 feet. **Very choice shrubs, 18 to 24-inch size, 80c each, prepaid.**

Spirea Van Houtti "Bridal Wreath" Its height of 5 to 6 feet, that can be kept sheared if desired, fits in just perfectly on most places. For hedges, foundation planting, background to smaller shrubs or flowers, as well as for single specimens; few other shrubs fit in so well as this Spirea. May and June are the flowering time of the Spirea Van Houtti. Like huge snow-drifts, the branches of the shrub arching as if under the weight of the blossoms with which they are completely covered. Perfect hardiness, healthy growth, easiest of culture, make up the rest of desirable qualities all found in this shrub.

Spirea Billardi Note picture at upper left. Grows to an erect bush form of about 5 feet height, with a clean healthy foliage, and otherwise perfectly hardy anywhere, also very drought-resistant, requires very little care after planting. It blooms through August, when few other shrubs are in bloom, every branch bearing a nice fluffy flower spike. For foundation planting, or for an informal screen to be grown without shearing, you will find this shrub of special value. This is the pink-flowering strain. Nice 2-ft. shrubs, 58c each; 3 for \$1.60; prepaid.

Extra Choice Lilacs

Finest fragrant flower of early spring. Vigorous growth plus an unlimited blooming ability are yours in Sonderegger's better Lilacs.

You will love your French Lilacs for their wealth of splendid cut-flowers.

BEATRICE, NEBRASKA

Mme. Lemoine. The most liked double, White Lilac.

President Grevy. A perfectly double flower, in showy clusters of bluish-lilac color.

Chas. Joly. The very choicest reddish-purple Lilac in the double-flowering type.

Persian Lilac (Syringa Rothomagensis.)

Sometimes called Chinese and Rouen Lilac. Grows to a height of 10 to 12 feet and blooms in April and May. Blossoms purple, blooms well, and the special advantage of this lilac is that it does not make sprouts away from the bush. Therefore, it is preferred for hedges around gardens and lawns where the occasional sprouts of the Old Time Lilac are sometimes objectionable. Stands shearing well. See Page 41 for Hedge sizes.

Climbing VINES

Long-Lived . . . Extra Hardy

Hall's Honeysuckle

Hall's Evergreen Honeysuckle. Stays green almost up to Christmas, and in more southern locations practically through the winter. A very pretty vine, with clean, healthy foliage, and producing a wealth of creamy white blossoms in mid-summer; blossoms are fragrant. Grows about 12 to 15 feet tall; can also be used for ground-cover on steep banks. Nice No. 1 plants, 48c each; 2 for 88c; prepaid.

Gold Flame Honey-suckle

This is truly a wonderful plant, grows to full blooming size the first year, and blooms continually from mid-summer to late fall. Blossoms very showy, beautiful color, and fragrant. Should be in every garden. Strong No. 1 plants, 78c each; 2 for \$1.45; prepaid.

Bittersweet (Celastrus

scandens.) A native American vine with a pretty foliage, and bearing red berries in late summer and fall which cling to the vine until late winter. The twigs and berries are often used in winter bouquets. Two vines should be planted to assure pollenizing, and to get berries. Perfectly hardy; can be grown most anywhere. 2-year-old No. 1 plants, 2 for 95c, prepaid.

Wistaria in Bloom

Climbing Roses.

See page 4.

Grape Vines for arbor covers.

See page 24.

Beta grape.

Among the many pretty shrubs and flowers on the Henry Wolken home is this Boston Ivy and Privet hedge.

Boston Ivy The vine that clings to stone and brick walls. Does best on the north and east side of the building, gradually covering the entire wall or chimney. This is the only satisfactory plant to use on stone or brick walls without support. Nice plants, 58c each; 2 for \$1.00; postpaid.

Chinese Wistaria This is a fast grower, with durable, healthy vines, resisting high winds on trellis work. It produces flowers of great beauty, although the vine has to be about three years old before it begins to bloom. Flowers come in large grape-shaped clusters of purplish-blue color. Foliage shiny green, clean, and free from diseases. Where a nice shady place is needed quickly in your garden, erect a small arbor of trellis work, let a pair of Chinese Wistaria cover it, and you will have that delightful little spot of rest and shade on a hot summer day. Our extra strong 2-year vines, 60c each; 2 for \$1.10; prepaid.

Silver Lace Vine (*Polygonum auberti*.) By far the most rapid grower, easily covering a large trellis in one growing season, and blooming profusely from mid-summer to fall. Free from insects and foliage diseases. Hardy, and if in severe winters the vines do freeze back, the new growth in the spring will rapidly replace the lost vines, as the roots are perfectly hardy. 69c each; 3 for \$1.88; prepaid.

Ampelopsis Engelmani Engelman's Ivy. Clings firmly to old tree trunks or trellis work. Retains an excellent foliage throughout summer and fall, and is very dense. Hardy everywhere, and requires practically no care after planting. 40c each; 2 for 70c; prepaid.

The rapid-growing Silver Lace Vine covers large trellis work in record time, hardy, stands full sun and heat.

Add new charm to your home

Large Flowering . . .

CLEMATIS

for a long blooming season

Clematis Jackmani Purple. Sometimes called the "Blue Clematis." The large beautiful flowers, when fully expanded, often measure 4 inches across. Intense violet purple with a rich velvety appearance. It blooms continually from July until frost. The plant is hardy, likes a shady or partly shaded place; the east side of a house is best. For easiest starting we supply potted plants; they will give you best results. 95c each, postpaid.

Clematis Henryi White. The finest of all large flowering White Clematis, and not only a vigorous grower, but a remarkably free and continuous bloomer, beginning with the earliest and holding out until frost. Flower petals creamy white with reddish-chocolate anthers in the center. Very attractive. No. 1 potted plants, 95c each, postpaid.

Clematis Madame Eduard Andree Red. Often called the Crimson Clematis. The plant is a very vigorous Clematis, and blooms very freely, lovely flowers of distinct crimson color. This Clematis has been planted for many years, and for a real showy red it is still unsurpassed by any of the later creations. Like all Clematis, it prefers a shady or partly shaded place. Nice potted plants, \$1.00 each, postpaid.

All 3 Nice Potted Plants, Postpaid.

The large, star-shaped blossoms of the Clematis are extremely showy. Planting all three varieties on the same trellis, 2 feet apart, crossing the vines, brings out the "Red, White and Blue" in living colors.

Hardy Sweet Pea - Lathyrus

A plant of so many fine qualities it simply deserves a place in every garden. People who see the plants blooming ask us "why don't you say more about Lathyrus in your catalogs?" It is a vine that will easily cover a 6-ft. trellis in one season. Its vines and leaves are healthy, free from insects. The root is perfectly hardy anywhere, will give complete results in any location. It blooms from May until late fall, flowers just like Sweet Peas, in a wide range of colors from white to pink, red and bluish purple. A cut-flower as well as a beautiful trellis decoration. It will please you in every respect. Nice plants, 38c each; 3 for \$1.00; postpaid.

Trailing Periwinkle—Evergreen Ground-Cover Vinca Minor, or Creeping Myrtle. Hardy. Evergreen. Forms a dense ground cover about 6 inches high. Plant 12 inches apart. A clean, pretty, shining dark green foliage plant. 3 for 69c; 10 for \$2.00; postpaid.

PLANTING INSTRUCTIONS

All climbing vines listed here will give good results in ordinary garden soil, to which fertilizer should not be added at planting time. Where the soil is not of the best quality, fertilizer (either commercial fertilizer or well-rotted manure) can be applied later on, preferably late in the fall, not touching the vines, but in a circle of about one foot around each plant. Whatever may be left of the fertilizer the following spring can be worked into the soil lightly when the soil around the plants is cultivated in early spring. For the large flowering Clematis, the east side of a building or partial shade is best. In a sunny location the soil should be mulched with wood-shavings through the summer, so as to keep the roots fairly cool.

DEN LILIES

New Speciosum Rubrum

A wonderful lily, usually producing five or more blooms on 30-inch stems, in July and August, when flowers are scarce. The blossom is one of the prettiest in the lily family, very large, well curved, white with crimson band on each petal, and very fragrant. Large blooming size bulbs, 98c each; 2 for \$1.85; postpaid.

Lily of the Valley

The lovely hardy little flower of the old-fashioned garden where grandmother would not be without

them. Highly fragrant, blooms in nice profusion through May. Loves a shady place where it gradually grows into a dense mat of blooming plants. 5 plants, 60c; 10 for 98c; postpaid.

Hemerocallis

Hyperion

A delightful fully fragrant lemon yellow flower, in shape and size like the Amarillis. Does well most anywhere, and is hardy. Produces its beautiful flowers in great freedom through July and August when garden and bouquet flowers are scarce. Height 30 inches. Strong plants, 40c each; 2 for 75c; postpaid.

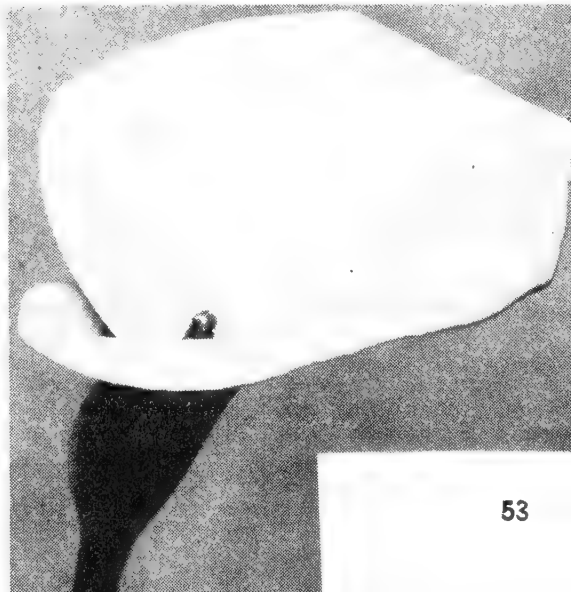

Pompon Dahlias make wonderful bouquets, and are offered in a wide range of colors. You will love them in your garden.

Callas (See photo below.) A nice flower for potting and indoor blooming, as well as in the garden, where it is planted early in May, 5 inches deep, preferably in a shady place. To be dug in the fall and stored indoors like Gladiolas. It is a beautiful flower with glossy green foliage. Yellow, White, and Pink, your choice, full blooming size bulbs, 60c each; 3 for \$1.50; postpaid.

Sure to Cannas

City of Portland. The most perfect pink Canna. Green foliage. Grows 4 feet tall.

Hungaria. Satiny pink. 3½ ft. Blooms well. Green foliage.

Red King Humbert. Orange scarlet. 4 ft. Leaves bronze red.

Richard Wallace. Canary yellow, grows 4 feet tall with green foliage. Very good.

The President. Glowing scarlet. 4 feet. Green leaves.

Statue of Liberty. Grows 6 to 7 feet tall, bronze foliage, blossoms blazing flame red.

Wyoming. Showy orange, very good. 5 feet. Strong bronze colored foliage.

Yellow King Humbert. Golden yellow, blotched red. 4 feet. Foliage green.

A Canna-Bed is always highly attractive, but a suitable border doubles its beauty. Fountain Grass as shown in photo above, red Salvia or Caladiums are fine borders for Canna Beds.

Fountain Grass

(*Pennisetum ruppelianum*)

This is a very graceful plant, its narrow leaf-blades are of dark green color, shiny, always free from rust or insects, arching gracefully at a height of about 2 feet. The plume-stems grow about one foot above the foliage, with beautifully shaped plumes, long cylindrical spikes, of fluffy, long-lasting purplish gray. A marvelous border for Canna Beds planted about 18 inches apart. Also very showy as background to your bed of Annuals and Perennials. Use them freely in your garden. Fountain Grass is an Annual plant, good for one season only. Price: 3 for 55c; 10 for \$1.50; postpaid.

Salvia

SCARLET SAGE

No other plant produces such a wealth of flowers, without interruption from mid-summer to frost. Doubling the real beauty of this plant is the showy, dense dark green foliage, above which the spikes of blossoms appear in their intense scarlet shading. Planted about 14 inches apart, they make a solid green and scarlet border around beds of larger flowers, especially Canna Beds. No matter what the flower bed contains, if it is bordered with Salvia the total appearance becomes captivating. This is an annual plant, for immediate results, the first season only, grows about 18 inches high, and has the added advantage of attracting the rare Hummingbirds. 3 for 55c; 10 for \$1.50; postpaid.

We ship Fountain Grass and Salvia plants when most danger of frost in your locality is past.

Caladium Elephant's Ear

A foliage plant of tropical appearance, growing from a bulb to monstrous size, the leaves often reaching a length of 3 feet, like dark green shields. Particularly effective near water, or planted around Canna Beds. Requires plenty of water, and where other plants may not do so well because of too much moisture, Caladium will be especially successful. The bulb is taken up in late fall, and is handled like Canna for storage through the winter. Plant 4 inches deep. No. 1 bulbs, 43c each; 3 for \$1.15; postpaid.

Fancy Leaf

Produces its large foliage in many different shades of colors, striped and spotted, white, green, and red. Special selection of highly colored strains, 50c per bulb, postpaid.

at lowest publishers' prices. Save time, trouble and postage and be assured of safe, fast service. Each magazine may be sent to a different name, if you like. Just write name of magazines and subscribers' names and addresses on separate piece of paper.

Tuberose . . .

Mexican Extremely fragrant, the sure-blooming type. Grows 16 inches tall and blooms in September in long spikes of waxy-like blossoms. Plant the bulbs 4 inches deep, and late in the fall take the bulbs up for winter storage in the cellar, like Gladiolas. 3 Bulbs, 35c; 6 for 65c; 12 for \$1.15; postpaid.

Begonia Double Flowering Camellia

Tuberous Begonias. White, Yellow, Pink, Red, Scarlet. Your choice of the colors. Strictly first class bulbs, sure blooming, true to color. 40c each; 3 for \$1.00; 5 for \$1.50; postpaid.

Gladiolas

Our list of Gladiolas includes the latest prize-winning types, as well as the best of the former favorites. Note complete list and low prices on these top-size, sure to bloom bulbs on page 69 of this book. Your order for flowers placed with us, assures you of strictly first class planting stock, guaranteed true to name. Guaranteed to reach you in first class condition.

Chrysanthemums bring bright colors in your fall garden.

Chrysanthemum

We have discarded all the old-fashioned types, because in so many instances they bloomed too late. Our new assortment includes the earliest blooming types in existence.

Algonquin Grows about 20 inches tall, and is in full bloom by Mid-September. Blossoms very double, clear yellow.

Burgundy Height at blooming time, end of September, about 2½ feet. A fine flower in the garden or bouquet, of rich deep red wine color.

Hills of Snow Good white Chrysanthemums are scarce, but in Hills of Snow all the good blooming qualities of other colors are combined with a really pure white color. Blooms early in the fall and resists frost quite well.

Rose Glow Raspberry rose-pink, begins to bloom in Mid-September and branches out well at a height of 2 to 2½ feet.

September Dawn Lilac pink, very large and double. Blooms early and continuously. Should be in every garden.

Autumn Lights Deep bronze, very double, and beginning to bloom with the earliest until heavy frosts.

Perennials

SAFE DELIVERY GUARANTEED

Extra Strong Plants, Blooming Size.

Asters

In Asters, too, we have discarded the late-blooming types formerly offered. The four Asters listed below are amongst the earliest to bloom, and include the widest possible color range.

Beechwood Challenger Grows to medium height, and the flowers of crimson-red color appear in great wealth from early fall until heavy frosts.

Blue Gown Of all blue Asters in cultivation, this is truly the best. Double with yellow center. Grows about 3 feet tall, and blooms from September to heavy frosts.

Harrington's Pink True pink, makes a beautiful bush 3 feet high, covered all over with blossoms throughout fall.

Red Rover Deep rosy-red flowers with golden centers. Buds bright red, blooms beautifully from September until late fall. The habit of the plant is a compact growth, about 2½ feet high.

Cushion . . .

Chrysanthemums

These are the Dwarf strains, growing in a perfectly even form to a cushion shape. Fine border plants, or for the rock garden.

Pink Cushion Blooms practically all summer until frost, and its blossoms are of beautiful shades of pink, orchid, and golden centers.

Bronze Cushion An extremely rich bloomer, with deep bronze blossoms, turning to a coppery yellow.

White Cushion Opening in a delicate shade of pink, turning creamy white, and finally clear white as the blossoms open to their full large size.

Red Cushion Pure fiery red, large blossoms covering the dense cushion-shaped plant throughout the autumn season.

2 Red Russian Lilies

Hemerocallis Hyperion A delightfully fragrant, lemon yellow flower, in shape and size like the Amarillis. Produces its beautiful blossoms in greatest freedom through July and August, when flowers in the garden and for bouquets are scarce. Height about 30 inches. Does well most anywhere, and is hardy. 40c each, postpaid.

King Edward Violet An old English strain which blooms early in the spring and again in the fall. Flowers extra large, deep purple, and very fragrant. A dainty border plant for your garden. Each, 35c, postpaid.

1 Harr. Pink

\$1.80 Post-paid **Free** with this Collection
1 Red Pyrethrum

Miss Lingard, richest blooming of all the white Phlox, and long lasting.

Bleeding Heart The old-fashioned type with the delicate heart-shaped flowers along gracefully arching branches. Blooms in May and June, and should be in every garden. Each, 72c, postpaid.

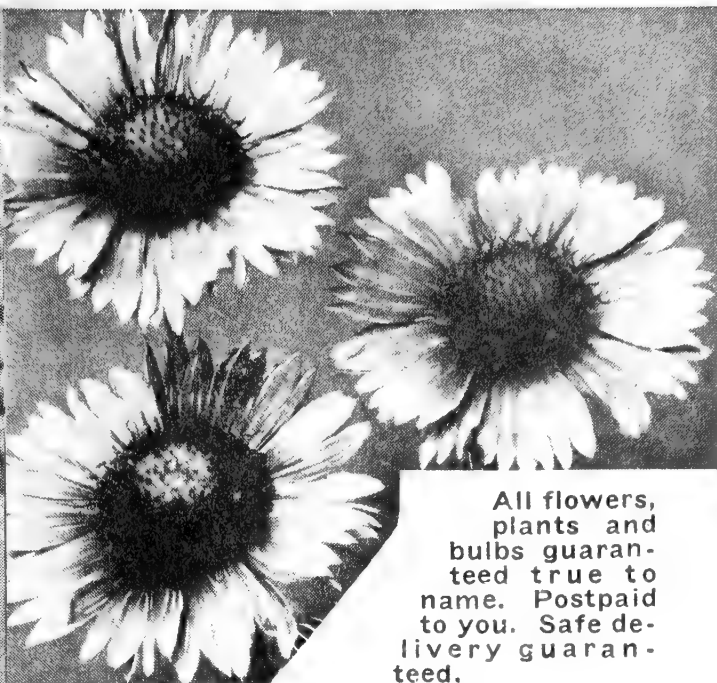

Baby's Breath Gypsophila. Pinnatifida. Pinkish white, single flowering for bouquets. 32c each, postpaid.

Bristol Fairy Baby's Breath Grafted plants. In the garden and in a bouquet, indispensable flower, the small double florets appearing in great number along the twigs and stiff branches form great sprays of white. The ideal bouquet material with other flowers. Blooms continually all through the summer. Height 2 feet. Each, 95c, postpaid.

Pampas Grass Erianthus ravennae, or Plume Grass. Grows to a height of 10 feet and more, and eventually throws up as many as 30 flower heads topped with silvery plumes. Hardy. Each, 49c, postpaid.

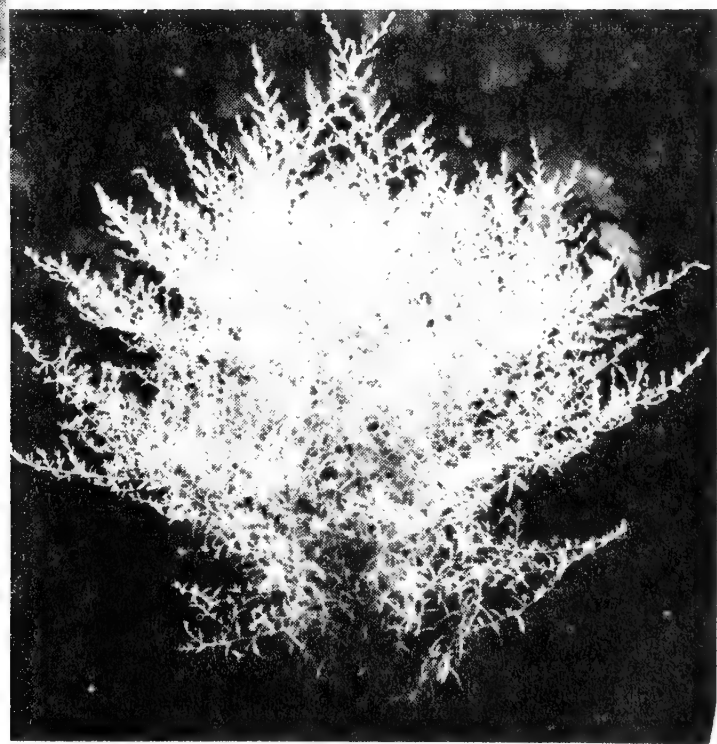

Goldie's Wood Fern (Aspidium) Its beautiful fronds grow 2 feet tall, almost evergreen. Likes shade and good drainage of the soil. Each, 35c.

Ostrich Plume Fern The tallest grower of the outdoor ferns, with graceful, finely cut pinnules, reaching a height of 3 feet. Each, 35c, postpaid.

All flowers, plants and bulbs guaranteed true to name. Postpaid to you. Safe delivery guaranteed.

Gaillardia blooms all summer and fall. Looks nice in the bouquet.

Artemisia, Silver King This is a hardy perennial growing to a dense bush form about 2 feet high, and can be kept lower by shearing. The silvery white twigs and foliage, compact growth, and extreme hardiness place this plant among the most attractive for color effect. Can also be planted in hedge style 12 inches apart in the row. Reaches full size in one season. 35c each, prepaid.

HARDY PERENNIALS

(Continued)

Forget-Me-Not Lovely flower, known to most everyone. Blue, of creeping habit. This is the Alpine strain growing about 8 inches tall and blooming through the greater part of the summer. Each, 35c; 3 for 90c; postpaid.

Gaillardia Note picture at left. Here is one of the most continually blooming plants for your garden, as showy in the flower bed as it is in your bouquet; and this new Monarch strain we are offering is of special large size. It grows to a height of about 2 feet and blooms throughout summer and fall in varied colors ranging from yellow to maroon. A strong robust grower, requiring very little care, and lasting for many years. Each, 35c; 3 for 90c; postpaid.

HARDY CARNATION

Crimson King 18 inches tall. Excellent deep crimson, well shaped, showy in the garden, and very valuable for bouquets. In our own gardens there is hardly another plant which blooms so continually as this Carnation, beginning in the spring and ending with heavy frost in late fall. Each, 45c, postpaid.

DELPHINIUMS

Black Knight The darkest color found in Delphiniums, and with extra large florets, often measuring over 2 inches across, on beautifully shaped, giant spikes. A beautiful flower for the garden and for bouquets. Strong, healthy plants, 45c each, postpaid.

Hybrid Delphiniums Extra free flowering, of the large flower and spike strains, in many unusual shades of blue to white. Very choice plants, 40c each, postpaid.

Red Pyrethrum Extra large blossoms of pink and red color, borne on strong stems, for excellent cut-flowers. With its pretty foliage and great freedom of bloom it will be one of the flowers you will love. Each, 39c, postpaid.

EVERBLOOMING DAISY

King Edward Shasta Daisy Largest and prettiest of the hardy Shasta Daisies. After trying many different strains, we find this giant-flowered type to bloom most continuously throughout the summer. Excellent cut-flower. 40c each; 3 for \$1.00; postpaid.

Hardy Pinks We have the upright, double Sweet Williams in many different colors, mixed. Also the Scotch Pinks with a dense blue-foliage, and very showy single-pink blossoms. Very good for border planting. Your choice of Sweet Williams or Scotch Pinks 38c each; 3 for 95c; postpaid.

HARDY SWEET PEA

Lathyrus A very satisfactory perennial climber, and generally used for low and medium sized trellis covers, for fence-climbers, or for ground-cover. It blooms with greatest freedom throughout the summer, in all color shades from rose-lilac to bright red. Easy to grow, and perfectly hardy anywhere. The flowers are just like those of the regular Sweet Peas. Each, 38c; 3 for \$1.00; postpaid.

Plants for fall delivery Practically all Perennial plants can be set out through September, in localities where fall planting is preferred. We can supply fresh, field grown plants for fall.

Oriental Poppy One of the finest flowers for Memorial Day blooming. Oriental Poppies should be planted only in the fall. We furnish them during September and October.

Prices of Oriental Poppies:

Orange Red—Single. 25c each.
Orange Red—Double. 30c each.
Large White—45c each.
Beauty of Livermor (Blood red)—45c each.

Postpaid. (Deduct 5c per plant if ordered in lots of 3 or more.

Planting Instructions

Plant perennials in any good garden soil. Do not use fertilizer at planting time. If fertilizer needs to be added to the soil later on, it should be applied to the surface of the soil, not in contact with the roots. Plant so deep that the center leaves (heart of the plant) are not covered, but the roots want to be completely in the ground. Water each plant right after planting; this settles the soil, and starts new root-growth immediately. Don't depend on rain instead of watering when you plant. Through the summer, an occasional light cultivation of the soil produces more flowers and stronger plants, also preserves the moisture in the soil.

BEATRICE, NEBRASKA

Finest Double PEONIES

All top-size roots, 3-5 eyes each. Plant them deep enough to cover the eyes 1 inch deep.

Edulis Superba A pretty cut-flower, sure bloomer. One of the very choicest mid-season Pink Peonies.

Felix Crousse Brilliant ruby-red with silvery edges. Mid-season, blooms very freely, exceptionally well shaped.

Festiva Maxima The finest white, sure - blooming Peony, very large and double, center petals tipped red.

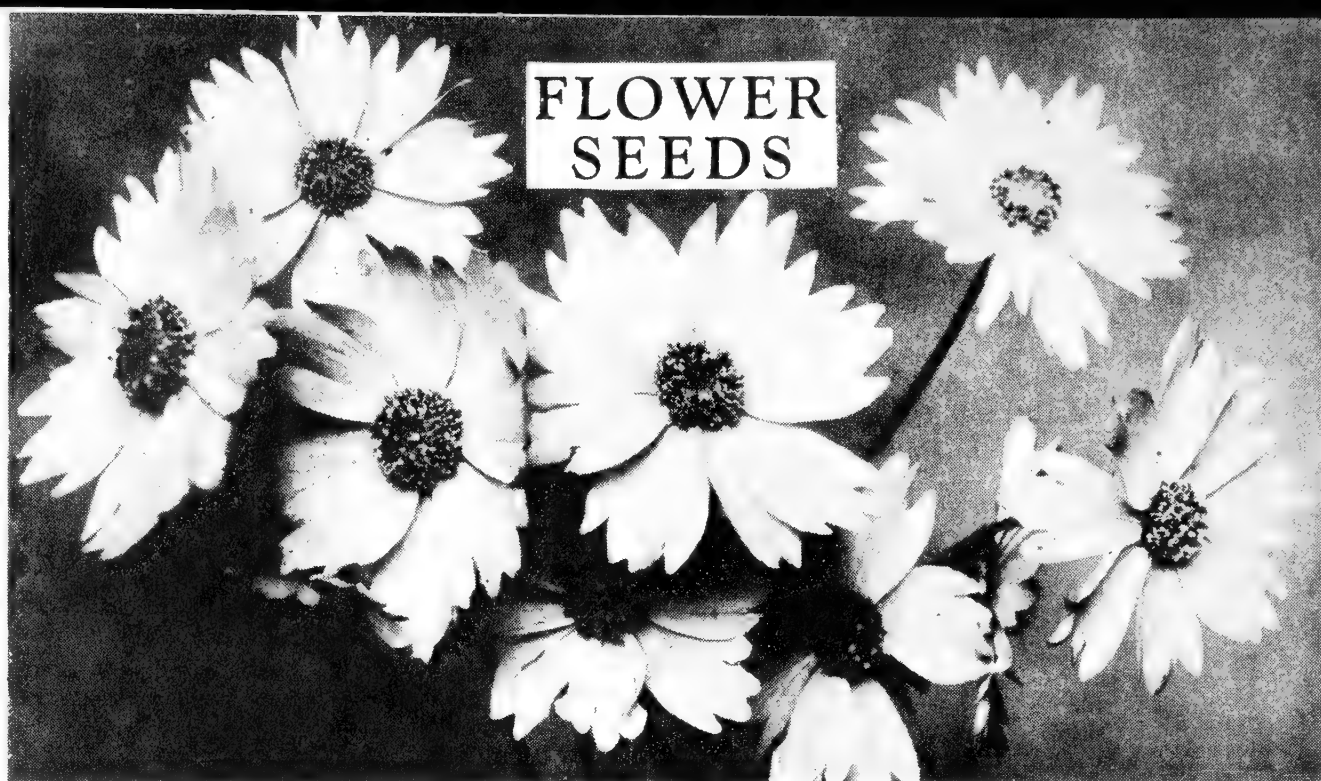

Karl Rosenfield Striking rich crimson, a sure bloomer, pretty shape, mid-season.

Prince of Darkness Very double, and one of the darkest Peonies out.

Sarah Bernhardt Apple - blossom pink with silvery edges on petals. Blooms nice, very showy.

Prices of all assorted Peonies listed above: 75c each; 4 for \$2.68; postpaid.

Double Peonies, Mixed These are full size roots, with 3 to 5 eyes each. Strictly double varieties, no single flowering types included. You can state the color, Red, Pink or White. We furnish them according to your choice. 55c each; 3 for \$1.48; 6 for \$2.65; prepaid.

FLOWER SEEDS

Annual varieties are marked "A" and perennial varieties, "P."

ASTERS—A

792. **White (Wilt Resistant)**. Tall branching plants 2 to 2½ ft. high. Large double flowers borne on long stems. Excellent cut flower variety where contrast is needed. Blooms late August. Pkt., 10c.

794. **Giant Crego Aster**. The sturdy, well-branched plants are about 2 feet tall, and produce a great quantity of immense flowers, often measuring 5 inches in diameter. The petals are curved and twisted. Bloom late August until frost. Pkt., 10c.

796. **Heart of France**. Beautiful deep ruby-red blooms, large and double, borne on extra long stems. Pkt., 5c.

798. **Giant Branching Mixed**. Wilt resistant. A very free bloomer with large double flowers, broad petaled type. Pkt., 5c.

799. **Giants of California**. Large double flowers with long curled petals growing on stems 1½ to 2 ft. long. Mixed colors. Pkt., 8c.

AGERATUM—A

827. **Blue Cap**. Very dwarf and compact. Leaves are small and the plants appear like miniature domes completely covered with blue flowers. Pkt., 5c.

SWEET ALYSSUM—A

832. **Little Gem**. The 4-inch plants are completely covered with snow white flowers. Wonderful for edgings. Pkt., 5c.

834. **Violet Queen**. Compact plant 6 inches tall with deep lavender flowers. Nice with white alyssum. Pkt., 10c.

SNAPDRAGON—A

843. **Antirrhinum, Mixed Colors**. Rust-proof. They produce many spikes 18 inches high, closely set with large flowers which bloom all summer and fall. Pkt., 5c.

AQUILEGIA—P

847. **Mixed Hybrids**. Large attractively formed flowers with broad petals and beautiful long spurs. Plants are free blooming, vigorous growers, 2 to 3 feet tall. Pkt., 10c.

CENTAUREA—A

850. **Bachelor Button**. A perfected strain of this hardy annual. Bright colored double flowers on stiff stems. Fine for bouquets and will bloom all summer. Pkt., 5c.

DIDISCUS—A

860. **Blue Lace Flower**. Showy, lacy, light lavender flower heads borne profusely from July to frost. For borders and cutting. 2 ft. Pkt., 10c.

BALSAM—A

864. **Mixed Colors**. Bushy plants with double flowers produced close to stem. Pkt., 5c.

CALENDULA—A

880. **Campfire**. A popular hardy annual blooming continuously from June until frost. Extra large orange flowers with faint scarlet sheen. Grows 1½ to 2 ft. tall. Pkt., 10c.

CANTERBURY BELLS—P

894. **Cup and Saucer**. An easily grown biennial with bell-shaped flowers. Pkt., 5c.

CANDYTUFT—A

900. **Mixed Colors**. Hardy annual, bearing many large spikes of flowers from early summer to frost. Pkt., 5c.

CARNATION—P

906. **Double Scarlet**. Large double flowers, sweet scented and fine for house culture. Pkt., 10c.

908. **Everblooming French**. Large double flowers of rich mixed colors which bloom in four months from seed. Pkt., 10c.

COCKSCOMB—A

916. **Mixed**. Makes a very showy plant with its beautiful combs. Pkt., 5c.

CHRYSANTHEMUM—A

940. **Mixed**. Flower profusely during summer and fall. Showy in the garden and fine for cutting. Pkt., 5c.

COSMOS—A

943. **Orange Ruffles**. Vivid orange flowers with two or three extra rows of petals lend an airy butterfly beauty to the richly colored blossoms. Pkt., 5c.

944. **Giant Sensation Dazzler**. A luscious shade of rich deep velvety crimson. The broad fluted petals slightly overlap, giving the flowers a very full appearance. Pkt., 10c.

946. **Early Flowering**. Large single flowers of red, pink and white. Pkt., 5c.

949. **Double Flowering**. Showy plants with large double flowers. Pkt., 5c.

DAHLIA—A

952. Dwarf Hybrids. Early flowering, semi-double dahlias in a varied assortment of colors. Bushy plants 1½ feet tall. Pkt., 10c.

DAISIES—P

958. Shasta. Large white single flowers 4 to 5 inches across with small yellow centers. Pkt., 5c.

960. Giant Double Shasta. The largest Shasta daisy, the double flowers are nearly 7 inches across and stems 2½ feet long. Pkt., 15c.

SPIDER PLANT—A

966. Pink Queen. A tall and attractive plant with huge heads of delightful true pink flowers. Plants well branched, with airy foliage and blooming from June until frost. Pkt., 5c.

DELPHINIUM—P

968. Tall Mixed. Easily raised, quick growers and very free flowering; produces a wealth of large, double blooms on long stems. Pkt., 5c.

972. Wrexham. Stately plants, with their large double flowers, closely set together, form spire-like spikes. Pkt., 10c.

DIANTHUS—P

997. Special Mixed. A splendid mixture of brilliantly colored sweet scented flowers. Dwarf, bushy plants 12 inches tall, free flowering and blooming from July until frost. Pkt., 5c.

FORGET-ME-NOT—A

1009. Chinese Blue. Dwarf, compact growing free flowering plants. Prefers full sun. Flowers a very bright blue, so rare among annuals. Pkt., 5c.

FOUR O'CLOCKS—A

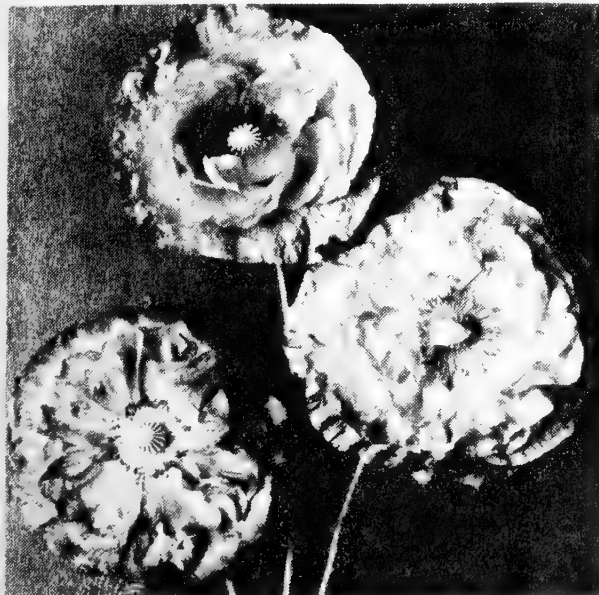

1012. Dwarf Mixed. Showy plants, 15 inches tall. Sweet scented flowers of many colors. Pkt., 10c; oz., 25c.

GAILLARDIA—P

1017. Produces very large, handsome flowers of various colors, including clear golden-yellow and brilliant crimson edged blossoms and others banded with gold. Excellent for cut flowers and perfectly hardy. Pkt., 5c.

GYPSOPHILA—P

1024. Baby's Breath. Graceful branching plants with clusters of delicate white flowers. Beautiful in bouquets with other flowers. Pkt., 5c.

BEATRICE, NEBRASKA

HELIOTROPE—A

1026. Fine Mixed. Its delightful fragrance and easy culture make it a favorite in any garden. Plants 2 feet tall, with flower clusters of deep rich shades. Pkt., 5c.

HOLLYHOCK—A

1030. Double Mixed. A wide range of beautiful colors. Highly valued for background planting. Pkt., 5c.

MARIGOLD—A

1058. Tall African. Immense ball-shaped double flowers borne on long stiff stems. Excellent for cutting. Plants bloom freely from mid-summer until frost and grow 2½ feet tall. Pkt., 10c.

1060. Crown of Gold. The first known Marigold with odorless foliage. Flower centers are of short curled, quilled petals with a collar of flat guard petals on outside. Color is orange, 2½-inch flowers, fragrant, 2½ feet tall. Pkt., 10c.

1062. Pot O' Gold. A mass of intense dazzling gold flowers, on dwarf compact growing plants of about 10 to 12 inches in height. Pkt., 10c.

1063. Butterball. The dwarf mound like plants are literally covered with two-inch flowers of soft butter yellow, lightly tipped with maroon on the center petals. Early flowering. Pkt., 10c.

MIGNONETTE—A

1074. Sweet Scented. A well known, old-fashioned flower highly prized for its fragrance, either in garden or bouquets. Pkt., 5c.

NASTURTIUM—A

1080. Salmon Gleam. A superb strain with beautiful large double flowers of a delicate golden salmon. Fragrant. Pkt., 10c.

1085. Glorious New Hybrids. Large double sweet scented blooms on long stems. A wide range of colors. Pkt., 10c.

1094. Dwarf Mixed. This mixture consists of the richest and most varied combination of colors. Pkt., 5c; Oz., 15c.

PANSY—P

1106. Masterpiece. Charming pansies with crinkled and heavily ruffled flowers of rich dark shades. Pkt., 10c.

1107. Swiss Giant. Large flowers, perfectly round and many beautiful colors. Pkt., 10c.

1114. The Viola. Hardy perennial. Neat plant with small flowers which bloom profusely. Pkt., 5c.

1130. Mixed Colors. An excellent mixture of colors. Pkt., 10c.

PETUNIA—A

1142. Rose of Heaven. Dwarf bushy plants with very bright and showy dark pink flowers. Pkt., 10c.

1147. Royal Purple. Large flowers of a deep purple color. Pkt., 10c.

1150. Fluffy Ruffles. Large ruffled and frilled flowers in a well balanced mixture of colors. Pkt., 15c.

1151. Flaming Velvet. Large velvety blood-red flowers. Pkt., 10c.

1154. A good Mixture of Common Varieties. 10c.

POPPIES

1196. Double Shirley Poppy. A. "Sweet Briar." Deep rose-pink flowers, full and double. Resembles a large double Begonia. Pkt., 10c.

1198. Oriental. P. These gorgeous spring flowers, often 6 inches across, of vivid scarlet with black splotches at the base of each petal. May be left undisturbed for years. Pkt., 5c.

PHLOX—A

1166. **Choice Mixed.** Well branched plants with large flower heads composed of many round petaled florets. Pkt., 10c.

1170. **Perennial Mixed.** Hardy flowering sorts in a splendid mixture of bright colors. Pkt., 10c.

PORTULACA—A

1200. **Single Mixed.** Brilliant colored blooms until frost. Like a hot, sunny place. Pkt., 5c.

1202. **Double Mixed.** Flowers are like little roses of many brilliant colors. Pkt., 10c.

TEN WEEKS STOCK—A

1216. **Finest Mixed.** The large flowers and long stems of this variety make it especially desirable for cutting. Very early blooming. A wide range of colors. Pkt., 10c.

SALVIA—A

1233. **Bonfire.** Erect spikes of brilliant scarlet on plants 14 inches high. Pkt., 10c.

1234. **Blue Bedder.** Long spikes of showy deep blue flowers, splendid for garden display and cutting. Seed sown in May will bloom from July until frost. Pkt., 10c.

SCABIOSA—A

1236. **Double Mixed.** Their long stems and beautiful colored flowers make them very good for cutting. Pkt., 5c.

1240. **Blue Moon.** A favorite because it is easy to grow and blooms profusely from midsummer until frost. The beautiful and richly colored blooms are carried on long slender stems. The plants stand 2½ to 3 feet tall. Most effective for garden display and unexcelled for cutting. Pkt., 10c.

Scabiosa

SWEET PEAS—A

1316. **Spencer Hybrid Mixed.** A carefully composed blend or mixture of the very finest sweet peas, including all the best colors. Large flowering type and early blooming. Pkt., 5c; oz., 15c.

SWEET WILLIAM—P

1320. **Double Mixed.** Hardy perennial. The broad clusters of fragrant flowers have fringed petals. Pkt., 10c.

VERBENA—A

1323. **Spitfire.** Each plant bears 10 to 12 stems that are 15 inches long and can readily be used for bedding and cutting. Mammoth flowers of strong scarlet-rose color. Pkt., 10c.

1324. **New Mammoth.** Fine for beds and borders. Many vividly colored flowers all summer and fall. Pkt., 5c.

ZINNIA—A

1350. **Giant Dahlia Flowered.** These Zinnias are outstanding. The strong stems grow about 3 feet high. Produce pastel colored blooms, resembling a giant dahlia, often 5 inches across and 2 inches in depth. Fine for cutting. Pkt., 10c.

1353. **Howard's Giant Crested.** Blossoms are 4 inches in diameter, with a round cushiony center surrounded by broad guard petals. Magnificent shades of orange, yellow, rose and crimson. Pkt., 10c.

1354. **Double Liliput.** A fine mixture of the dwarf double Zinnia. Pkt., 5c.

1352. **Giant Flowered Mixed.** A well balanced mixture of all colors which make a gorgeous showing. Pkt., 5c.

1360. **Giant flowered, white.**

1362. **Giant flowered, crimson.**

1364. **Giant flowered, bright pink.**

1366. **Giant flowered, violet.**

1368. **Giant flowered, yellow.**

Above 5 varieties, 7c each, or 5 for 30c.

STRAW FLOWERS—A

1376. **Special Mixed.** Especially good for winter bouquets. Pick when one-third open and hang heads down in a dry place until thoroughly dry. Pkt., 5c.

CLIMBING VINES—A

1407. **Cardinal Climber.** The leaves are deeply notched which with the cardinal red flowers give this vine a beautiful effect. Pkt., 10c.

1414. **Cypress Vine.** A beautiful annual climber with fern-like foliage and graceful star-shaped flowers. Pkt., 10c.

DOLICHOS—A

1416. **Hyacinth Bean.** Very hardy, bean-like flowers in erect racemes, followed by ornamental pods. 10 feet high. A splendid annual climber. Pkt., 10c.

MORNING GLORY—A

1430. **Double Rose Marie.** Something entirely different, not often seen in a climber. It grows well and produces freely its lovely double deep rose blossoms. 10 to 15 ft. Pkt., 10c.

1432. **Pearly Gates.** Vigorous, fast climbing vines. Covered with lustrous white flowers from July until frost. Pkt., 5c.

1433. **Heavenly Blue.** Rapid growing vine with large bright sky-blue flowers. Pkt., 5c.

1434. **Scarlett O'Hara.** Fast growing vine with dark green foliage and flowers of a dark wine-red color. Pkt., 5c.

ORNAMENTAL GOURDS—A

1454. **Mixed Varieties.** This special mixture of the large and small ornamental varieties is very interesting. Pkt., 5c; oz., 20c.

SPECIAL MIXTURE OF ANNUALS FOR CUT FLOWERS

1400. The varieties in this blend are chosen for their value as cut flowers. They are the long stemmed brightly colored flowers that go so well in vases and baskets. This will produce a glorious variety of flowers carefully selected for cutting but just as well suited for a grand showing in beds and borders. Pkt., 10c.

BEANS Green Podded

D120. Giant Stringless Green Pod (54 da.). One of the heaviest bearers. Pods long, round, dark green, stringless crisp and tender, and of finest quality.

D126. Burpee's Stringless (50 da.). Plants large, erect, very productive. Pods 6 inches long, round, stringless. Of excellent quality.

D134. New Tendergreen (54 da.). One of the best green podded beans for the Middle West. Pods of dark green color, round, fleshy. Good bearer, excellent for canning.

D136. Streamliner (55 da.). A large bush of upright growth, bearing a heavy crop of stringless, semi-flat pods, 7 inches long. Seed clear white, kidney shaped, making it an excellent dried bean.

Yellow Podded Varieties

D142. Brittle Wax (58 da.). Plants vigorous, very productive. Pods medium round, extremely brittle, fleshy, stringless, free from fiber.

D155. Pencil Pod Black Wax (52 da.). Plants large, stocky, good producer. Pods golden yellow, fleshy, tender and stringless. Finest quality.

D144. Golden Wax (55 da.). An old standard variety. Plants bushy, very prolific. Pods 5 in. long, round, bright yellow, brittle and free from strings.

LIMA BEANS

D154. Henderson's Bush Lima. (65 da.). An extra early butter bean of delicious flavor. Seeds bright green at eating stage and creamy white when dry. A heavy yielder.

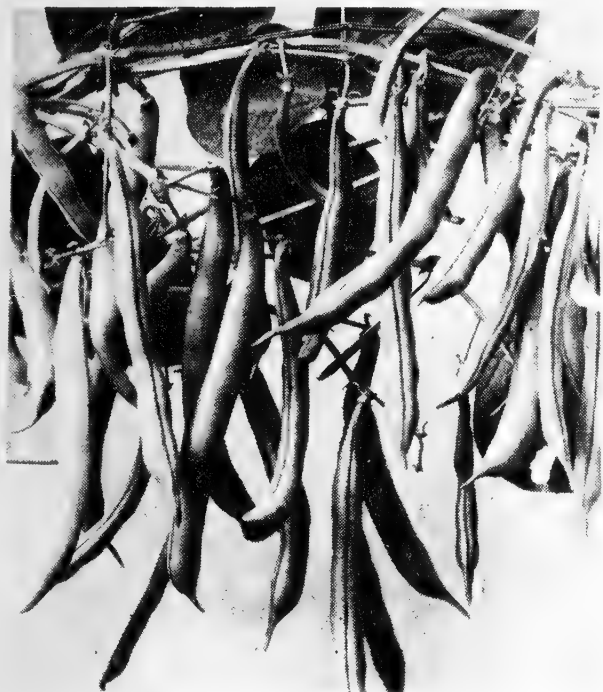

POLE BEANS

D162. Kentucky Wonder. (65 da.). A very popular variety. An excellent climber, heavy producer. Bears green pods in large clusters, nearly round, often 10 inches long.

Planting

Instructions

Plant beans after all danger of frost is over in rows, 12 to 15 inches apart, 1½ lbs. of beans will be needed for a 100 ft. row. Pole beans may be planted against the garden fence for support.

New Tendergreen

BORECOLE or KALE

Greens for early fall, winter and spring. Sow seed about middle of June, later transplant to rows 2 to 2½ feet apart. Dwarf sort can be sown later.

D110. Dwarf Green Curled (55 da.). Leaves curly as Parsley, tender and very fine flavor. Immense quantities produced in south find ready sales in the north. Pkt., 10c.

BRUSSELS SPROUTS

D118. Improved Dwarf. The miniature heads are very solid and most delicious. Culture same as cabbage. Pkt., 10c.

Early Blood Turnip

BEETS

D178. Early Blood Turnip. One of the best for the Middle West. Round, medium size, dark red color without light rings. Sweet and tender. Pkt., 8c; oz., 20c.

D179. Ohio Canner (65 da.). This new beet has a deep blood-red color, is tender, sweet and free from stringiness. Round and of uniform size. Pkt., 5c; oz., 20c; ¼ lb., 50c.

D180. Crosby's Egyptian. Roots are flattened in shape, of medium size, dark red, smooth and tender; one of the earliest. Pkt., 5c; oz., 15c; ¼ lb., 40c.

D201. Detroit Dark Red. (60 da.). Round, dark red, sweet and of excellent quality; does not lose color in cooking. Pkt., 10c; oz., 20c; ¼ lb., 50c.

D192. Swiss Chard. Grown for leaves only, which are used as spinach. Produces immense quantities of light green leaves from spring until late fall. Pkt., 5c; oz., 15c.

MANGEL BEETS

D198. Giant Half Sugar Mangel Beet. Extra sweet and large, of special high feed value for poultry and dairy use. On heavy soil I prefer this variety, as it grows shallow and is easy to harvest. Oz., 15c; ¼ lb., 45c.

SUGAR BEETS

D202. Klein Wanzleben Sugar Beet. A standard variety used in making sugar and syrup. Also for stock and poultry feed. Oz., 12c; ¼ lb., 40c.

CABBAGE

D222. Chinese Celery Cabbage (75 da.). Makes oblong solid heads of excellent quality. Plant seed early July. Pkt., 10c; oz., 40c.

D223. Golden Acre (65 da.). This is the very best early round head cabbage. Very fine grained, sweet and juicy, solid heads 3 to 4 lbs. Pkt., 10c; ½ oz., 25c; oz., 45c.

D224. Early Jersey Wakefield (65 da.). This is our earliest and best pointed head cabbage. The heads are cone-shaped, very solid and tender. Weight 3 to 4 lbs. Pkt., 10c; ½ oz., 25c; oz., 45c.

D226. Copenhagen Market (69 da.). Heads round, solid, of excellent quality. Medium early. Fine for sauerkraut. Pkt., 10c; oz., 45c.

D227. Marion Market (79 da.). The heads are very uniform, of the Copenhagen Market type, making good early round heads. It is a yellow resistant variety. Pkt., 10c; oz., 45c.

D236. Improved Danish Ballhead (100 da.). An excellent variety for late fall and winter use. Heads large, round, fine grained, sweet and juicy. Pkt., 10c; ½ oz., 30c; oz., 50c.

D238. Premium Late Flat Dutch (100 da.). This is the largest and best of the flat head varieties. Best for late fall and winter use; good keeper. Pkt., 10c; oz., 50c.

D240. Savoy, King of Earliest (75 da.). Best of all sorts Savoy cabbage. Heads medium size, very solid and excellent quality. Savoy cabbage is not often seen in the market, and by growing it yourself, you have something unusual—superior in quality, delicate in flavor. Pkt., 10c; ½ oz., 25c; oz., 45c.

D244. Mammoth Red Rock (79 da.). The finest, surest heading sort of red Cabbage, of extra fine quality. Shredded with the White, it makes a colorful salad. Pkt., 10c; oz., 55c.

Red Core Chantenay

CARROTS

D252. New Bunching (78 da.). Main crop variety and for winter use. Roots 7 to 9 inches long, very symmetrical and smooth. Used extensively for market. Pkt., 7c; oz., 20c.

D254. New Scarlet (70 da.). Best second early variety. The roots grow quite large, are of orange red color and excellent winter keeper. Pkt., 7c; oz., 20c.

D256. Imp. Half Long (60 da.). The roots and flesh are of bright orange red color, of medium size and fine grained. Pkt., 5c; oz., 20c.

D260. Red Core Chantenay (72 da.). The roots are smooth with blunt end. Their rich deep red color makes them a favorite with the housewife. Pkt., 10c; oz., 25c.

D264. Oxheart (72 da.). A very short and stumpy variety. Extra early and of fine quality. Pkt., 5c; oz., 20c.

CAULIFLOWER

D246. Improved Earliest Dwarf. Heads uniform in size, of fine quality. I find this to be the best of all varieties for the Middle West. Pkt., 25c.

Improved Earliest Dwarf

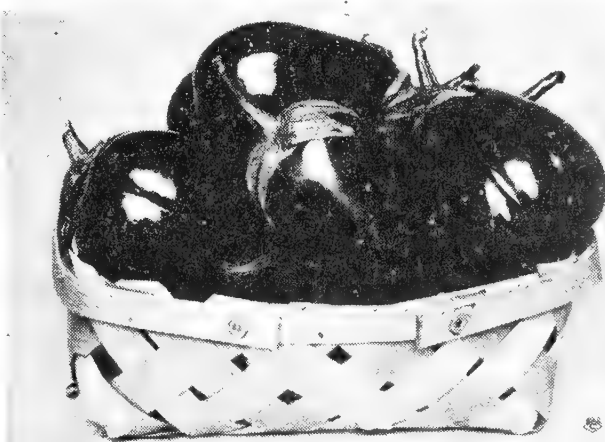

CELERY

D274. Golden Self Blanching. Medium height, stocky and very compact. Foliage yellowish green, stalks solid, broad and of delicate flavor. Pkt., 10c; 1/2 oz., 40c.

D282. Turnip Rooted Celeriac. Large white roots, smooth, of excellent quality and flavor. Pkt., 15c; oz., 45c.

CORN SALAD

D280. Large Leaved. This small salad is used during the winter and spring months as a substitute for lettuce and is cooked and used like spinach. Sow seed in shallow drills, one foot apart, during August or September, or early in the spring. Pkt., 10c.

EGGPLANT

D284. Spineless (83 da.). A good bearing variety. The broad, oval, dark purple, glossy fruits are of superior quality. Retains its beautiful color a long time. Pkt., 10c; 1/2 oz., 30c; oz., 50c.

ENDIVE

D286. Green Curled (95 da.). Makes delicious fall and winter salads. Frost improves its flavor and quality. Pkt., 10c; oz., 30c.

D288. Broad Leaved Batavia (92 da.). Large summer variety. Pkt., 10c; oz., 30c.

SWEET CORN

D292. Early Golden Bantam. (65 da.). After many years of selection I find this to be one of the best yellow varieties for this section. Stalks medium height, ears 7-9 inches long filled with sweet plump golden yellow kernels. Pkt., 7c; 1/2 lb., 22c; lb., 40c; 3 lbs., \$1.10; postpaid.

D296. Whipples White. (60 da.). The earliest of all large eared white seeded varieties. Ears are filled with deep grained pearly white kernels. Pkt., 5c; 1/2 lb., 22c; lb., 40c.

D302. Golden Rocket (68 da.). One of the best yellow Hybrids. Grows about 5 or 6 ft. tall. Bears ears 10 to 14 rowed that will average about 8 in. in length, well filled with good tasting yellow kernels. Superior quality. Pkt., 10c; 1/2 lb., 50c.

D304. Early White Evergreen. (70 da.). This variety is very much like Stowell's Evergreen but 10 days earlier. Excellent quality, good canner. Pkt., 5c; 1/2 lb., 22c; lb., 40c; 3 lbs., \$1.10; postpaid.

D305. Golden Cross Hybrid. (85 da.). Of all the yellow Hybrids I like this one best. Every stalk produces one or two medium sized ears filled with large golden yellow luscious kernels. Pkt., 8c; 1/2 lb., 30c; lb., 50c; postpaid.

D306. Country Gentleman. (94 da.). Very productive, kernels irregular, very deep, pure white and sweet. Ears 9 inches long. A very good variety. Pkt., 5c; 1/2 lb., 22c; 1 lb., 40c; 3 lbs., \$1.10; postpaid.

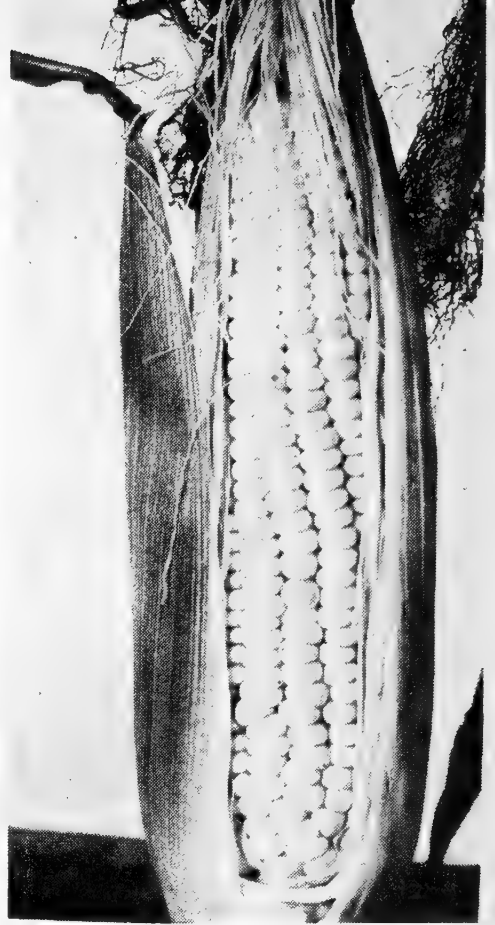

D307. Hybrid Stowell's. (95 da.). A big eared, thrifty, high yielding white hybrid. It has an unusually rich, sweet flavor. Pkt., 10c; 1/2 lb., 30c; lb., 45c; postpaid.

D308. Stowell's Evergreen. (95 da.). The standard main crop white sweet corn. Large ears, sweet and stay tender a long time. Especially fine for canning. Pkt., 5c; 1/2 lb., 20c; lb., 40c; postpaid.

POP CORN

D309. Yellow Hybrid. An improved variety of Dynamite with the hulls practically eliminated. A good producer, is of excellent quality. Oz., 10c; 1/4 lb., 20c; lb., 55c; 3 lbs., \$1.20; postpaid.

D311. Hybrid White Hulless. An extra heavy yielding variety. Hulless and of fine quality when popped. Pkt., 10c; 1/4 lb., 15c; lb., 50c; postpaid.

KOHL RABI

D342. Early White Vienna (55 da.). An excellent vegetable with roots of fine quality. Grown above ground. Cook like turnips. Pkt., 5c; 1/2 oz., 20c.

LEEK

D346. The large London variety. Mild; for flavoring soups, or cooked like creamed onions. Pkt., 10c; 1/2 oz., 30c.

MUSTARD

D378. Southern Giant Curled (40 da.). Highly esteemed in the South where the seed is sown in the fall and the plants used early in the spring for salads. Pkt., 5c; oz., 10c.

OKRA

D380. White Velvet (62 da.). Okra is delicious for stews, for flavoring soups, and for salads. It is easy to raise and yields immense crops. The pods are used when from 1 to 2 inches long. Pkt., 5c; oz., 10c; 1/4 lb., 25c.

CUCUMBERS

D320. Davis Perfect (65 da.). An excellent mid-season variety. Fruits 9 to 10 inches long, 2½ inches thick, dark green color, tapered at both ends. Flesh crisp and of good quality. Pkt., 5c; oz., 20c; ¼ lb., 60c.

D324. Improved Long Green (70 da.). Makes delicious pickles when small. Crisp, of fine flavor, 9 inches long, dark green. Pkt., 5c; oz., 20c; ¼ lb., 60c.

D327. Straight Eight (66 da.). The most desirable slicing cucumber you can plant. The straight symmetrical fruits grow about 8 inches long and 1½ inches in diameter. The color is a rich deep green. Pkt., 10c; oz., 25c; ¼ lb., 75c.

D328. Early Cluster (55 da.). Hardy vines bearing clusters of two and three. Short, thick, dark green cucumbers. Pkt., 5c; oz., 20c.

D330. New Evergreen (55 da.). A small early variety. Its outstanding feature is that the vines continue to bear throughout the growing season. Fruits short, slightly pointed and of superior quality. Pkt., 5c; oz., 20c; ¼ lb., 60c.

D332. Chicago Pickling (58 da.). Special for pickles. Medium length, dark green color. Pkt., 5c; oz., 20c; ¼ lb., 60c.

Protect Your Cucumbers By Using

LETTUCE

D350. Extra Early Head (63 da.). Heads are of medium size, solid, round. This lettuce is rich in flavor, buttery, crisp and tender. Pkt., 10c; oz., 25c.

D352. Improved Hanson (80 da.). A very reliable sure heading variety. Leaves large, broad and crimped, of light green color and fine quality. Pkt., 5c; oz., 20c.

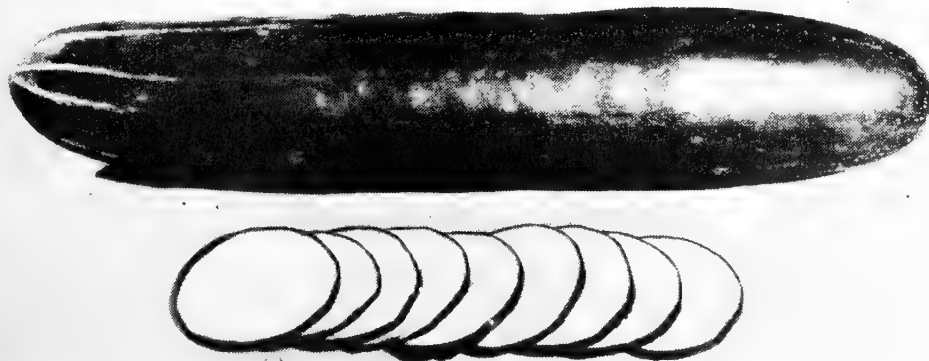

D354. Butterhead (75 da.). Best all around lettuce. extra good for forcing and summer use Pkt., 10c; oz., 25c.

D358. Prizehead (50 da.). An early non-heading variety. The crumpled, crisp, tender leaves are tinged brownish red. Pkt., 10c; oz., 25c.

D365. Oak Leaf (40 da.). A novel salad lettuce. Shaped like an oak leaf, deep green color, exceptionally rich in vitamins, tender and of excellent flavor. Stands up well in hot weather, never turns bitter. Pkt., 10c; oz., 25c.

D366. Early Curled Simpson (45 da.). Leaves tender, sweet, of light green color, and excellent quality. A very early variety. Pkt., 5c; oz., 20c.

D367. Black Seeded Simpson (45 da.). Quick growing variety. Outer leaves light green, crisp, of fine texture and exceptionally fine flavor. Pkt., 10c; oz., 25c.

Straight Eight

CANTALOUPE

D389. Bender's Surprise (90 da.). A large size melon weighing 7 to 8 pounds. Round shaped, deeply ribbed with coarse netting. Flesh bright orange, very thick and sweet. An excellent home garden variety. Pkt., 10c; oz., 20c; ¼ lb., 65c.

D390. Rockyford (92 da.). A comparatively small green fleshed melon of about 2 lbs.; oval type, slight ribbed. Flesh thick with gold tinge at center, juicy and of excellent flavor. Pkt., 10c; oz., 20c; ¼ lb., 65c.

D391. Hearts of Gold (90 da.). A variety that is highly prized. Fruits are medium size, nearly round. Flesh a deep orange, extremely thick, fine grained and very sweet. Pkt., 10c; oz., 20c; ¼ lb., 65c.

D392. Sugar Rock (80 da.). A melon that is very popular for its earliness and superior quality. The melons are very attractive, medium in size, round, covered with a coarse netting. The flesh is firm, thick, deep orange in color, very sweet and of delicious flavor. Pkt., 10c; oz., 20c; ¼ lb., 65c.

D395. Lake Champlain (90 da.). The earliest orange flesh melon. Fruits nearly round. 5 to 6 inches in diameter, slightly ribbed. Flesh thick, deep orange color, juicy and very sweet. Pkt., 10c; oz., 20c; ¼ lb., 65c.

Early Kansas

Hearts of Gold

WATERMELONS

D404. Tom Watson (90 da.). Extra long, tough but thin rind. Deep red flesh. The melons measure about 24 inches long and 12 inches in diameter and often weigh from 40 to 50 pounds. Pkt., 5c; oz., 15c; ¼ lb., 30c.

D408. Kleckley Sweet (85 da.). Oblong shaped, dark green. Flesh dark red, very sweet, solid and stringless. Fruits are 12 inches in diameter and 24 inches in length and weigh up to 40 lbs. Pkt., 5c; oz., 15c; ¼ lb., 30c.

D409. Early Kansas (80 da.). Large size, dark green with lighter stripes. Flesh bright red. Delightful flavor. Fruits weigh 20 to 30 lbs., are round to oval in shape. Pkt., 5c; oz., 15c; ¼ lb., 30c.

D410. New Striped Klondike (90 da.). An extra large variety, light green, striped dark green. Good shipper. Flesh deep red, sweet and tender. Weighs 25 lbs. Pkt., 7c; oz., 15c; ¼ lb., 30c.

D412. Stone Mountain (85 da.). Large, almost round. Flesh bright scarlet, sweet and crisp. Weighs about 45 lbs. Pkt., 7c; oz., 15c; ¼ lb., 30c.

ONIONS

D432. Prizetaker (105 da.). Easy to grow from seed to medium size. Flesh pure white, finest quality, rather mild. Pkt., 15c; 1/2 oz., 45c; oz., 75c.

D440. Yellow Globe Danvers (110 da.). White flesh, crisp and very good quality. Firm, solid bulbs; fine for storage. Pkt., 15c; 1/2 oz., 40c; oz., 75c.

D442. White Sweet Spanish (110 da.). The pure white flesh of this onion is fine grained and sweet. Pkt., 15c; 1/2 oz., 45c.

D450. Yellow Bermuda (93 da.). A very large globe-shaped onion with mild, crisp flesh. A good keeper and fine for markets. Pkt., 15c; 1/2 oz., 50c; oz., 85c.

D473. Bermuda Onion Plants. Plant as soon as ground is warm. A very mild onion, when used as a green or a large onion. Plants can not be shipped until about first of April. Per bundle, 20c; 5 bundles, 85c.

ONION SETS

	1 lb.	3 lbs.
D458. White	35c	\$1.00
D462. Yellow	35c	1.00
D464. Multiplier Onion Sets.....	35c	1.00

GARLIC

D748. Very pungent. Grown for seasoning. Large bulbs (break them up to sets), 5c; 1/4 lb., 15c; 1 lb., 45c.

PEANUTS

They do best in a light soil. Take them up, tops, peanuts and all just before frost in the fall. Allow them to dry out in the air. Plant in rows 4 feet apart.

D484. Mammoth Virginia. Most profitable variety to grow for home use or market, as the nuts are quite large. Plants grow erect. Pkt., 10c; 1 lb., 35c; postpaid. Not prepaid, 5 lbs., \$1.50.

PARSLEY

D474. Champion Moss Curled (70 da.). Leaves extra large, deep rich green and very curly. Pkt., 7c; oz., 15c.

D478. Hamburg. Turnip-rooted; of this variety the roots as well as the tops are used. Pkt., 7c; oz., 15c.

PARSNIPS

D480. Improved Guernsey (85 da.). Roots thick, of medium length, quality of this Parsnip is excellent, roots smooth, and fine grained. Very satisfactory for home use or market. Pkt., 8c; oz., 15c; 1/4 lb., 40c.

GARDEN HUCKLEBERRY

D521. Fruits small, about the size of a gooseberry, color a deep purple. Plant upright in growth. For preserves, cook with sugar and lemon. Pkt., 10c; 1/2 oz., 30c.

PEPPERS

D522. New Royal. Extra thick flesh, juicy, sweet and very mild. Fine for stuffed peppers. Pkt., 10c; 1/2 oz., 25c.

D525. Harris Early. Earliest variety. Fruit medium size, dark red and very sweet. Pkt., 10c; 1/2 oz., 25c.

D526. California Wonder. It produces smooth uniform fruits 4 inches in diameter and 5 inches long, mostly four lobed. The flesh is solid, thick, very mild and sweet. Pkt., 10c; 1/2 oz., 25c.

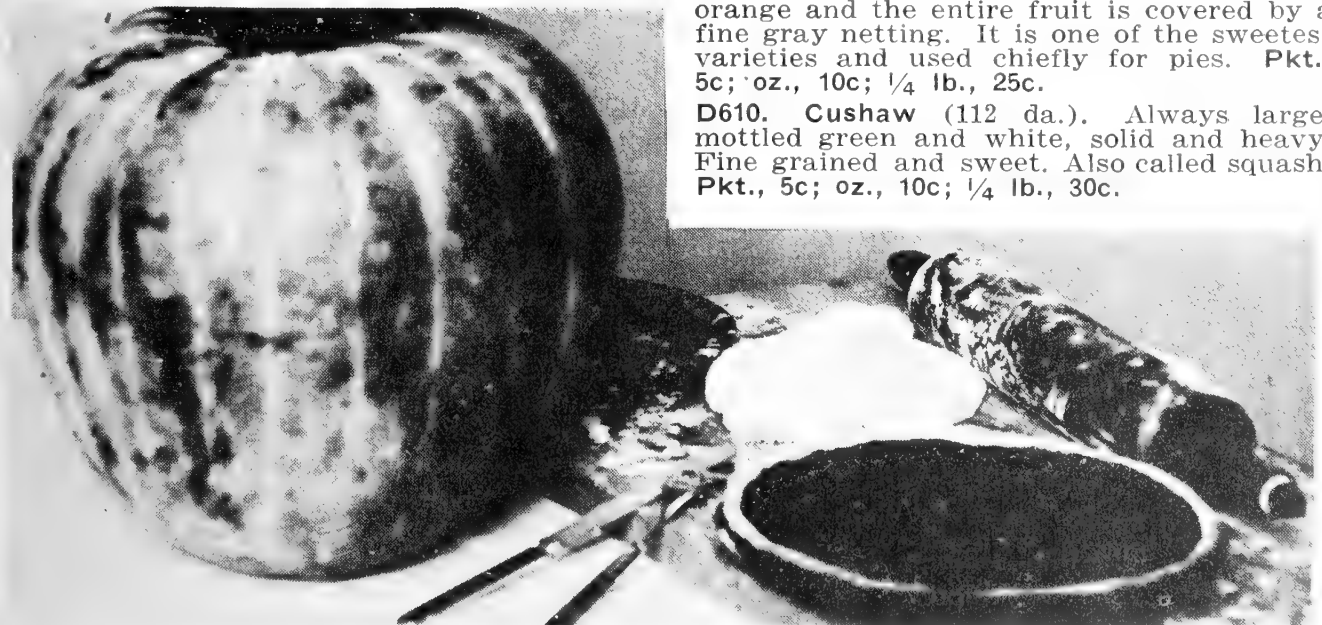

PUMPKIN

D538. Large Sweet Cheese (110 da.). Large flattened fruit that keeps well. Flesh yellow, thick and very tender. Pkt., 5c; oz., 10c; 1/4 lb., 25c.

D545. Small Sugar (108 da.). The favorite pie pumpkin. Fruits medium size to deep orange color with thick sweet flesh. Pkt., 5c; oz., 10c; 1/4 lb., 25c.

D545. Winter Luxury (100 da.). The shape is much like small sugar. The color is deep orange and the entire fruit is covered by a fine gray netting. It is one of the sweetest varieties and used chiefly for pies. Pkt., 5c; oz., 10c; 1/4 lb., 25c.

D610. Cushaw (112 da.). Always large, mottled green and white, solid and heavy. Fine grained and sweet. Also called squash. Pkt., 5c; oz., 10c; 1/4 lb., 30c.

PEAS

Peter Pan

D488. Alaska (50 da.). The earliest of all peas. A splendid bearer. Pods $2\frac{1}{2}$ inches long, well filled with 5 to 7 peas. Good canning variety. Grows 24 inches high.

D490. Little Marvel (65 da.). A very dwarf sort, grows 15 inches high. Can be planted very early. Long pods with 5 to 7 peas of excellent quality.

D492. Pacemaker (58 da.). In plant and pod type it is very similar to Alaska, but it is a wrinkled sort and sweeter. Vines will average 25 to 30 inches in height, pods about $2\frac{1}{2}$ inches long, $\frac{1}{2}$ inch wide and contain six to eight peas per pod. Of excellent quality.

D496. Laxton's Progress (60 da.). The largest and best of the medium dwarf varieties. Vines 15 inches high and pods $4\frac{1}{2}$ inches long, deep green and well filled with dark green peas of excellent quality.

D498. American Wonder (60 da.). The earliest wrinkled variety. Grows 15 inches high, needs no brush. Pods well filled with large peas.

D506. Peter Pan (63 da.). Best all around variety for the Middle West. Grows 18 inches high. Pods very large, filled with six to eight very large sweet peas.

D512. Everbearing (70 da.). An excellent second early sort. Grows 20 inches high. Pods filled with large delicious peas, excellent for canning.

D518. Dwarf Gray Sugar (65 da.). The best of all sugar peas. Very sweet, excellent quality. Pods medium size. Grows 24 inches high.

PLANTING INSTRUCTIONS Plant peas early as they require cool weather to do their best. Sow seed in rows not less than 18 inches apart, covering $1\frac{1}{2}$ to 2 inches deep. One pound will sow 100 feet of row.

Treat all your Beans and Peas with Nitragin before you sow. You will get a better stand, a better crop, and

it improves the soil. Cannot be used except with the seed before sowing. Not good for any other kind of seeds. Garden size tin, enough to treat 4 pounds of seed, 10c, postpaid.

RADISHES

D552. Saxa (22 da.). It is one of the earliest radishes and slow to run to seed. The tops are very small, the radishes are round and bright scarlet.

D553. Giant Butter (28 da.). A favorite variety for home gardens. Roots crimson in color with white, tender and juicy flesh. Will not get pithy.

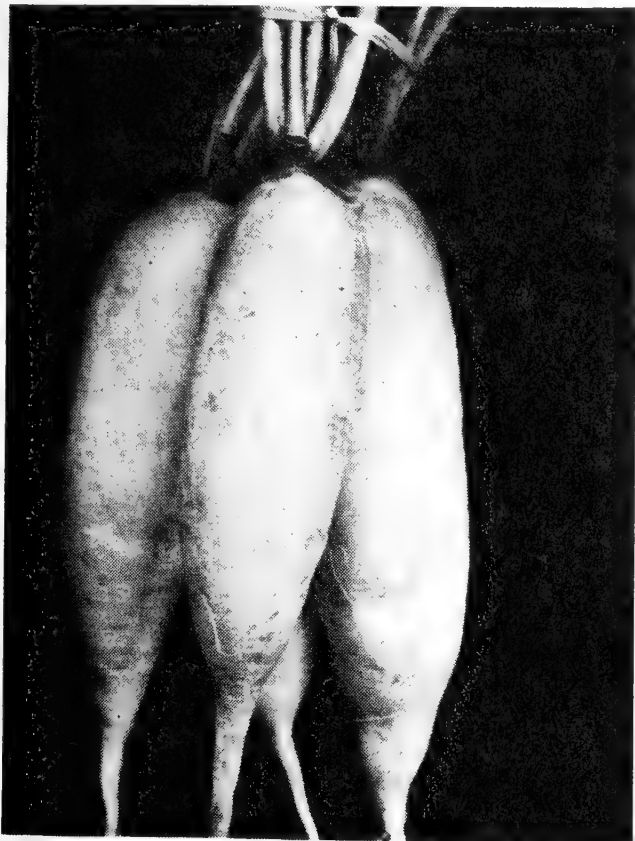

D554. Sparkler (26 da.). Deep scarlet with a pure white tip. The radish is solid, crisp and of very fine quality.

D555. Red Bird (26 da.). Rich scarlet color, flesh snow white and crisp. A very early radish.

D556. White Icicle (27 da.). An extra fine white long radish. It is mild and of very fine quality.

D568. French Breakfast (25 da.). This is a well known oval-shaped radish of bright scarlet with white tip.

D580. Rose China (Winter Radish). Roots 4 to 6 inches long, bright rose-red in color. Flesh white and very firm.

BEATRICE, NEBRASKA

Giant Butter

SALSIFY

D586. Oyster Plant. Makes a most delicious vegetable dish. May remain outdoors over winter. Culture same as carrots. For winter use store in sand in cellar. Pkt., 10c; oz., 25c.

SPINACH

D592. Broad Leaf Nobel. The leaves are very large, thick, broad and slightly crumpled, arrow-shaped with a rounded top, are medium green in color, very crisp and tender. Remain in good condition for a long time. Pkt., 10c; oz., 20c.

D594. Long Standing. The leaves are thick, round and of dark green color. Does not go to seed until late in season. Pkt., 10c; oz., 20c.

D596. New Zealand. Enjoy fresh, tender greens all summer. The more you cut the more it grows. Pkt., 10c; oz., 25c.

Long Standing

TOMATOES

D622. Sioux. This new main crop tomato developed by the Nebraska Agricultural College is becoming more popular every year. The fruits are borne in clusters, are medium size, medium early and of a bright red color. Heavy bearers producing as many as 21 lbs. of medium size fruits on one plant up to October 5th with 85 per cent of them U. S. No. 1 quality. Pkt., 20c; 2 for 35c. See cut, back page.

D623. Red Cloud. This variety was also introduced by the Nebraska Agricultural College. The plants grow very strong and prolific; in one test plot they averaged 13.5 lbs. ripe tomatoes per plant. The fruits are medium size, almost round, very solid meated and of a bright red color. When blossoms are sprayed with Fruitone the fruits are almost seedless. Pkt., 20c; 2 pkts., 35c.

D626. Pritchard or Scarlet Topper (76 da.). Extremely solid and heavy with thick walls of deep scarlet color. Very productive; one of the very best for home use or market.

D627. Firesteel (68 da.). A small vine with medium sized red tomatoes that are early, smooth and firm fleshed. For dry seasons there is nothing to equal it as it will set fruit when other types are dropping their blossoms.

D628. Spark's Earliana (66 da.). Large, fine quality. Stoutly bunched and very productive; fruit slightly flat, and red.

D629. New Marglobe (77 da.). Second early on the market. Plants are vigorous growers and continue bearing until fall. Tomatoes large, round, smooth and of very dark color.

D632. Rutgers (86 da.). Plant large with thick stems and vigorous foliage. Fruits globular, bright red, smooth with thick walls and small seed cells.

D640. New Stone (86 da.). Large fruit, scarlet in color. Smooth and ripening evenly and without any cracks. For main crop.

D648. Yellow Pear (73 da.). Small yellow pear-shaped fruit which is used mostly for preserving.

D652. Bison. (60 da.). Very early, of medium size and very solid. A strong grower and heavy bearer, resists drought extra well.

D654. The Ruby. The strong, healthy vines produce an enormous crop of medium to large size rich red tomatoes. The globe-shaped fruits grow in clusters of 6 to 10. Very solid and meaty.

3 FAVORITES FOR 15c POST PAID

GROW BETTER TOMATOES BY USING HOT-KAPS and FRUITONE. See Page 73.

SQUASH

D603. Table Queen. This is a small acorn shaped squash, smooth and very dark green in color with deep ridges. The flesh is very tender, deep yellow, and when baked and eaten from the shell is delicious. Pkt., 5c; oz., 15c; ¼ lb., 35c.

D604. Banana (110 da.). Cylindrical fruits usually 20 to 24 inches long and 6 inches in diameter. The skin is smooth and greenish gray with thin rind. The orange yellow flesh is firm and solid, free from fibre and of delicious flavor. Excellent for pies. Pkt., 8c; oz., 15c; ¼ lb., 35c.

D605. Early Prolific Straightneck. The fruits are 8 to 10 inches long, 2 to 2½ inches in diameter. It is long, slender, pear shaped with rounded tip, smooth and light yellow in color. Pkt., 5c; oz., 15c; ¼ lb., 30c.

D614. Warty Hubbard. Very dark green shell, hard and warty. Flesh tender and well flavored. Pkt., 5c; oz., 10c; ¼ lb., 25c.

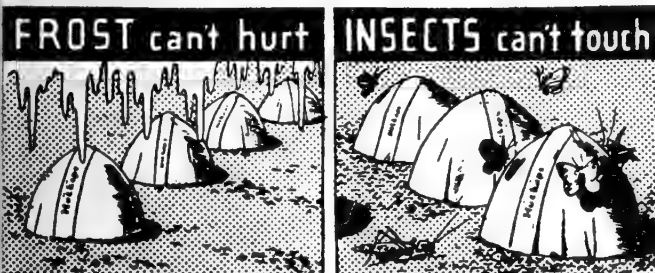

TURNIPS

D662. Purple Top Strap Leaf. Flat, medium sized roots, purple top, fine grained and mild. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., \$1.35.

D666. Purple Top White Globe. Firm, fine grained, white and of fine flavor. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., \$1.35.

D676. Purple Top Yellow Rutabaga. Best yellow meated; good keeper. Pkt., 5c; oz., 10c; ¼ lb., 40c; lb., \$1.45.

HOTKAPS

Hotkaps not only make the young plants grow faster, but they protect them from frosts and insects. Hotkaps have been tried out for several years and we have many testimonials showing where Hotkaps produced ripe tomatoes two weeks earlier than where they were not used. More information given on request.

Home Garden Package, 25 Hotkaps and Cardboard Setter, 65c, postpaid; 50c not prepaid.

100 Hotkaps with Fiberboard Setter, \$2.35, postpaid.

250 Hotkaps with Fiberboard Setter, \$3.50, not prepaid.

1,000 Hotkaps only, \$11.00, not prepaid.

BEATRICE. NEBRASKA

HERBS

To Flavor, Season and Garnish

D678. ANISE—A. Used for garnishing, seasoning and for cordials. Seeds have an agreeable taste. Pkt., 10c.

D688. CARAWAY—A. Seeds are used for flavoring bread, pastry, meats, etc.; also used in confectionery and medicine. Pkt., 10c.

D691. CHIVE SEED. Plants used for flavoring. Pkt., 25c.

D696. DILL—A. Leaves and seeds are used for preserves and pickles. Pkt., 10c.

D700. LAVENDER. The leaves are sometimes used for seasoning, but the plant is chiefly grown for its flowers, which are fragrant. Pkt., 10c.

D702. MARJORAM. The young, tender tops are used green for flavoring, or they may be dried for winter use, for flavoring broths, dressings, etc. Pkt., 10c.

D706. SAGE—P. Leaves used for seasoning and dressing; also in medicine. Pkt., 10c.

D710. SUMMER SAVORY. The leaves and young shoots are used for flavoring. Pkt., 10c.

TRI-GEN

The All-Purpose Spray

A POSITIVE PLANT PROTECTION

This complete Rose Garden Spray Treatment—Tri-ogen—offers the first definite mildew and black spot control combined with an insecticide. It kills all insects, including the sucking and leaf-eating types. It remains on foliage, repelling subsequent attacks. Tri-ogen also stimulates plant growth, resulting in fine foliage and luxuriant bloom. A small kit (makes 16 quarts), postpaid, \$1.60.

TRI-GEN. Rose Dust. Used the same as the liquid. Best results are obtained by dusting early in the morning when dew is on the foliage. 1 lb., 75c, postpaid.

FRUITONE

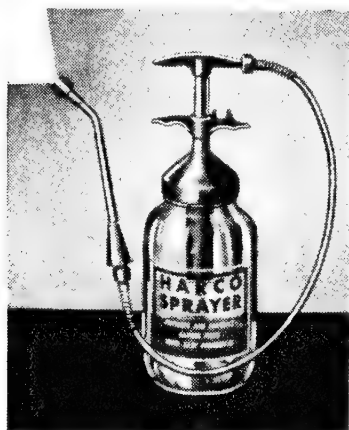

Hormone spray for preventing preharvest drop of apples. Holds apples on the tree longer. Fruitone sprayed on flowers such as tomatoes and beans produce better set of seed and fruit. ¾ oz. pkg., 25c; 2 oz. can, \$1.00, makes 25 gals. of spray.

ROOTONE

A hormone powder easy to use, no skill is needed to apply Rootone, no measurements, no vials, no elaborate charts to follow, just dip and plant. ¼-oz. pkg., 25c; 2-oz. jar, enough to treat 3,000 cuttings, \$1.00.

TRANSPLANTONE

Excellent to overcome the shock of transplanting due to root disturbance. It is clean, odorless, economical and may be used freely on all kinds of plants. ½-oz. pkg., 25c; 3 oz., \$1.00.

Harco Sprayer

only
\$2.40 Postpaid

Continuous Hand Sprayer

I consider this the best small hand sprayer made. It sprays a fine mist, up, down, straight ahead or at any angle. This makes it very practical for spraying underneath the leaves, where the plant lice often gather. It sprays continuously, the forward stroke of the plunger storing sufficient pressure to make spray continuous on return stroke. Quart size, \$1.15, postpaid.

ADMIRAL DUSTER

This new design Duster has been tried out and is a big improvement over the old type. It dusts all kinds of fine powders very evenly. It does the job with less materials, less energy, and does it better. Size of dust container 4 inches in diameter and 4½ inches long. Pump 14 inches long. \$1.35, postpaid.

FANCY KENTUCKY BLUE GRASS

One pound of this seed will make a perfect stand on 200 square feet. Figure your seed on that basis. Spade the ground about 6 inches deep. Rake the ground. Now apply 3 to 4 pounds of Vigoro per 100 square feet. Rake again lightly. Wait from two days to a week before sowing. If there is no rain during that time sprinkle the soil. Sow, rake lightly, then roll to pack the ground. Apply a cover of fine cut straw, or better, of Peat Moss, soak the lawn down heavily. There is no substitute for this tested process. Prices same as Lawn Grass.

LAWN GRASS MIXTURE

Contains, in the proper proportion, the Fancy Kentucky Blue Grass and White Dutch Dwarf Clover, properly mixed so as to make a good even stand. Sow just like described under Fancy Kentucky Blue Grass, no difference in the care. Extra fine, choice seed, per lb., 75c; 5 lbs., \$3.50; postpaid.

WHITE CLOVER

This is of particular value for mixtures for pastures and lawns and will grow on almost any kind of soil, excepting wet or very moist ground. Being very hardy and of creeping habit, it will also prevent the ground from being washed away by heavy rains. Sow 5 to 6 lbs. per acre. Per lb., \$1.00, postpaid.

VIGORO

GARDEN FERTILIZER

Proper feeding with Vigoro Garden Fertilizer will go a long way toward helping you produce big yields of vitamin-yielding, mineral-rich vegetables. Vigoro builds up the soil, gives it what plant life requires, a balanced ration of plant food. It's economical to use. 12-oz. pkg., 20c; 5 lbs., 65c; postpaid. Not prepaid, 5 lbs., \$50c; 10 lbs., 85c; 25 lbs., \$1.50.

NITRAGIN

This is not a fertilizer and must be applied to seed before planting. Nitragen can only be used on legume plants. It improves the root system and gives the plants a much better growth. For beans, peas and sweet peas, enough to treat 4 lbs. of seed, 10c. For all clovers, alfalfa, also lespedeza. Bu., 50c; 2½ bu., \$1.00; postpaid.

ELASTIC PRUNING PAINT

Should be used wherever a limb is cut off or where the bark has been peeled off by rabbits. Prevents decay until the wound is healed. Quart, \$1.00, postpaid.

KUBICIDE

A safe non-poisonous insecticide. Especially good for cabbage worms, lice and aphids on cucumbers. Directions on every package. 1 lb. shaker top, 40c, postpaid.

HAMMOND'S SLUG SHOT

The safest, most effective, easiest to use and most economical insecticide made. Used on cabbage, cauliflower, beans, etc., without fear of harm. Lb., 35c; 5 lbs., \$1.30; postpaid. Not prepaid, lb., 30c; 5 lbs., \$1.00. Liquid, 1-oz. bottle, 35c; 4-oz. bottle, \$1.10; postpaid.

FIELD SEEDS

We carry a complete line of Sweet Clover, Red Clover, Timothy and other grass seeds. Also Grain Sorghos, Millet, and all fodder crops. Ask for samples and prices sent free on request.

ALFALFA—This is the most valuable crop grown on the farm, therefore every farmer should have a large field of it. My Nebraska Upland Alfalfa is one of the hardiest strains grown. Purity 99%, germination 90%. 10 lbs., \$6.50, postpaid; bushel, \$24.00, not prepaid; 100 lbs., \$39.00, freight prepaid. All prices are subject to change without notice.

BROMUS GRASS—This is the most valuable grass for pasture and hay crop here in the Middle West. Nebraska produces about 75% of all Brome Grass Seed in the U. S. and Gage County leads in Nebraska. My Brome is re-cleaned, of best quality and of good germination. 10 lbs., \$3.25, postpaid; 100 lbs., \$19.00. Freight prepaid on 100 lbs. or more.

All prices subject to market change, without notice.

BEATRICE NURSERY

BEATRICE, NEBRASKA

Dear friend:

This book contains valuable instructions. Read it and profit by it.

Note the great values we offer. In spite of all this talk about inflation we have reduced our prices for 1948. Rapidly increasing sales permit us to do so.

Planting Instructions

Our Gladiolus are guaranteed to be true to name and to bloom if planted as follows: Dig soil well and plant bulbs 4 to 5 inches deep, 6 inches apart. Plant in full sun or partial shade. Keep bed free from weeds and water frequently through dry weather. Take bulbs up in late fall for frost-proof winter storage.

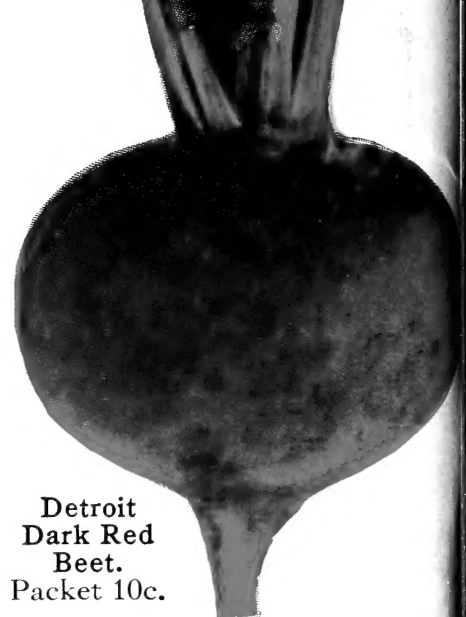

Extra Fancy Gladiolus, Mixed

Fine blooming-size bulbs. This mixture will contain all colors, as we assemble your order from six separate colors at time of shipping. Whether you order only a dozen or a few hundred, you will receive all colors in this mixture, and the bulbs will be of fine size, to assure blooming. This is a wonderful value. Include it in your 1948 garden for a wealth of gorgeous cut-flowers. **12 bulbs 65c; 50 for \$2.15; 100 for \$3.95, prepaid.**
